On the Pill Elizabeth Siegel

Watkins, 2001-09-14 In 1968 a popular writer ranked the pill's importance with the discovery of fire and the developments of tool making, hunting, agriculture, urbanism, scientific medicine, and nuclear energy. Twenty-five years later the leading British weekly, the Economist, listed the pill as one of the seven wonders of the modern world. The image of the oral contraceptive as revolutionary persists in popular culture, yet the nature of the changes it supposedly brought about has not been fully investigated. After more than thirty-five years on the market, the role of the pill is due for a thorough examination from the Introduction. In this fresh look at the pill's cultural and medical history, Elizabeth Siegel Watkins re-examines the scientific and ideological forces that led to its development, the part women played in debates over its application, and the role of the media, medical profession, and pharmaceutical industry in deciding issues of its safety and meaning. Her study helps us not only to understand the contraceptive revolution as such but also to appreciate the misinterpretations that surround it. The Morning After Heather Munro Prescott, 2011-09-15 Since 2006 when the morning after pill Plan B was first sold over the counter, sales of emergency contraceptives have soared, becoming an 80 million industry in the United States and throughout the Western world. But emergency contraception is nothing new. It has a long and often contentious history as the subject of clashes not only between medical researchers and religious groups but also between different factions of feminist health advocates. The Morning After tells the story of emergency contraception in America from the 1960s to the present day and, more importantly, it tells the story of the women who have used it. Side-stepping simplistic readings of these women as either radical feminist trailblazers or guinea pigs for the pharmaceutical industry, medical historian Heather Munro Prescott offers a portrait of how ordinary women participated in the development and popularization of emergency contraception, bringing a groundbreaking technology into the mainstream with the potential to alter radically reproductive health practices.

Narcocapitalism Laurent de Sutter, 2018-03-16 What do the invention of anaesthetics in the middle of the nineteenth century, the Nazis' use of cocaine, and the development of Prozac have in common? The answer is that they're all products of the same logic that defines our contemporary era: the age of anaesthesia. Laurent de Sutter shows how large aspects of our lives are now characterised by the management of our emotions through drugs, ranging from the everyday use of sleeping pills to hard narcotics. Chemistry has become so much a part of us that we can't even see how much it has changed us. In this era, being a subject doesn't simply mean being subjected to powers that decide our lives; it means that our very emotions have been outsourced to chemical stimulation. Yet we don't understand why the drugs that we take are unable to free us from fatigue and depression, and from the absence of desire that now characterizes our psychopolitical condition. We have forgotten what it means to be excited because our only excitement has become drug-induced. We have to abandon the

narcotic stimulation that we've come to rely on and find a way back to the collective excitement that is narcocapitalism's greatest fear
