

Indigenous people and their lived environment

- The colonial perception of indigenous lands as **terra nullius** (empty land/nobody's land)
 - the indigenous 'natural environment' as **socio-cultural landscapes** derived from long-term interactions between indigenous communities and their lived environment
 - Diversity in indigenous environments = not a result of population scarcity but rather of **sophisticated indigenous management practices** (see Murombedzi 2003)
- The human–environment interface more pronounced among indigenous peoples who have direct reliance on the lived environment for resources for their livelihood sustenance – **continuity of the lived environment beyond the home into the natural environment** (unity of humanity and nature)
- Environmental constraints (colonially imposed restrictions and natural) are central to the daily livelihoods of indigenous peoples

Social And Technological Management In Dry Lands Past And Present Indigenous And Imposed:

Socialtechnological Man Nancie L. Gonzalez,2019-07-16 Recent international attention has focused on desertification and its concomitants especially the diminution of flora and fauna in arid and semiarid lands and the resulting reduction in the economic value of those lands Natural factors such as drought and wind erosion as well as various technological practices have been blamed for the present situation in many countries Most observers agree that human beings have been both perpetrators and victims of desertification Anthropologists have long been interested in documenting how different societies have affected and been affected by their environments The papers in this volume present case studies of societies ranging from ancient Peru to contemporary Israel along with several topically oriented works All are designed to illustrate how various societies whether by water management or by the exploitation of plants and animals have attempted to achieve ecological balance Social organization and ideology as well as technology are discussed as important variables affecting the ways in which populations adapt to or cope with desertification *The Future of Drylands* Cathy Lee,Thomas Schaaf,2008-10-29 Drylands have been cradles to some of the world's greatest civilizations and contemporary dryland communities feature rich and unique cultures Dryland ecosystems support a surprising amount of biodiversity Desertification however is a significant land degradation problem in the arid semi arid and dry sub humid regions of the world Deterioration of soil and plant cover has adversely affected 70% of the world's drylands as a result of extended droughts as well as mismanagement of range and cultivated lands The situation is likely to worsen with high population growth rates and accompanying land use conflicts The contributions to *The Future of Drylands* an international scientific conference held under the leadership of UNESCO address these issues and offer practical solutions for combating desertification along with conserving and sustainably managing dryland ecosystems Major themes include the conservation of dryland biological and cultural diversity and the human dryland interface This volume documents how our improved understanding of drylands provides insight into the health and future prospects of these precious ecosystems that should help ensure that dryland communities enjoy a sustainable future **Social and Technological Management in Dry Lands** N. L. GONZALEZ ((Ed.)),1978 **Natural Resources And Development In Arid Regions** Enrique Campos-Lopez,2019-03-08 In this book the authors integrate various perspectives on the evaluation of natural resources in arid and semiarid zones analyze development options and discuss systems analysis tools that could be important for the management of technology **The Great New Wilderness Debate** J. Baird Callicott,Michael P. Nelson,1998 *The Great New Wilderness Debate* is an expansive wide ranging collection that addresses the pivotal environmental issues of the modern era This eclectic volume on the varied constructions of wilderness reveals the recent controversies that surround those conceptions and the gulf between those who argue for wilderness preservation and those who argue for wise use J Baird Callicott and Michael P Nelson have selected thirty nine essays that provide historical context range broadly across the issues and set forth the positions of the debate

Beginning with such well known authors as Ralph Waldo Emerson Henry David Thoreau John Muir and Aldo Leopold the collection moves forward to the contemporary debate and presents seminal works by a number of the most distinguished scholars in environmental history and environmental philosophy The Great New Wilderness Debate also includes essays by conservation biologists cultural geographers environmental activists and contemporary writers on the environment Water Resources and Agricultural Development in the Tropics Christopher J. Barrow, 2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people **Ancient Households on the North Coast of Peru** Ilana Johnson, David Pacifico, Robyn E. Cutright, 2021-02-01 Ancient Households on the North Coast of Peru provides insight into the organization of complex urban and state level society in the region from a household perspective using observations from diverse North Coast households to generate new understandings of broader social processes in and beyond Andean prehistory Many volumes on this region are limited to one time period or civilization often the Moche While Ancient Households on the North Coast of Peru does examine the Moche it offers a wider thematic approach to a broader swath of prehistory Chapters on various time periods use a comparable scale of analysis to examine long term continuity and change and draw on a large corpus of prior research on states rulership and cosmology to offer new insight into the intersection of household community and state Contributors address social reproduction construction and reinforcement of gender identities and social hierarchy household permanence and resilience and expression of identity through cuisine This volume challenges common concepts of the household in archaeology by demonstrating the complexity and heterogeneity of household level dynamics as they intersect with institutions at broader social scales and takes a comparative perspective on daily life within one region of the Andes It will be of interest to both students and scholars of South American archaeology and household archaeology Contributors Brian R Billman David Chicoine Guy S Duke Hugo Ikehara Giles Spence Morrow Jessica Ortiz Edward Swenson Kari A Zabler *Food Plants of the Sonoran Desert* Wendy C. Hodgson, 2022-02-08 The seemingly inhospitable Sonoran Desert has provided sustenance to indigenous peoples for centuries Although it is to all appearances a land bereft of useful plants fully one fifth of the desert's flora are edible This volume presents information on nearly 540 edible plants used by people of more than fifty traditional cultures of the Sonoran Desert and peripheral areas Drawing on thirty years of research Wendy Hodgson has synthesized the widely scattered literature and added her own experiences to create an exhaustive catalog of desert plants and their many and varied uses Food Plants of the Sonoran Desert includes not only plants such as gourds and legumes but also unexpected food sources such as palms lilies and cattails all of which provided nutrition to

desert peoples Each species entry lists recorded names and describes indigenous uses which often include nonfood therapeutic and commodity applications The agave for example is cited for its use as food and for alcoholic and nonalcoholic beverages syrup fiber cordage clothing sandals nets blankets lances fire hearths musical instruments hedgerows soap and medicine and for ceremonial purposes The agave entry includes information on harvesting roasting and consumption and on distinguishing between edible and inedible varieties No other source provides such a vast amount of information on traditional plant uses for this region Written to be easily accessible to general readers the book is an invaluable compendium for anyone interested in the desert s hidden bounty **Andean Civilization** Joyce Marcus, Patrick Ryan Williams, 2009-12-31 This volume brings together exciting new field data by more than two dozen Andean scholars who came together to honor their friend colleague and mentor These new studies cover the enormous temporal span of Moseley s own work from the Preceramic era to the Tiwanaku and Moche states to the Inka empire And like Moseley s own studies from Maritime Foundations of Andean Civilization to Chan Chan The Desert City to Cerro Baul s brewery these new studies involve settlements from all over the Andes from the far northern highlands to the far southern coast An invaluable addition to any Andeanist s library the papers in this book demonstrate the enormous breadth and influence of Moseley s work and the vibrant range of exciting new work by his former students and collaborators in fieldwork **Arid Lands** Charles Hutchinson, 2019-04-23 The international conference Arid Lands Today and Tomorrow drew more than 400 participants from over 35 countries to Tucson Arizona for one week in October of 1985 The diversity of presenters disciplines and subject matters addressed contributed to an interesting and informative conference The papers presented in this volume represent the efforts of scientists and other individuals who through their various disciplines are addressing the problems of and opportunities presented by the arid lands of the world A committee of five scientists reviewed for substance relevance and their contribution to the conference the 284 abstracts that were submitted They selected 146 for presentation at the conference and of those papers presented 128 were received for inclusion in the proceedings *Peruvian Prehistory* Richard W. Keatinge, 1988-03-10 Peruvian Prehistory offers an authoritative survey of the cultural evolution of Peru from the appearance of the first inhabitants around 10 000 BC to the arrival of the Spanish in 1534 The book is divided chronologically into three main parts which examine in turn the highland and lowland zones in the Preceramic and Initial periods the development of complex society at Chavin Tiwanaku and Huari and in the Moche and Nazca cultures and the culmination of this process the Pan Andean empire of the Incas and the way this can be studied through a combination of archaeology and ethnohistoric research A fourth concluding section deals with the often neglected tropical forest region of Peru and its formative influence on the evolution of Andean culture The first collective assessment of Peruvian archaeology for a generation this volume traces the processes of political social and economic change in Andean civilisation in a manner that will attract many with no specialist interest in Peru *Environment* Jules Pretty, 2006-06-23 This four volume set explores

the locations where the environment matters most such as where people are poor where environments are under threat such as on frontiers where there are few natural resources remaining and where industrialization is rampant It will also explore these concerns at different system levels from local community to regional national and global It will also explore costs of damage to the very resources on which economies rely and the values of environmental goods and services and the controversies surrounding such valuations It is organized around environment people interactions livelihoods poverty income economic growth environment environment interactions do people matter and people people interactions collective action challenges institutions

Mummies and Mortuary Monuments William H. Isbell, 2010-07-05 Since prehistoric times Andean societies have been organized around the ayllu a grouping of real or ceremonial kinspeople who share labor resources and ritual obligations Many Andean scholars believe that the ayllu is as ancient as Andean culture itself possibly dating back as far as 6000 B C and that it arose to alleviate the hardships of farming in the mountainous Andean environment In this boldly revisionist book however William Isbell persuasively argues that the ayllu developed during the latter half of the Early Intermediate Period around A D 200 as a means of resistance to the process of state formation Drawing on archaeological evidence as well as records of Inca life taken from the chroniclers Isbell asserts that prehistoric ayllus were organized around the veneration of deceased ancestors whose mummified bodies were housed in open sepulchers or chullpas where they could be visited by descendants seeking approval and favors By charting the temporal and spatial distribution of chullpa ruins Isbell offers a convincing new explanation of where when and why the ayllu developed

Adapting to Drought Michael Mortimore, 1989-03-30 This book embodies the results of thirteen years of research in drought prone rural areas in the semi arid zone of northern Nigeria It describes the patterns of adaptive behaviour observed among Hausa Ful be and Manga communities in response to recurrent drought in the 1970s and 1980s The question of desertification is explored in an area where the visible evidence of moving sand dunes is dramatic blame are examined in relation to the field evidence A critique is offered of deterministic theories and authoritarian solutions Professor Mortimore demonstrates a parallel between the observable resilience of semi arid ecosystems and the adaptive strategies of the human communities that inhabit them and suggests policy directions for strengthening that resilience **Baboquivari Mountain**

Plants Daniel F. Austin, 2022-05-03 The Baboquivari Mountains long considered to be a sacred space by the Tohono O odham people who are native to the area are the westernmost of the so called Sky Islands The mountains form the border between the floristic regions of Chihuahua and Sonora This encyclopedic work describes the flora of this unique area in detail It includes descriptions identifications ecology and extensive etymologies of plant names in European and indigenous languages Daniel Austin also describes pollination biology and seed dispersal and explains how plants in the area have been used by humans beginning with Native Americans The term sky island was first used by Weldon Heald in 1967 to describe mountain ranges that are separated from each other by valleys of grassland or desert The valleys create barriers to the spread of plant species in a way that is similar to the separation of islands in an ocean The 70 000 square mile Sky Islands region of southeastern Arizona southwestern New Mexico and northwestern Mexico is of particular interest to botanists because of its striking diversity of plant species and habitats With more than 3 000 species of plants the region offers a surprising range of tropical and temperate zones Although others have written about the region this is the first book to focus exclusively on the plant life of the Baboquivari Mountains The book offers an introduction to the history of the region along with a discussion of human influences and includes a useful appendix that lists all of the plants known to be growing in the Baboquivari Mountain chain **Land Tenure, Agricultural Economics and Rural Development** University of

Wisconsin--Madison. Land Tenure Center.
