exercise Not only is peace an emotive and value laden concept it is also abstract ambiguous and seemingly inextricably tied to its antithesis war And it is war and violence that have been so compellingly studied within critical geography in recent years This volume offers an attempt to redress that balance and to think more expansively and critically about what peace means and what geographies of peace may entail The editors begin with an examination of critical approaches to peace in other disciplines and a helpful genealogy of peace studies within geography The book is then divided into three sections The opening section examines how the idea of peace may be variously constructed and interpreted according to different sites and scales The chapters in the second section explore a remarkably wide range of techniques of peacemaking This widens the discussion from the archetypal image of top down diplomatic state led initiatives to imperial boundary making practices grassroots cultural identity assertion boycotts self immolation ex paramilitary community activism and protective accompaniment The final section shifts the scale and focus to everyday personal relations and a range of practices around the concept of coexistence In their concluding chapter the editors spell out some of the key questions that they believe a geography of peace must address What spatial factors have facilitated the success or precipitated the failure of some peace movements or diplomatic negotiations Why are some ideologies productive of violence in some places but co operation in others How have some communities been better able to deal with religious racial cultural and class conflict than others How have creative approaches to sharing sovereignty mitigated or transformed territorial disputes that once seemed intractable Geographies of Peace is the first book wholly devoted to exploring the geography of peace Drawing on both recent advances in social and political theory and detailed empirical research covering four continents it makes a significant intervention into current debates about peace and violence

Rehearsing the State Fiona McConnell, 2016-03-07 Rehearsing the State presents a comprehensive investigation of the institutions performances and actors through which the Tibetan Government in Exile is rehearsing statecraft McConnell offers new insights into how communities officially excluded from formal state politics enact hoped for futures and seek legitimacy in the present Offers timely and original insights into exile Tibetan politics based on detailed qualitative research in Tibetan communities in India Advances existing debates in political geography by bringing ideas of stateness and statecraft into dialogue with geographies of temporality Explores the provisional and pedagogical dimensions of state practices adding weight to assertions that states are in a continual situation of emergence Makes a significant contribution to critical state theory

The Political Theory of Tyranny in Singapore and Burma Stephen McCarthy, 2006-04-18 Covering various fields in political science this new book presents an historical and political cultural analysis of Buddhism and Confucianism Using Singapore and Burma as case studies the book questions the basic assumptions of democratization theory examining the political science of tyranny and exploring the rhetorical manipulation of religion for the purpose of political legitimacy A welcome addition to the political science and Asian studies literature McCarthy addresses many of the current issues that underlie the field of democratization in comparative politics
