Africa **Africa: A History** Alvin M. Josephy, 2016-09-06 Most of us still know less about Africa's past and peoples than we do about the continent's wild animals. And what we do know is colored by romance: safaris and treks and camel caravans, Solomon's mine and Tutankhamun's curse, the shores of Tripoli and the snows of Kilimanjaro. Yet the ancestor of all humankind may have lived in Africa. The world's longest-lived literate civilization was African. Through the ages, great civilizations rose and fell in what was once called darkest Africa, leaving behind mysterious fortresses and splendid art. Christianity and Islam battled age-old beliefs and each other. Traders on camels were followed by explorers in caravels and by a plague of invaders hungry for ivory and diamonds and the black gold of slavery. In just the last half-century, independence has swept away the old maps and colonial ways to jar the balance of the world. Here is Africa's story. *Kwame Nkrumah's Politico-cultural Thought and Policies* Kwame Botwe-Asamoah, 2005 This study critically synthesizes and analyses the relationship between Kwame Nkrumah's politico-cultural philosophy and policies as an African-centred paradigm for the post-independence African revolution. It also argues for the relevance of his theories and politics in today's Africa.
