Dolling,Arthur F. Gianelli,Glenn N. Statile,2017-09-25 The development of physical theory is one of our greatest intellectual achievements Its products the currently prevailing theories of physics astronomy and cosmology have proved themselves to possess intrinsic beauty and to have enormous explanatory and predictive power This anthology of primary readings chronicles the birth and maturation of five such theories the heliocentric theory the electromagnetic field theory special and general relativity quantum theory and the big bang theory in the words of the scientists who brought them to life It is the first historical account that captures the rich substance of these theories each of which represents a fascinating story of the interplay of evidence and insight and of dialogue among great minds Readers sit in with Copernicus Kepler and Galileo as they overturn the geocentric universe observe the genius of Faraday and Maxwell as they discover the electromagnetic field look over Einstein s shoulder as he works out the details of relativity listen in as Einstein and Bohr argue for the soul of quantum mechanics in the Completeness Debate and watch as Hubble and others reveal the history of the universe The editors approach highlights the moments of discovery that rise from scientific creativity and the presentation humanizes the scientific process revealing the extent to which great scientists were the first to consider the philosophical implications of their work But most significantly the editors offer this as their central thesis although each was ushered in by a revolution and each contains counterintuitive elements that delayed its acceptance these five theories exhibit a continuous rational development that has led them to a permanent place in the worldview of science Accessible to the general reader yet sufficiently substantive that working scientists will find value in it *The Tests of Time* offers an intimate look into how physical theory has been developed by the brilliant people who have developed it **The Handy Astronomy**

Language and the Joint Creation of Knowledge Neil Mercer,2019-04-25 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Language and the Joint Creation of Knowledge draws on the most prominent writing of Neil Mercer

covering his ground breaking and critically acclaimed work on the role of talk in education and on the relationship between spoken language and cognition The text explores key themes relating theoretical ideas to research evidence and to practical educational situations that improve children s lives Offering students and researchers a clear accessible and up to date account of a sociocultural perspective on the relationship between spoken language and cognition it explains one of the key themes in Neil Mercer s work that humans have uniquely evolved the capacity to think together or interthink Offering a crucial insight into the work of Neil Mercer this selection showcases why his approach has become the dominant paradigm in educational research and why it is increasingly influential in the psychology of teaching and learning This unique collection of published articles and chapters which represent the key themes and range of his research over the last 40 years will be of interest to all followers of his work and any reader interested in the role of language in education

The Tribune Almanac and Political Register for ... ,1911 English Mechanic and World of Science ,1887 *English Mechanics and the World of Science* ,1887 English Mechanic and Mirror of Science ,1870 **English Mechanic and Mirror of Science and Art** ,1887 *All About Time Gr. 4-6* Jane Briehl,1989 Eid Mubarak!: Islamic Celebration Around the World Susan Douglass,1995-01-01

This supplementary unit describes the two Islamic celebrations their background and major features of their observance It shows what when why and how Muslims celebrate on these two occasions and gives a sense of their inherent values The unit is also a case study of the unity and diversity of Muslims across the globe an enjoyable introduction to some customs in selected countries where Muslims live and their geography Countries were selected to include both majority and minority Muslim populations to present a range of countries across the globe and to represent a variety of the many ethnic groups and geographic features that make up the Muslim world community No attempt has been made to comprehensively cover all countries cultures or customs as this is far beyond the scope of a unit for the primary grades By selecting certain countries others were necessarily excluded although they might have served equally well To rectify this unfortunate shortcoming activities have been suggested that can enhance coverage to include all the nationalities represented in an individual teacher s classroom At the same time such a project increases student participation All of the customs related here have either been witnessed by the author in various countries or they were related personally by Muslims from those countries who also assisted with the illustrations and diagrams for each custom Finally no attempt has been made to cover all of the customs of the country selected rather they were selected for variety attractiveness to the target age group and for their relevance to and illustration of certain social studies concepts which are brought out in the teaching suggestions In terms of the overall objectives of a social studies curriculum for first grade the teacher will find that many skills and concepts from the first grade year are introduced or reviewed in this unit It is recommended that the unit be placed near or between the two holidays if these fall during the school year calendar Alternatively the unit can serve as an addition to or substitute for standard textbook units on holidays around the world and offers an interesting contrast and

complement to such units In reading and skill level it corresponds roughly to the second half of the first grade year where such holiday units are often placed It's about Time Jane Briehl, 1989 **It's About Time Gr. 2-4** ,
