White,2020-03-16 Throughout its history the Soviet Union was one of the most closed places in the world to missionary work As perestroika came in the late 1980s and the Soviet Union fell in 1991 a spiritual vacuum formed as massive numbers of people became interested in Christianity An unprecedented freedom allowed evangelicals to engage in missionary work Much has been written about foreign evangelical missionary work during this period but virtually nothing has been written about nationals doing ministry This book examines the remarkable surge in Ukrainian evangelical missionary work from 1989

to 1999 Both Baptists and Pentecostals engaged in a wave of missions flowing from Ukraine to the end of the earth Siberia What were these pioneering missionaries like What motivated them What enabled them to do what had been forbidden for so long What legacy did they leave for us today What can we learn from their example for future missions This book also looks at how a surge in missions takes place analyzing the factors behind the Ukrainian evangelical missionary surge by looking at different models for change Here we consider what steps can we take to help bring about new missionary surges

generally as idea desired ideal and practice A major issue for Russia is whether the modernization of Russia might not prosper better by Russia focusing directly on modernization and not worrying too much about democracy This book explores a wide range of aspects of this important question It discusses how the debate is conducted in Russia outlines how Russians contrast their own experiences unfavourably with the experience of China where reform and modernization have been pursued with great success with no concern for democracy and concludes by assessing how the debate in Russia is likely to be resolved

Green Activism in Post-Socialist Europe and the Former Soviet Union Adam Fagan, JoAnn Carmin, 2014-06-11 Green activism played a critical role in the downfall of Soviet style communism in Eastern Europe at the end of the 1980s After the revolutions environmentalists were expected to exert influence within the new democracies and to form the bedrock of the new civil societies that were predicted to flourish across the region the prospect of EU membership provided activist networks with even greater optimism about their political opportunities Two decades later what has been the impact of political and economic liberalisation on environmental campaigners and policy advocates Has access to elites increased with democratisation and Europeanization To what extent does the realm of environmental politics within individual states and across the region continue to represent an optic on change and continuity Through country case studies and comparative analysis of national movements this edited volume addresses each of these questions and provides a different perspective of green politics in the region This book was previously published as a special issue of Environmental Politics
