# COMMON SENSE PHYSICS & COSMOLOGY

ALL PHENOMENA HAVE PHYSICAL ORIGINS!

All universal phenomena such as gravity and light are logically explained by the classical (Galilean) physics, taught in high schools!

The universe has both gravity and antigravity matters in 3-dimensional space!

The Hubble Image of a small region of the observable universe.

Since there can be only one consistent and coherent interpretation of the universe and all universal phenomena, Galilean physics is now proven to be the only correct physics!

## **Skip From Common Sense To Cosmology:**

**Common Sense Cosmology** Lenard Metzger, 2010-07-30 This is a personal alternative view of how the universe came into being where it is going and its place in the cosmos Presented are new concepts about black holes the big bang gravity and time With my apology to Albert Einstein Also included are ideas about photons and atomic structure      **The Epic Trickster in American Literature** Gregory E. Rutledge, 2013-04-26 Just as Africa and the West have traditionally fit into binaries of Darkness Enlightenment Savage Modern Ugly Beautiful and Ritual Art among others much of Western cultural production rests upon the archetypal binary of Trickster Epic with trickster aesthetics and commensurate cultural forms characterizing Africa Challenging this binary and the exceptionalism that underlies anti hegemonic efforts even today this book begins with the scholarly foundations that mapped out African trickster continuities in the United States and excavated the aesthetics of traditional African epic performances Rutledge locates trickster like capacities within the epic hero archetype the epic trickster paradigm and constructs an Homeric Diaspora which is to say that the modern Homeric performance foundation lies at an absolute time and distance away from the ancient storytelling performance needed to understand the cautionary aesthetic inseparable from epic potential As traditional epic performances demonstrate unchecked epic trickster dynamism anticipates not only brutal imperialism and creative diversity but the greatest threat to everyone an eco apocalypse Relying upon the preeminent scholarship on African American trickster heroes traditional African heroic performances and cultural studies approaches to Greco Roman epics Rutledge traces the epic trickster aesthetic through three seminal African American novels keenly attuned to the American Homeric Diaspora Charles Chesnutt s *The Marrow of Tradition* Richard Wright s *Native Son* and Toni Morrison s *Beloved*      *How Shall the Rich Escape?* Frank Seaver Billings, 1894      *The Cosmic Time of Empire* Adam Barrows, 2011 Combining original historical research with literary analysis Adam Barrows takes a provocative look at the creation of world standard time in 1884 and rethinks the significance of this remarkable moment in modernism for both the processes of imperialism and for modern literature As representatives from twenty four nations argued over adopting the Prime Meridian and thereby measuring time in relation to Greenwich England writers began experimenting with new ways of representing human temporality Barrows finds this experimentation in works as varied as Victorian adventure novels high modernist texts and South Asian novels including the work of James Joyce Virginia Woolf H Rider Haggard Bram Stoker Rudyard Kipling and Joseph Conrad Demonstrating the investment of modernist writing in the problems of geopolitics and in the public discourse of time Barrows argues that it is possible and productive to rethink the politics of modernism through the politics of time      **Cosmic Constitutional Theory** J. Harvie Wilkinson, 2012-03-12 What underlies this development In this concise and highly engaging work Federal Appeals Court Judge and noted author From Brown to Bakke J Harvie Wilkinson argues that America s most brilliant legal minds have launched a set of cosmic constitutional theories that for all their value are undermining self governance      **Black Holes,**

**Wormholes and Time Machines** Jim Al-Khalili, 2002-01-01 Do you know What might happen if you fall into a black hole That the Universe does not have an edge That the reason it gets dark at night is proof of the Big Bang That cosmic particles time travel through the atmosphere defying death That our past present and future might all coexist out there With two remarkable ideas Albert Einstein revolutionized our view of the Universe His first was that nothing can travel faster than light the ultimate speed limit This simple fact leads to the unavoidable conclusion that space and time must be linked together forever as Spacetime With his second monumental insight Einstein showed how Spacetime is warped and stretched by the gravity of all objects in the Universe and even punctured by black holes But such possible twisting of Spacetime allowed a magic not even Einstein could have imagined time travel Theoretical physicist Jim Al Khalili finally lays science fiction to rest as he opens up Einstein's Universe Leading us gently and light heartedly through the dizzying world of our space and time he even gives us the recipe for a time machine capable of taking us Back to the Future to Alice's Wonderland or on a trip with the Terminator

**Cosmic Plasma Physics** B.V. Somov, 2013-03-09 of the approximation at hand will be outlined from the viewpoint of physics rather than of many possible astronomical applications After that as an aid to detailed understanding please return with pencil and paper to work out the missing steps if any in the formal mathematics On the basis of such an approach the student interested in modern astro physics its current practice will find the answers to two key questions 1 what approximation is the best one the simplest but sufficient for description of a phenomenon in cosmic plasma 2 how to build an adequate model for the phenomenon for example a solar flare Practice is really important for understanding the theory of cosmic plasma Related exercises problems and answers supplemented to each chapter to improve skill do not thwart the theory but serve to better understanding of cosmic plasma physics As for the applications preference evidently is given to physical processes in the solar plasma Why Much attention to solar plasma physics is on the possibility of the all round observational test of theoretically conditioned by models This statement primarily relates to the processes in the solar atmosphere For instance flares on the Sun in contrast to those on other stars as well as a lot of other analogous phenomena in the Universe can be seen in their development i.e.

*Earthing the Cosmic Christ of Ephesians--The Universe, Trinity, and Zhiyi's Threefold Truth, Volume 2* John P. Keenan, 2022-09-09 This is volume 2 of a wide ranging interfaith reading of the Letter to the Ephesians a New Testament text whose words have inspired and enhanced Christian spiritual life and liturgy over the centuries Unfortunately at the same time Ephesians has provided apparent scriptural support to those who would defend slavery patriarchy misogyny and the physical power of Christ over the cosmos How on earth are today's Christians to receive and understand such a text as this Earthing the Cosmic Christ of Ephesians The Universe Trinity and Zhiyi's Threefold Truth draws upon a broad array of scientific theological and philosophical thinkers who enable us both to marvel at today's ever expanding knowledge of our vast cosmos and to appreciate the importance of the Ephesian letter in the canon of our Christian scriptures even while we acknowledge the archaic geocentric cosmology

that underlies its claims about the cosmic Christ and reject its accommodation to the patriarchal misogynistic and slaveholding norms of its first century culture Throughout this reading of Ephesians we look to Chinese Buddhist master Zhiyi and his threefold truth to enhance our understanding of trinity and the nascent trinitarian themes within this letter As a whole this work constitutes a new appreciation for Ephesians as well as a twenty first century apologetic for doctrinal humility and for theologizing within a global theological commons      *Very High Energy Cosmic Gamma Radiation* Felix A. Aharonian,2004 Gamma ray astronomy the branch of high energy astrophysics that studies the sky in energetic ray photons is destined to play a crucial role in the exploration of nonthermal phenomena in the Universe in their most extreme and violent forms The great potential of this discipline offers impressive coverage of many OC hot topicsOCO of modern astrophysics and cosmology such as the origin of galactic and extragalactic cosmic rays particle acceleration and radiation processes under extreme astrophysical conditions and the search for dark matter      **Escape from God** Dean Turner,1991

*Enlightened Common Sense* Roy Bhaskar,2016-07-01 Since the 1970s critical realism has grown to address a range of subjects including economics philosophy science and religion It has become a complex and mature philosophy Enlightened Common Sense The Philosophy of Critical Realism looks back over this development in one concise and accessible volume The late Roy Bhaskar was critical realism s philosophical originator and chief exponent He draws on a lifetime s experience to give a definitive systematic account of this increasingly influential international and multidisciplinary approach Critical realism s key element has always been its vindication and deepening of our understanding of ontology Arguing that realist ontology is inexorable in knowledge and action Bhaskar sees this as the key to a new enlightened common sense From the definition of critical realism and its applicability in the social sciences to explanation of dialectical critical realism and the philosophy of metaReality this is the essential introduction for students of critical realism      The Cosmic Code Heinz R. Pagels,2012-11-01 An eminent physicist discusses and explains the core concepts of physics without resorting to complicated mathematics Can be read by anyone I heartily recommend it New York Times Book Review 1982 edition      **The Writings of John Fiske ...: Outlines of cosmic philosophy** John Fiske,1902      **The Culinary Plagiarist** Jason Peters,2020-05-28 More than a collection of vignettes and stories from garden grill and kitchen The Culinary Plagiarist is a sustained adventure in gustatory delight an intensely private but candid account of desire and all its objects Opinionated on the full range of human experience from fasting to inebriety from sports to politics from religion to raunch it is at once serious humorous ironic reflective grateful allusive and appetitive Along the way it offers a defense of small scale local life of family of place and of the bread we do not live alone by And also the drinks Don t forget the drinks This is a book for people who enjoy being alive whether in the kitchen the pasture the library the barn the trout stream the henhouse or the doghouse or the bedroom      **Cosmic Codes** Chuck Missler,2004      **Common Sense Destroys Faith in the Theory of Evolution** W.D.

Cain,2023-06-08 The false theory of evolution kicks aside God but now in non tech terms you can destroy it You don t have to

be a white coat evolutionary scientist to know that Nothingness did not create everything That chaos did not create our remarkable ordered world That blindness did not create sight or deafness create hearing That unconsciousness did not create consciousness and the list goes on and on It s not even common sense Evolution is merely a way for God denying people to give an alternate case for creation that leaves God out of the picture Why would they do that Well to many scientists and others in our self oriented world the thought of God restricting their desires is not a good thought Wake up Christian influencers You now have a common sense evidence based non technical way to win against the unfounded theory of evolution which UNDERMINES God and His Word beginning in Genesis 1 1 We now have generations doubting the authenticity of God and His Word all springing out of the false philosophy of evolution and you wonder why our Christian heritage is slipping away How do evolutionists say it all got started Why is nature so orderly and predictable Why does it lend itself to classification Agronomy to Zoology and everything in between The periodic table The laws of physics The overall harmony and interconnection of Ecology There must be an uncaused first cause Yes The God of the Bible This book will make more sense than anything you ve read in a while Understandable Convincing Christ centered And above all arming you to DO SOMETHING with these truths to promote belief in God They insist evolution is the better answer but never explain why

**God after Einstein** John F. Haught, 2022-03-15 A leading theologian presents a hopeful account of the universe after Einstein exploring it as a meaningful drama of awakening This book is a deep and provocative piece of theology that proposes we engage with the universe as a kind of narrative of awakening and unfolding as well as an important and useful approach for thinking about theology with respect to modern cosmology Matthew Stanley New York University Before the early twentieth century scientists and theologians knew almost nothing about time s enormity and the corresponding immensity of space But now after Einstein cosmology offers theology a whole new way of looking at the ageless questions about matter time God cosmic purpose and the significance of our lives The universe need not be thought of as simply an endless reshuffling of lifeless and mindless atoms in a pointless series of moments Rather the universe is a temporal drama of awakening whose meaning can be revealed only gradually by looking in a spirit of anticipation and hope toward the horizon of the cosmic future In conversation with Einstein s ideas and opinions John F Haught develops here a new cosmological understanding of the meaning of God time eternity mystery life thought freedom and faith In doing so he offers readers a new way of understanding the relationship of science to theology Earth, Cosmos and Culture Oliver Tristan

Dunnett, 2021-04-19 This book traces the development of diverse British cultures of outer space utilizing key geographical concepts such as landscape place and national identity It examines the early visionary ideas of writers H G Wells and Olaf Stapledon the ambitious British space programme of the 1960s and narrations of British cultural identity that accompanied the space missions of Helen Sharman Beagle 2 and Tim Peake The exploration of British cultures of outer space throughout the book helps understand the emergence of the British Interplanetary Society It also explains its significance in pre war and

post war periods through an analysis of the roles of influential figures such as Arthur C Clarke and Patrick Moore The chapters explore utopian and dystopian representations of space exploration examine the mysterious phenomenon of UFO culture and consider plans for humanity s imagined future across interstellar space Throughout the book geography is advocated as a home for critical studies of outer space illuminating its significance in terms of the reciprocal relationships between exploration and the sublime science and the imagination Earth and cosmos As an emergent field of research in the social sciences this book makes an excellent contribution to the study of the outer space in Britain and abroad developing a distinctive kind of outer spatial geography with major implications for future teaching and research      **Cosmology** Edward Harrison, 2000-03-16 Cosmology The Science of the Universe is an introduction to past and present cosmological theory For much of the world s history cosmological thought was formulated in religious or philosophical language and was thus theological or metaphysical in nature However cosmological speculation and theory has now become a science in which the empirical discoveries of the astronomer theoretical physicist and biologist are woven into intricate models that attempt to account for the universe as a whole Professor Harrison draws on the discoveries and speculations of these scientists to provide a comprehensive survey of man s current understanding of the universe and its history Tracing the rise of the scientific method the major aim of this book is to provide an elementary understanding of the physical universe of modern times Thoroughly revised and updated this second edition extends the much acclaimed first edition taking into account the many developments that have occurred      **Jump at the Sun** John Lowe, 1997 Lowe has written what may well be the Hurston book for the years to come Werner Sollors Harvard University Lowe s study smartly begins with the assumption that one reason for the stunning popularity of Hurston s work is the verve with which it addresses serious subjects in a comic style Cheryl A Wall editor of Changing Our Own Words Essays on Criticism Theory and Writing by Black Women Appreciative of Hurston s bodacious humor Lowe argues that she is a profoundly serious experimental subversive and therefore unsettling artist Strongly recommended Choice A trailblazing effort a work that will enrich our understanding of Hurston s fiction William R Nash The Southern Literary Journal The most important booklength contribution to Hurston scholarship since Robert Hemenway published his biography in 1978 Will Brantley Contemporary Literature
