language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe

Cataloging Policy and Support Office,2009 *Interslavic zonal constructed language* Vojtěch Merunka,2018-02-01 Interslavic zonal constructed language is an auxiliary language which looks very similar to real spoken Slavic languages in Central and Eastern Europe and continues the tradition of the Old Church Slavonic language Interslavic shares grammar and common vocabulary with modern spoken Slavic languages in order to build a universal language tool that Slavic people can understand without any or with very minimal prior learning It is an easily learned language for those who want to use this language actively Interslavic enables passive e g receptive understanding of the real Slavic languages Non Slavic people can use Interslavic as the door to the big Slavic world Zonal constructed languages are constructed languages made to facilitate communication between speakers of a certain group of closely related languages They belong to the international auxiliary languages but unlike languages like Esperanto and Volap k they are not intended to serve for the whole world but merely for a limited linguistic or geographic area where they take advantage of the fact that the people of this zone understand these languages without having to learn them in a difficult way Zonal languages include the ancient Sanskrit Old Church Slavonic and Lingua Franca Zonal design can be partially found also in modern languages such as contemporary Hebrew Indonesian and Swahili **Modality-aspect Interfaces** Werner Abraham,Elisabeth Leiss,2008 The main topics pursued in this volume are based on empirical insights derived from Germanic logical and typological dispositions about aspect modality links These are probed in a variety of non related languages The logically establishable links are the following Modal verbs are aspect sensitive in the selection of their infinitival complements embedded infinitival perfectivity implies root modal reading whereas embedded infinitival imperfectivity triggers epistemic readings However in marked contexts such as negated ones the aspectual affinities of modal verbs are neutralized or even subject to markedness inversion All of this suggests that languages that do not or only partially bestow upon full modal verb paradigms seek to express modal variations in terms of their aspect oppositions This typological tenet is investigated in a variety of languages from Indo European German Slavic Armenian African Asian Amerindian and Creoles Seeming deviations and idiosyncrasies in the interaction between aspect and modality turn out to be highly rule based *Library of Congress Subject Headings: F-O* Library of Congress.
