that cuisine as an art form deserves a higher reputation *Coffee, Society, and Power in Latin America* William Roseberry, Lowell Gudmundson, Mario Samper Kutschbach, 1995-01-01 In January 1927 Gus Comstock a barbershop porter in the small Minnesota town of Fergus Falls drank eighty cups of coffee in seven hours and fifteen minutes The New York Times reported that near the end amid a cheering crowd the man's gulps were labored but a physician examining him found him in pretty good shape The event was part of a marathon coffee drinking spree set off two years earlier by news from the Commerce Department that coffee imports to the United States amounted to five hundred cups per year per person In *Coffee Society and Power in Latin America* a distinguished international group of historians anthropologists and sociologists examine the production processing and marketing of this important commodity Using coffee as a common denominator and focusing on landholding patterns labor mobilization class structure political power and political ideologies the authors examine how Latin American countries of the late nineteenth and early twentieth centuries responded to the growing global demand for coffee This unique volume offers an integrated comparative study of class formation in the coffee zones of Latin America as they were incorporated into the world economy It offers a new theoretical and methodological approach to comparative historical analysis and will serve as a critique and counter to those who stress the homogenizing tendencies of export agriculture The book will be of interest not only to experts on coffee economies but also to students and scholars of Latin America labor history the economics of development and political economy **Nectar and Ambrosia** Tamra Andrews, 2000-10-26 A publishing first *Nectar and Ambrosia* presents an encyclopedic treatment of the magic properties and uses of food by mortals and immortals alike from the pages of myth and legend Now for the first time the magic properties and uses of food by both mortals and immortals as represented in the world's myths and legends are brought together and explained in *Nectar and Ambrosia* This A Z volume is filled with an abundance of exotic lore and legend Plants of Life, Plants of Death Frederick J. Simoons, 2014-03-18 This volume is a study of Chinese food from a cultural and historical perspective Its focus is on traditional China before establishment of the People's Republic It identifies and provides comprehensive information on a broad range of Chinese food plants and animals for general readers as well as for specialists whose interests have led them to *Bad Foods* Michael Oakes, 2017-10-24 *Bad Foods* demonstrates how a variety of historical or political events and personalities have shaped our current views of good nutrition On several occasions in American history concerns have arisen over the safety of our food supply e.g harmful ingredients in processed foods and the potential that processing might deplete foods of their nutrients These concerns help explain how food characteristics such as freshness natural organic and unprocessed have become important to Americans *Bad Foods* traces how the food nutrients fat salt and sugar have acquired negative reputations for health as well as any

controversies and outright misconceptions of the dangers of these nutrients *Bad Foods* also explores confusion that can in part be attributed to biased media coverage about foods Modern Americans are routinely bombarded with information about the health value of certain foods and the dangers of others Frequently health information about certain nutrients receives exaggerated coverage e g dietary fat while the importance of other nutrients gets ignored e g vitamins and minerals Moreover health information about foods is often perceived as contradictory While some readers may be startled by what they perceive to be a challenge to sacred beliefs about foods others will see the honesty in both the research and the writing and recognize the social benefits of examining our beliefs about foods *Bad Foods* will be of interest to sociologists food science specialists and social historians
