N. Green,Andrew L. Slap,2024-04-02 Investigates how Americans have remembered violence and resistance since the Civil

War including Confederate monuments historical markers college classrooms and history books George Floyd's murder in the summer of 2020 sparked a national reckoning for the United States that had been 400 years in the making Millions of Americans took to the streets to protest both the murder and the centuries of systemic racism that already existed among European colonists but transformed with the arrival of the first enslaved African Americans in 1619 The violence needed to enforce that systemic racism for all those years from the slave driver's whip to state sponsored police brutality attracted the immediate attention of the protesters The resistance of the protesters echoed generations of African Americans resisting the violence and oppression of white supremacy Their opposition to violence soon spread to other aspects of systemic racism including a cultural hegemony built on and reinforcing white supremacy At the heart of this white supremacist culture is the memory of the Civil War era when in 1861 8 million white Americans revolted against their country to try to safeguard the enslavement of 4 million African Americans The volume has three interconnected sections that build on one another The first section Violence explores systemic racism in the Civil War era and now with essays on slavery policing and slave patrols The second section titled Resistance shows how African Americans resisted violence for the past two centuries with essays discussing matters including self emancipation and African American soldiers The final section Memory investigates how Americans have remembered this violence and resistance since the Civil War including Confederate monuments and historical markers This volume is intended for nonhistorians interested in showing the intertwined and longstanding connections between systemic racism violence resistance and the memory of the Civil War era in the United States that finally exploded in the summer of 2020

Pacifism as War Abolitionism Cheyney Ryan,2024-03-12 Responding to the unprecedented violence of our times and the corresponding interest in nonviolent solutions this book takes up the heart of pacifism its critique of what pacifists have termed the war system Pacifism as War Abolitionism provides an account of the war system that draws on contemporary sociology history and political philosophy The core of its critique of that system is that war begets war and hence war will not be ended or even constrained by finding more principled ways to fight war as many imagine War can only be ended by ending the war system which can only be done nonviolently This has been the message of pacifism s great voices like Gandhi Dr Martin Luther King Jr and Dorothy Day It is the principal message of this book Key Features Draws extensively on the sociological and historical research on war to expand the usual philosophical discussion beyond hypothetical accounts Expands the dialogues on the ethics of war beyond just war theory to its principal alternative pacifism Engages discussion of empire and imperialism in relation to the logic and development of the war system Presents pacifism s response to the reality of war today including the idea of never ending war
