acknowledging the historical and philosophical significance of the concept of identity Drawing on a global scholarship the Handbook has four parts Part 1 Frameworks presents the main theoretical and methodological perspectives in identities research Part 2 Formations covers the major formative forces for identities such as culture globalisation migratory patterns biology and so on Part 3 Categories reviews research on the core social categories which are central to identity such as ethnicity gender sexuality disability and social class and intersections between these Part 4 Sites and Context develops a series of case studies of crucial sites and contexts where identity is at stake such as social movements relationships and family life work places and environments and citizenship
