Social Competence In Developmental Perspective:

Social Competence in Developmental Perspective B.H. Schneider, Grazia Attili, Jacqueline Nadel, Roger P. Weissberg, 2012-12-06 What determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized If we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses Among the accidents that mold the careers of researchers is geographic location The culture in which a research program emerges helps determine both its very subject and its method The primary purpose of this book is to assist those interested in the scientific study of children's social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field Most of these ideas were presented and exchanged at an Advanced Study Institute entitled Social Competence in Developmental Perspective held in Savoie France in July 1988 This Institute was attended by scholars from France England Northern Ireland Germany Italy Norway Spain Portugal Netherlands Canada the United States and Brazil Those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes In order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described *Children's Social Competence in Context* Barry H. Schneider, 1993 This book provides a comprehensive and critical overview of current knowledge about family school and cultural influences on children's relations with others and the emergence of social competence Ongoing research in these areas is considered in the light of recent advances in the field of child development especially the enhanced appreciation of the ways these context factors operate in conjunction with characteristics of the individual and with the process of development This book will be of interest to students and researchers in psychology human development family relations special education and sociology **Practitioner's Guide to Empirically Based Measures of Social Skills** Douglas W. Developmental Psychology E. Mark Cummings, Anita L. Greene, Katherine H. Karraker, 2014-01-02 Although there has been a significant increase in studies of stress and coping processes in recent years researchers have often approached these topics from rather narrow and constrained perspectives Furthermore little communication has occurred across disciplines and research directions resulting in the emergence of several relatively isolated literatures An outgrowth of the Eleventh Biennial West Virginia University Conference on Life Span Development this volume emphasizes two major themes the importance of taking a life span approach to the study of stress and coping and the development of new and more complete conceptual models of stress and coping processes The first to approach these subjects from a life span perspective this book includes papers by distinguished researchers from each of the major periods of the life span and brings together the cognitive and socioemotional traditions in the study of dealing with pressures The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives The Wiley-Blackwell Handbook of Childhood Social Development Peter K.
