*The Smell of Risk* Hsuan L. Hsu, 2020-12-15 A timely exploration of how odor seeps into structural inequality Our sense of smell is a uniquely visceral and personal form of experience As Hsuan L. Hsu points out smell has long been spurned by Western aesthetics as a lesser sense for its qualities of subjectivity volatility and materiality But it is these very qualities that make olfaction a vital tool for sensing and staging environmental risk and inequality Unlike the other senses smell extends across space and reaches into our bodies Hsu traces how writers artists and activists have deployed these embodied biochemical qualities of smell in their efforts to critique and reshape modernity's olfactory disparities The Smell of Risk outlines the many ways that our differentiated atmospheres unevenly distribute environmental risk Reading everything from nineteenth century detective fiction and naturalist novels to contemporary performance art and memoir Hsu takes up modernity's differentiated atmospheres as a subject worth sniffing

out From the industrial revolution to current day environmental crises Hsu uses ecocriticism geography and critical race studies to for example explore Latinx communities exposed to freeway exhaust and pesticides Asian diasporic artists response to racialized discourse about Asiatic odors and the devastation settler colonialism has reaped on Indigenous smellscapes In each instance Hsu demonstrates the violence that air maintenance control and conditioning enacts on the poor and the marginalized From nineteenth century miasma theory theory to the synthetic chemicals that pervade twenty first century air Hsu takes smell at face value to offer an evocative retelling of urbanization public health and environmental violence
