Babel Siraj Ahmed, 2017-12-12 For more than three decades preeminent scholars in comparative literature and postcolonial studies have called for a return to philology as the indispensable basis of critical method in the humanities Against such calls this book argues that the privilege philology has always enjoyed within the modern humanities silently reinforces a colonial hierarchy In fact each of philology's foundational innovations originally served British rule in India Tracing an unacknowledged history that extends from British Orientalist Sir William Jones to Palestinian American intellectual Edward Said and beyond *Archaeology of Babel* excavates the epistemic transformation that was engendered on a global scale by the colonial reconstruction of native languages literatures and law In the process it reveals the extent to which even postcolonial studies and European philosophy not to mention discourses as disparate as Islamic fundamentalism Hindu nationalism and global environmentalism are the progeny of colonial rule Going further it unearths the alternate concepts of language and literature that were lost along the way and issues its own call for humanists to reckon with the politics of the philological practices to which they now return

The Transformation of European Private Law James Devenney, Mel Kenny, 2013-10-24 A critical overview of the Europeanisation

of private law at a watershed moment a point of punctuated equilibrium *Marshall, Marshallians and Industrial Economics* Tiziano Raffaelli, Tamotsu Nishizawa, Simon Cook, 2011-03-28 This book focuses on both Marshall and the Marshallian tradition revisiting the 1920s and 1930s debates on business size external economies coordination and management costs including contributions from Roger Backhouse and Richard Arena The Power of Knowledge Jeremy Black, 2014-01-14 Information is power For more than five hundred years the success or failure of nations has been determined by a country's ability to acquire knowledge and technical skill and transform them into strength and prosperity Leading historian Jeremy Black approaches global history from a distinctive perspective focusing on the relationship between information and society and demonstrating how the understanding and use of information have been the primary factors in the development and character of the modern age Black suggests that the West's ascension was a direct result of its institutions and social practices for acquiring employing and retaining information and the technology that was ultimately produced His cogent and well reasoned analysis looks at cartography and the hardware of communication armaments and sea power mercantilism and imperialism science and astronomy as well as bureaucracy and the management of information linking the history of technology with the history of global power while providing important indicators for the future of our world Bureaucratic Archaeology Ashish Avikunthak, 2022-02-03 An ethnography of archaeological practice in postcolonial India that reveals the bureaucratic culture in the making of knowledge about past Law Books in Action Angela Fernandez, Markus Dubber, 2012-04-02 Law Books in Action Essays on the Anglo American Legal Treatise explores the history of the legal treatise in the common law world Rather than looking at treatises as shortcuts from law in books to law in action the essays in this collection ask what treatises can tell us about what troubled legal professionals at a given time what motivated them to write what they did and what they hoped to achieve This book then is the first study of the legal treatise as a law book in action an active text produced by individuals with ideas about what they wanted the law to be not a mere stepping stone to codes and other forms of legal writing but a multifaceted genre of legal literature in its own right practical and fanciful dogmatic and ornamental in turn This book will be of interest to legal scholars lawyers and judges as well as to anyone else with a scholarly interest in law in general and legal history in particular *Foundations of Indian Contract Law*, 2024-11-25 This new volume analyses the central doctrines and concepts of Indian contract law and provides guidance on the interpretation of the Indian Contract Act 1872 by examining its historical philosophical and comparative foundations Featuring contributions from practitioners and academics from around the world the book follows a methodology carefully calibrated to address the shortcomings in traditional Indian contract law scholarship The primary presuppositions of this methodology are that a the answers to many difficult questions of Indian contract law can be found in the history of the Contract Act and b while it is difficult to understand the Contract Act other than against the backdrop of the common law one should not assume that Indian contract law mirrors the common law on all difficult points Each chapter therefore pays close

attention to the legislative history of the relevant provisions of the Contract Act Based on a holistic analysis of the Contract Act's drafting history and its current interpretation Foundations of Indian Contract Law is a carefully crafted volume providing the input needed to influence the Indian courts approach to contract law inform meaningful legislative reform and more broadly catalyse a culture of critical scholarship on Indian private law Formed of 24 chapters and a conclusion by Professor Hugh Beale former Commercial Law and Common Law Commissioner at the Law Commission of England and Wales the volume presents an authoritative exposition of a branch of the law that is of considerable interest and great practical importance for practitioners scholars and students interested in Indian contract law *Geographies of an Imperial Power* Jeremy Black, 2018-01-06 From explorers tracing rivers to navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain's expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known **The Greek Experience of India** Richard Stoneman, 2021-06-08 An exploration of how the Greeks reacted to and interacted with India from the third to first centuries BCE When the Greeks and Macedonians in Alexander's army reached India in 326 BCE they entered a new and strange world They knew a few legends and travelers tales but their categories of thought were inadequate to encompass what they witnessed The plants were unrecognizable their properties unknown The customs of the people were various and puzzling While Alexander's conquest was brief ending with his death in 323 BCE the Greeks would settle in the Indian region for the next two centuries forging an era of productive interactions between the two cultures The Greek Experience of India explores the various ways that the Greeks reacted to and constructed life in India during this fruitful period From observations about botany and mythology to social customs Richard Stoneman examines the surviving evidence of those who traveled to India Most particularly he offers a full and valuable look at Megasthenes ambassador of the Seleucid king Seleucus to Chandragupta Maurya and provides a detailed discussion of Megasthenes's now fragmentary book Indica Stoneman considers the art literature and philosophy of the Indo Greek kingdom and how cultural influences crossed in both directions with the Greeks introducing their writing coinage and sculptural and architectural forms while Greek craftsmen learned to work with new materials such as ivory and stucco and to probe the ideas of Buddhists and other ascetics Making Legal History Anthony Musson, Chantal Stebbings, 2012-01-26
