Social Contract A Personal Inquiry Into:

The Social Contract Robert Ardrey, 1970 This title denies that men are created equal Jacket Dr. Calhoun's Mousery
Lee Alan Dugatkin, 2024-10-03 A bizarre and compelling biography of a scientist and his work using rodent cities to question the potential catastrophes of human overpopulation It was the strangest of experiments What began as a utopian environment where mice had sumptuous accommodations had all the food and water they could want and were free from disease and predators turned into a mouse hell Science writer and animal behaviorist Lee Alan Dugatkin introduces readers to the peculiar work of rodent researcher John Bumpass Calhoun In this enthralling tale Dugatkin shows how an ecologist turned psychologist turned futurist became a science rock star embedded in the culture of the 1960s and 1970s As interest grew in his rodent cities Calhoun was courted by city planners and his work was reflected in everything from Tom Wolfe's hard hitting writing to the children's book *Mrs Frisby and the Rats of NIMH* He was invited to meetings with the Royal Society and the pope and taken seriously when he proposed a worldwide cybernetic brain a decade before others made the internet a reality Readers see how Calhoun's experiments rodent apartment complexes like Mouse Universe 25 led to his concept of behavioral sinks with real effects on public policy discussions Overpopulation in Calhoun's mouse and rat complexes led to the loss of sex drive the absence of maternal care and a class of automatons that included the beautiful ones who spent their time grooming themselves while shunning socialization Calhoun and those who followed his work saw the collapse of this mouse population as a harbinger of the ill effects of an overpopulated human world Drawing on previously unpublished archival research and interviews with Calhoun's family and former colleagues Dugatkin offers a riveting account of an intriguing scientific figure Considering Dr Calhoun's experiments he explores the changing nature of scientific research and delves into what the study of animal behavior can teach us about ourselves **On Human Nature** Jonathan H. Turner, 2020-11-24 In this book Jonathan H Turner combines sociology evolutionary biology cladistic analysis from biology and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present day great apes Selection pressures altered this inherited legacy for the ancestors of humans termed hominins for being bipedal and forced greater organization than extant great apes when the hominins moved into open country terrestrial habitats The effects of these selection pressures increased hominin ancestors emotional capacities through greater social and group orientation This shift in turn enabled further selection for a larger brain articulated speech and culture along the human line Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain speech and culture These complexes he shows can be understood as the cognitive complex the psychological complex the emotions complex the interaction complex and the community complex **Library Book Catalog** United States. Forrest,2014-08-09 We are at a crucial point in time a moment of transition as important as the emergence of Homo sapiens or the beginning of civilisation after the Neolithic Revolution Paradoxically the triumph of the West also called globalisation means the death of Europe and European man Our destiny hangs between two options either to complete the triumph of the egalitarian conception of the world which will bring about the end of history or to promote a historical regeneration Nietzsche prophesied that the Earth will eventually belong to either the last man or to the superman There are no other alternatives

Education for All Gajendra K. Verma,1989 Education For All was a report published in 1985 covering achievement and under achievement teacher training and mother tongue teaching of the ethnic minority groups In this volume a group of educationalists reflect on the report A History of American Thought 1860-2000 Daniel Wickberg,2023-09-07 This book is a comprehensive overview of the history of modern American thought and examines a wide range of modern thought and thinkers from 1860 when Charles Darwin s Origin of Species was published in the United States to the end of the twentieth century The focus of this volume is on the destabilizing effects of modern challenges to notions of fixed order and absolute truths and the contradictory consequences for philosophical political social and aesthetic thought The intellectual response to the unprecedented changes of this era produced visions of both liberation from the hierarchies of the past and new forms of control and constraint One of the central contradictions in modern thought was between biological and cultural ideas of social psychological and moral order This is the first work to provide an interpretive vision of the entire period under consideration Topics covered include evolutionary thought philosophical Pragmatism ideas of race and gender pluralism and cultural relativism Cold War Liberalism science and religion feminist thought evolutionary psychology and the late twentieth century Culture Wars Thinkers from William James and Charlotte Perkins Gilman through Judith Butler and Cornel West are analyzed as historical figures This volume is an ideal resource for a general audience as well as undergraduate and graduate students in the field of American intellectual history *TEXTBOOK OF ANIMAL BEHAVIOUR* FATIK BARAN

Noyes, 2018-09-05 Individuals sometimes derive sexual pleasure from submission to cruel discipline While that predilection was noted as early as the sixteenth century masochism was not codified as a concept until 1890 According to John K Noyes its invention reflected a crisis in the liberal understanding of subjectivity and sexuality which continues to inform discussions of masochism today In essence it remains a political concept Viennese physician Richard von Krafft Ebing coined the term masochism based on the work of Leopold von Sacher Masoch Noyes analyzes the social and political problems that inspired the concept suggesting for example that the triumphant expansion of European colonialism was in part animated by an ambivalence in masculine sexuality Noyes documents the evolution of the concept of masochism with scenes in literature from John Cleland s Fanny Hill through Sacher Masoch s Venus in Furs and Pauline Reage s Story of O Analysis of Freud s vastly influential rereading of masochism

precedes an exploration of the work of his successors including Wilhem Reich Theodor Reik Helene Deutsch and Karen Horney Noyes suggests that the thematics of feminine masochism emerged only gradually from an exclusively male concept
