**C. P. Snow and the Struggle of Modernity** John de la Mothe, 2013-09-06 The condition of modernity springs from that tension between science and the humanities that had its roots in the Enlightenment but reached its full flowering with the rise of twentieth century technology It manifests itself most notably in the crisis of individuality that is generated by the nexus of science literature and politics one that challenges each of us to find a way of balancing our personal identities between our public and private selves in an otherwise estranging world This challenge which can only be expressed as the struggle of modernity perhaps finds no better expression than in C P Snow In his career as novelist scientist and civil servant C P Snow 1905 1980 attempted to bridge the disparate worlds of modern science and the humanities While Snow is often regarded as a late Victorian liberal who has little to say about the modernist period in which he lived and wrote de la Mothe challenges this judgment reassessing Snow s place in twentieth century thought He argues that Snow s life and writings most notably his Strangers and Brothers sequence of novels and his provocative thesis in The Two Cultures and the Scientific Revolution reflect a persistent struggle with the nature of modernity They manifest Snow s belief that science and technology were at the center of modern life

T. Dent,2020-03-16 In Above the Snow Line Mountaineering Sketches Between 1870 and 1880 C T Dent crafts a compelling collection of personal narratives that encapsulate the exhilarating yet perilous experiences of late 19th century mountaineers Written in a meticulous yet vivid prose style Dent s work not only captures the physical challenges of high altitude adventures but also delves into the aesthetic and philosophical dimensions of nature during a time of burgeoning exploration The sketches reflect
