Why Not Capitalism? Jason Brennan, 2014-05-13 Most people believe capitalism is a compromise with selfish human nature As Adam Smith put it It is not from the benevolence of the butcher the brewer or the baker that we expect our dinner but from their regard to their own interest Capitalism works better than socialism according to this thinking only because we are not kind and generous enough to make socialism work If we were saints we would be socialists In *Why Not Capitalism* Jason Brennan attacks this widely held belief arguing that capitalism would remain the best system even if we were morally perfect Even then private property and free markets would be the best way to realize mutual cooperation social justice harmony and prosperity Socialists seek to capture the moral high ground by showing that ideal socialism is morally superior to realistic capitalism But Brennan responds ideal capitalism is superior to ideal socialism and so capitalism beats socialism at every level Clearly engagingly and at times provocatively written *Why Not Capitalism* will cause readers of all political persuasions to re evaluate where they stand vis vis economic priorities and systems as they exist now and as they might be improved in the future In this expanded second edition Brennan responds to his critics throughout the book and provides two new final chapters One argues against egalitarianism in a capitalist utopia because egalitarianism frequently misdiagnoses the problems for example the problem with poverty isn't that poor people have less but that they don't have enough The other new chapter shows that we don't need to be angels in an anarchic utopia but merely decent people who are willing to adhere to four undemanding moral principles

Why Not Capitalism? Jason F. Brennan, 2014-06-05 Most economists believe capitalism is a compromise with selfish human nature As Adam Smith put it It is not from the benevolence of the butcher the brewer or the baker that we expect our dinner but from their regard to their own interest Capitalism works better than socialism according to this thinking only because we are not kind and generous enough to make socialism work If we were saints we would be socialists In *Why Not Capitalism* Jason Brennan attacks this widely held belief arguing that capitalism would remain the best system even if we were morally perfect Even in an ideal world private property and free markets would be the best way to promote mutual cooperation social justice harmony and prosperity Socialists seek to capture the moral high ground by showing that ideal socialism is morally superior to realistic capitalism But Brennan responds ideal capitalism is superior to ideal socialism and so capitalism beats socialism at every level Clearly engagingly and at times provocatively written *Why Not Capitalism* will cause readers of all political persuasions to re evaluate where they stand vis vis economic priorities and systems as they exist now and as they might be improved in the future

The Capitalism Argument C. Paul Smith, 2019-10 Many Americans today do not understand the genius of capitalism They never learned at school how the capitalism free enterprise system has been the catalyst and foundation that has made America the most prosperous nation in the history of the world Failure to understand how capitalism is a key ingredient of our creative ingenious productive and prosperous economy puts Americans and their elected officials at risk to mishandle the many

political issues that affect our economy This book is written to help cure this lack of understanding The right of the individual to own and control property is not a right that is mentioned in the Constitution But it is the most fundamental of all aspects of liberty and freedom Without the right to own and control property there is no liberty No nation in the history of the world has achieved the widespread prosperity for more people than has America And it is the freedom of capitalism that has made this happen The freedom and right to control property is what gives individuals the incentive and opportunity to create to make to produce and to reap profits and rewards Capitalism is the engine of economic prosperity Socialism deprives itself of the diversity and creativity and personal incentives that are the foundation of prosperity in the free enterprise system Capitalism is not inherently bad any more than freedom is bad Just as freedom allows for people to make choices so does capitalism allow for both good choices and bad ones For the environmentalists socialism is the way to fix climate change for them when the government controls everything the government can make people do the things that will stop climate change Socialism is just like the quest for economic security by playing the lottery Socialists ask what your country can do for you Socialists insist that everyone is entitled to the wealth possessed by others They insist that people have the right to free stuff from the government food housing health care education a living wage vacation and retirement Any time a government takes away property from those who create it through their creativity incentive hard work marketing skills and management abilities this stifles and kills the liberties and incentives that create wealth Socialism kills the very intangibles that are the foundation of prosperity Socialism is a fraud It promises equality and prosperity for all at the expense of the wealthy This equality of benefits approach is touted as the new standard of morality which will lead to prosperity and freedom for all But it is a lie It may lead to some short term equality of property holdings but it invariably leads to a disintegration of the economy at the same time bringing a loss of freedom

Why Not Capitalism Leo Panitch, Ellen Meiksins Wood, 1995-01-01 [Why Not Socialism?](#) Gerald A. Cohen, 2009-08-24 A compelling case for why it's time for socialism Is socialism desirable Is it even possible In this concise book one of the world's leading political philosophers presents with clarity and wit a compelling moral case for socialism and argues that the obstacles in its way are exaggerated There are times G A Cohen notes when we all behave like socialists On a camping trip for example campers wouldn't dream of charging each other to use a soccer ball or for fish that they happened to catch Campers do not give merely to get but relate to each other in a spirit of equality and community Would such socialist norms be desirable across society as a whole Why not Whole societies may differ from camping trips but it is still attractive when people treat each other with the equal regard that such trips exhibit But however desirable it may be many claim that socialism is impossible Cohen writes that the biggest obstacle to socialism isn't as often argued intractable human selfishness it's rather the lack of obvious means to harness the human generosity that is there Lacking those means we rely on the market But there are many ways of confining the sway of the market there are desirable changes that can move us toward a socialist society in which to quote Albert Einstein humanity has overcome and advanced

Eco-Socialism or Eco-Capitalism? Saral Sarkar,1999-05-01 This major synoptic work explores some of the most important questions facing humanity in the coming generations It is remarkable for its author s holistic treatment of the environment and social justice as inescapably related questions his refusal to analyze the industrialized and developing countries as though they are so different that any understanding of the one can ignore the other and his integrity in exploring difficult and controversial questions from a stance that always addresses the evidence even if that leads to conclusions that are not currently fashionable Saral Sarkar argues that the USSR bumped up against environmentally defined and resource related limits to growth at a relatively early stage But this does not mean that a free market globalized capitalist economy will indefinitely escape a similar fate Nor will a modified eco capitalism as promoted by some sections of the Western environmental movement provide a sufficiently grounded solution to the twin problems of environmental destruction and social injustice The author looks therefore to a fundamentally different future one in which our very notion of progress is differently conceived **Why Capitalism and Socialism Failed** Arthur Raymond Cannon,1994 **Greed Is Good - So Is Socialism** Wendell H. Williams,2014-06-18

This book should be very popular because recently Wikipedia said that the two most looked up words in the English language were socialism and capitalism There is much confusion about exactly what socialism means and the more one looks into it the more it becomes apparent that the meaning of socialism rests to some degree in the eye of the beholder Most Americans fear socialism more than the plague But that is changing Americans know that something is very wrong with the kind of capitalism we have been practicing They know that the rich are getting richer and the poor poorer at an astonishing rate Socialism used to be a dirty word but now more and more capitalism is being seen that way People are beginning to wonder why we worship at the altar of capitalism to the point that we just accept recessions and depressions as though they are a necessary by product of capitalism The author does not buy that argument The book explains in simple English how it is possible to eradicate recessions A PhD in economics is not necessary to understand the common sense nature of the points made Some years back a man named Harry once said If you took all of the economists and laid them end to end to tell you which way to go they would look like the spokes of a wheel His last name was Truman The book makes a strong case for how certain aspects of socialism can be combined with capitalism to make a better economic system Pure socialism doesn t work very well And laissez faire capitalism doesn t work very well either Laissez faire capitalism should be as dead as communism Karl Marx and Fidel Castro did not understand the beneficial power of regulated greed And Herbert Hoover and George W Bush did not understand the destructive power of unregulated greed Pure socialism and capitalism are polar opposite concepts But to use a trite example lemon juice and sugar are also polar opposites However if they are unified just right they make a d **Embrace Capitalism** Gary Welch,Mark Welch,Embrace Staff,2017-01-29 Capitalism is not just an economic system it is a social political and economic system where the social and

The Alternative to Capitalism Adam Buick,John Crump,2013-03-10 Capitalism is an exchange economy in which most wealth from ordinary consumer goods to vast industrial plants and other producer goods takes the form of commodities or items of wealth that have been produced with a view to sale on a market Although states have intervened in capitalism ever since it came into existence in so far as the aim was merely to interfere with the operation of world market forces their intervention was only at the level of the division not the production of surplus value However over the past 100 or so years there has been a definite trend in capitalism for states to go beyond merely trying to distort the world market and to involve themselves in the actual production of wealth by establishing and operating state enterprises If state capitalism is not socialism what is In other words if state ownership and management of production does not amount to the abolition of capitalism but only to a change in the institutional framework within which it operates what would be the essential features of a society in which capitalism had been abolished
