Systems Psychodynamics David Lawlor,Mannie Sher,2023-06-16 In the second of this three volume series the authors expand on the theory and practice of systems psychodynamics which integrates psychoanalytic thinking open systems theory and complexity theory in its applications to consultancy work in organisations and wider social contexts Multidisciplinary and multitheoretical in nature the systems psychodynamics paradigm develops from the understanding that no single theory or approach explains the complex nature of organisational systems Replete with explanations of key theories practical guidance and exercises this book demonstrates how systems psychodynamics can be used by consultants to plan and put into action organisational changes in four main areas change planning and management action research and evaluation leadership and whole systems and professional development and next steps In light of systems psychodynamics rather than functioning as a leader of change processes the role of an organisational development consultant is one of providing containment

understanding and facilitation for others to take up their leadership roles responsibly in their change processes With a focus on practical application in real situations this book will be invaluable for psychoanalysts managers policymakers consultants and researchers in a wide range of professional and clinical settings **The Politics of the Textbook** Michael Apple,Linda Christian-Smith,2017-09-08 The Politics of the Textbook analyzes the factors that shape production distribution and reception of school texts through original essays which emphasize the double edged quality of textbooks Textbooks are viewed as systems of moral regulation in the struggle of powerful groups to build political and cultural accord They are also regarded as the site of popular resistance around disclosing the interest underlying schoolknowledge and incorporating alternative traditions **Thematic Teaching of Women's Rights Issues with Social Studies Trade Books** Jeremiah

Clabough,Natalie Keefer,2023-09-29 This edited volume presents a distinctive approach for exploring pedagogical frameworks methods and strategies for teaching thematically about women s rights using social studies trade books After an introductory chapter by Jeremiah Clabough that provides a compelling rationale for thematic teaching of women s rights issues and controversial topics Natalie Keefer and Tori Flint situate the remaining chapters within the context of theory and research on women s rights issues and include a discussion of implications and considerations for the role multiple literacies have in advancing women s rights in North America and beyond In subsequent chapters a diverse assemblage of respected scholars within the field of social studies education introduce important women who advanced women s human rights in the United States paired with a notable trade book about their life challenges and achievements Then chapter authors describe student centered pedagogies with inquiry based pedagogies aligned with the NCSS C3 Framework that teachers can

implement with upper elementary and middle school students to seamlessly integrate literacy and social studies for the purpose of thematically teaching about women's rights Studies in Religion and the Everyday Farhana Ibrahim, 2024

Studies in Religion and the Everyday is a collection of essays addressing the contours of religious beliefs and practices in the context of everyday life in India. Events and processes in contemporary India especially post the 1990s have contributed to distinct modes of articulating religious practices. This volume is an attempt to historicize and problematize the categorization of religion as a universally held and analytically distinct feature of human life and seeks to understand the conditions historical political discursive and processes of authorization under which a particular set of practices values and dispositions constitutes the religious at a specific point in time. By bringing together studies that draw from diverse methodological and epistemological approaches the book will serve as a useful introduction to religion in India for the general reader and as an indispensable resource for students and researchers. The volume presents fresh perspectives on existing fields of study such as the city capital minorities secularization and the state no longer seen as distinct from religion but actively co-produced with religion in the context of the theoretical rubric of the everyday thereby marking a departure from approaching the question of religion solely through the lens of identity and conflict Research in Education , 1973 Volcanic Reflections: a Bilingual Anthology of Contemporary Ecuadorian Poetry Ronald Haladyna, 2011-08-26

Volcanic Reflections: A Bilingual Anthology of Contemporary Ecuadorian Poetry is the third in a series of books that aspires to address a dearth of information in the English speaking world about South American poetry of the past thirty years. The nineteen outstanding poets included here represent a wide diversity of themes styles and perspectives in one of South America's smaller nations. All of them have published extensively have been recognized through literary awards and inclusion in national and international anthologies and continue writing and publishing today. For readers unfamiliar with Ecuador the Introduction provides a brief background of its geography history politics economy and society. This is followed by an ample selection of representative poems published previously in Spanish with translations in English on facing pages. The book concludes with a brief biographical sketch of each poet and an unprecedented bibliography of primary and secondary sources for those readers who might want to pursue further reading or research on any poet of interest.

Contemporary Uruguayan Poetry: A Bilingual Anthology and Exotic Territory A Bilingual Anthology of Contemporary Paraguayan Anthology are two companion volumes that offer similar exposure to poetry that deserves to be better known in the English speaking world **Urbanization and Its Impact in Contemporary China** Peilin Li, 2019-04-02

This book addresses a wide range of social issues in connection with urbanization which is providing new momentum for China's economic restructuring and social progress including the educational gap the middle class in urbanization consumption division of labor and social integration. All chapters are based on updated nationwide sampling survey data. Taken together they provide a lens for understanding various aspects of urbanization and its impacts on China's economy and society LOCKED IN Thirteen O'Clock Press, 2018-06-09

Performance Management at Universities Poul Erik Mouritzen, Niels Opstrup, 2019-07-01 Mouritzen and Opstrup's book is a most welcome addition to the subject of the management of academic performance It is certainly well worth reading and considering Bruno S Frey Permanent Visiting Professor at the University of Basel and Research Director CREMA Center for Research in Economics Management and the Arts Switzerland Performance Management at Universities could not possibly be more timely With universities and university faculty throughout the world being pressed to give more evidence and more precise indicators about their productivity this thoughtful contribution provides a much needed and unusually thoughtful analysis of the possibilities and pitfalls found in current approaches to university performance evaluation Given policy makers and politicians calls for evidence based management and evaluation let us hope that policy makers heed their own rhetoric and act on the evidence provided here The authors show that performance measures while sometimes beneficial are subject to gaming and manipulation and that more precision does not necessarily equate with better performance but rather altered performance This superb book should be read by anyone interested higher education evaluation as well as by those who are subjected to it Barry Bozeman Regents Professor Arizona Centennial Professor of Technology Policy and Public Management School of Public Affairs Arizona State University USA In Performance Management at Universities Mouritzen and Opstrup definitively answer the question What are the effects of national university performance based funding schemes that use bibliometric indicators As these schemes have proliferated the question has become urgent The authors marshal comprehensive data on the Danish university system to sift through the many predictions commonly made by academics newly subject to these systems to identify what actually happened to Danish research as the system took hold Diana Hicks Professor School of Public Policy Georgia Institute of Technology USA and first author on the Leiden Manifesto on research metrics This book gives an account of what can happen when performance management is introduced at universities How do scholars for better or worse respond to a system which counts the number of articles and books Many myths exist about scholars' reactions They cheat slice their production to the least publishable unit become more risk averse and will go for the low hanging fruits in short they develop a taste for publication at the cost of a taste of science Systematic knowledge about the consequences of such systems for the motivation behavior and productivity of university scholars is in short supply The book is a major contribution to remedy this situation
