The Political Economy Of Food Aid:

The Political Economy of Food Aid John Cathie, 1982 While Accepting The Role Of Food Aid In Humanitarian Relief The Author Seriously Questions The Whole Practice As A Tool In Social And Economic Development In Good Condition *The political economy of food and nutrition policies* Per Pinstrup-Andersen, 1993-01-01 Few nutritionists and economists fully appreciate how the political environment shapes policy and subsequently affects the relevance of their policy recommendations When governments fail to follow the recommendations of nutritionists and economists and are unable to design and implement cost effective nutrition programs and policies it is often attributed to politics or to lack of political will on the part of decisionmakers Past nutrition planning efforts frequently failed to understand the goals and behavior of the various agents and institutions inside and outside the government that in the final analysis determine whether the planning effort is successful In *The Political Economy of Food and Nutrition Policies* Per Pinstrup Andersen brings together a group of distinguished authorities to improve the understanding of how nutrition policies are formulated within larger political and economic contexts and how public sector agencies behave with regard to food and nutrition

The Political Economy of Food Aid Rachael Mationesa Munyanyi, 2010 Humanitarian food aid has been the backbone of many livelihoods in many parts of the world With the world currently battling the impact of natural disasters such as Tsunamis it is undeniable that food aid remains an important aspect of sustaining livelihoods This book provides an interesting insight into the political economy of food aid through examining the nature of the popular food aid distributions in Zimbabwe

The Political Economy of Food System Transformation Danielle Resnick, Johan Swinnen, 2023-09-21 This is an open access title available under the terms of a CC BY NC 4 0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations The current structure of the global food system is increasingly recognized as unsustainable In addition to the environmental impacts of agricultural production unequal patterns of food access and availability are contributing to non communicable diseases in middle and high income countries and inadequate caloric intake and dietary diversity among the world s poorest To this end there have been a growing number of academic and policy initiatives aimed at advancing food system transformation including the 2021 UN Food Systems Summit the Sustainable Development Goals SDGs and several UN Climate conferences Yet the policy pathways for achieving a transformed food system are highly contested and the enabling conditions for implementation are frequently absent Furthermore a broad range of polarizing factors affect decisions over the food system at domestic and international levels from debates over values and mis information to concerns over food self sufficiency corporate influence and human rights This volume explicitly analyses the political economy dynamics of food system transformation with contributors who span several disciplines including economics ecology geography nutrition political science and public policy The chapters collectively address the range of interests institutions and power in the food system the diversity of coalitions that form

around food policy issues and the tactics they employ the ways in which policies can be designed and sequenced to overcome opposition to reform and processes of policy adaptation and learning Drawing on original surveys interviews empirical modelling and case studies from China the European Union Germany Mexico South Asia sub Saharan Africa and the United States the book touches on issues as wide ranging as repurposing agricultural subsidies agricultural trade biotechnology innovations red meat consumption sugar sweetened beverage taxes and much more *The ^APolitical History of American Food Aid* Barry Riley,2017-08-25 The Political History of American Food Aid provides a profound understanding of the complex factors influencing American food aid policy and a foundation for examining its historical relationship with relief economic development food security and its possible future in a world confronting the effects of global climate change

Food and Poverty Radha Sinha,2013-11-19 First published in 1976 this book deals with contemporary tensions between the West and the Third World caused by hunger malnutrition and poverty perpetuated by an imbalance in the distribution of world resources The book deals with the issue of malnutrition in the Third World which owes much more to poverty and unemployment than to agricultural failure The author also believes that population control can do little in the absence of a more equitable distribution of world resources and political power within and between countries involving a fundamental change in ideology and education This is a challenging and critical book whose arguments cannot be ignored by anyone concerned with the creation of a just and stable world order *The Political Economy of Agricultural and Food Policies* Johan Swinnen,2018-05-24 Winner of the European Association of Agricultural Economists Book Award Food and agriculture have been subject to heavy handed government interventions throughout much of history and across the globe both in developing and in developed countries Today more than half a trillion US dollars are spent by some governments to support farmers while other governments impose regulations and taxes that hurt farmers Some policies such as price regulations and tariffs distribute income but reduce total welfare by introducing economic distortions Other policies such as public investments in research food standards or land reforms may increase total welfare but these policies come also with distributional effects These distributional effects influence the preferences of interest groups and in turn influence policy decisions Political considerations are therefore crucial to understand how agricultural and food policies are determined to identify the constraints within which welfare enhancing reforms are possible or not and finally to understand how coalitions can be created to stimulate growth and reduce poverty *The Political Economy of Aid in Palestine* Sahar Taghdisi-Rad,2010-10-04 Despite for many years receiving the highest per capita aid worldwide the economies of the West Bank and Gaza Strip have failed to achieve any lasting developmental outcomes and suffer from major weaknesses which undermine their very survival This book argues that the dominant mainstream approach to the study of aid and aid effectiveness is theoretically and empirically inadequate for a comprehensive understanding and analysis of the workings of aid in developing countries particularly those undergoing conflict This book examines the nature of donor operations in

Palestine highlighting the political and ideological determinants of aid allocation and effectiveness and focussing on the role of trade related donor assistance in Palestine more commonly known as Aid for Trade It discusses how such trade related assistance is only another instance of donors working around the conflict as opposed to taking it into account and how aid to Palestine cannot bring about significant improvement as long as the Palestinian economy is fundamentally affected by Israeli occupation settlements and blockade It argues that unless restructured and more carefully targeted aid can only act as a temporary relief mechanism Furthermore the book sheds light on critical areas within Palestinian territories that are in need of development and require significant and immediate attention at both national and international level

The Political Economy of Shipping US Food Aid Under the Cargo Preference Regime Kenneth J. Button, 2015 We are concerned with the way in which US agricultural cargo preference that regulates the international transportation of US Government generated goods may affect food aid provision It considers specifically the efficiency of the current arrangements whereby 50 percent of food aid has to be moved by US registered ships and the potential implications of changing this It does this within a much broader critique of the ways in which such policies tend to be evaluated The findings are that when its opportunity costs are netted out there are likely to be fewer quantifiable benefits to the US economy of the cargo preference structure than are often posited In particular many of the estimates of the economic gains to the US found in prior studies often involve those of vested interests and are frequently gross calculations based on not only a weak underlying methodology but also a distorted use of that methodology
