Ceramics and Change in the Early Bronze Age of the Southern Levant Graham Philip, Douglas Baird, 2000-12-01 This book sets out the primary issues and current debates in the use of ceramics to reconstruct and explain cultural economic and social processes in the Early Bronze age By bringing together research on pottery from various parts of the southern Levant it allows direct comparison of contemporary material from different regions Alongside these empirical studies are discussions of general ceramic issues so that the book highlights the potential of pottery as an investigative tool and indicates fruitful directions for future research within the traditionally conservative field of Levantine archaeology A Fragmented History Gijs Willem Tol, 2012 This dissertation presents four methodological case studies that elaborate on the results of two field survey projects the Astura and Nettuno surveys that were carried out by the Groningen Institute of Archaeology GIA The case studies aim at investigating biasing factors that limit the analytical and comparative value of data from archaeological survey in general using these two projects as a suitable testing ground Both surveys carried out between 2003 and 2005 fell within the ambit of the Pontine Region Project PRP a long term research program aimed at the diachronic archaeological investigation of the various landscape units forming this region They covered two contiguous areas situated on the Tyrrhenian seaboard approximately 60 kilometres south of Rome The study area comprises the communal area of the modern town of Nettuno as well as the lower valleys of the Astura and Moscarello rivers see fig 0 1 2 As such it incorporates parts of the hinterland of the ancient towns of Antium and Satricum In chronological terms this dissertation considers a time span of 1300 years from the 6th century BC to the 7th century AD **Subject Guide to Books in Print**, 1991 **The British National Bibliography** Arthur James Wells, 2000 *The Next Whole Earth Catalog* Stewart Brand, 1980 **Journal of**
