Social Construction Of Nature A Sociology Of Ecological Enlightenment:

The Social Construction of Nature Klaus Eder,1996-10-14 This is a unique and agenda setting interpretation of nature and ecology that will become the essential reference in any debate on environmental politics and sociology **The Social**

Construction of Nature Klaus Eder,1996 Annotation In this unique and agenda setting examination of the relation between nature and culture Klaus Eder demonstrates our ideas of nature are culturally determined and explains how the relation between modern industrial societies and nature is increasingly violent and destructive Through an analysis of symbolism ritual and taboo Eder questions the view of nature as an object Showing how nature is socially constructed he presents a critique of Marx and Durkheim while offering a radical reinterpretation of the relationship among society culture and nature Eder concludes with an examination of the symbolic order of society and of the role of religion in modern culture Using a culturalist interpretation he explains how environmentalism and the social construction of nature is a key index of social order and structure **Environmental Sociology Ed 2** John Hannigan,2006-04-18 This new edition of John Hannigan's

well known and respected text has been thoroughly revised to reflect recent conceptual and empirical advances in environmental sociology and will prove to be a valuable student resource *Nature: From nature to natures : contestation and reconstruction* David Inglis,John Bone,Rhoda Wilkie,2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents *What is a Disaster?* E.L. Quarantelli,2005-06-27 Are conflict

situations such as the ethnic clashes in Yugoslavia or Rwanda terrorist attacks and riots the same kind of social crises as those generated by natural and technological happenings such as earthquakes and chemical explosions In *What is a Disaster* social science disaster researchers from six different disciplines advance their views on what a disaster is Clashes in conceptions are highlighted through the book's unique juxtaposition of the authors separately advanced views A reaction paper to each set of views is presented by an experienced disaster researcher in turn the original authors provide a response to what has been said about their views *What is a Disaster* sets out the huge conceptual differences that exist concerning what a disaster is and presents important implications for both theory study and practice *Religion, Theology and the Human Sciences* Richard H. Roberts,2002 *Religion Theology and the Human Sciences* explores the religious consequences of the so called end of history and triumph of capitalism as they have impinged upon key institutions of social reproduction in

recent times The book explores the imposition of managerial modernity upon successive sectors of society and shows why many people today feel themselves to be oppressed by systems of management that seem to leave them no option but to conform Richard Roberts seeks to challenge and outflank such seamless oppressive modernity through reconfiguration of the religious and spiritual field *Parties, Governments and Elites* Philipp Harfst, Ina Kubbe, Thomas Poguntke, 2017-04-26 Parties governments and elites are at the core of the study of democracy The traditional view is that parties as collective actors play a paramount role in the democratic process However this classical perspective has been challenged by political actors observers of modern democracy as well as political scientists Modern political parties assume different roles contemporary leaders can more heavily influence politics governments face new constraints and new collective bodies continue to form propose new ways of participation and policy making and attract citizens and activists In the light of these observations the comparative study of democracy faces a number of important and still largely unsolved questions that the present volume will address **The Environmental Communication Yearbook** Stephen P. Depoe, 2014-04-08 First published in 2006 Routledge is an imprint of Taylor Francis an informa company *Revival: Food, Nature and Society* (2001) Michel Blanc, 2017-07-28 This title was first published in 2001 Focusing on the distinctive ways in which rural social economic and political life is experienced in developed societies in late modernity this striking volume draws on empirical material from a wide range of countries within and outside the EU It also incorporates comparative case studies from South Africa Australia and New Zealand Oil and National Identity in the Kurdistan Region of Iraq Alessandro Tinti, 2021-11-29 Examining the interplay between the oil economy and identity politics using the Kurdistan Region of Iraq as a case study this book tells the untold story of how extractivism in the Kurdish autonomous region is interwoven in a mosaic of territorial disputes simmering ethnic tensions dynastic rule party allegiances crony patronage and divergent visions about nature Since the ousting of Saddam Hussein the de facto borders of the Kurdistan Region of Iraq have repeatedly changed with energy interests playing a major role in such processes of territorialisation However relatively little research exists on the topic This book provides a timely empirical analysis of the intersections between extractive industries oil imaginaries and identity formation in one of the most coveted energy frontiers worldwide It shines a light on relations between the global production networks of petro capitalism and extractive localities Besides the strained federal relationship with the Iraqi central government the transformative effects the petroleum industry has had on Kurdish society are also explored in depth Moreover the book fills a gap in the literature on Kurdish Studies which has devoted scant attention to energy related issues in the re imagination of Kurdish self determination This book will be of great interest to students and scholars of the extractive industries energy studies conflict studies Middle Eastern politics and political ecology *A Future for Regional Australia* I. W. Gray, Geoffrey Lawrence, 2001-07-31 This book interprets the predicament faced by Australia's regional people from their own perspective and proposes a means by which they can act together to find a secure future under globalisation

It argues that neoliberalism in combination with its real world effects in economic policy are driving regional Australia further into social environmental and economic decay The book will be of great interest to all concerned about the future of regional Australia and will make a lively and relevant text for students studying the social sciences in the countryside or in the major cities Nature and Social Theory Adrian Franklin,2002 This book asks the questions can Man be separated from Nature Is it valid to seek to control Nature It argues that the firm modern boundaries between nature and culture have been breached and pulls together new strands of thinking about nature which suggest that humanity and nature have never been separate The argument is developed through a critical discussion of the Romantic ideal of pure nature unsullied by humanity and largely confined to fragile margins in need of protection and more recent discourses which identify nature with environment and cast man in the role of a polluter and destroyer *Anti-GenetiX* Derrick A. Purdue,2017-11-01 This title was first published in 2000 The development of genetically modified foods has given rise to much widespread and heated debate on the possible consequences both positive and negative of this new technology This book not only addresses the broad issues involved outlining the connections between gene patenting and biotechnology and their impact on international relations but also for the first time examines the social movement emerging against GM food Anti GenetiX traces this movement from its emergence and shows how and why it expanded from a small expert concern to the current huge political uproar It explores the contribution this movement makes to shaping global civil society and argues that such global social movements will become increasingly common in the global age **50 Years of Community Development Vol II** Norman Walzer,Rhonda Phillips,Robert Blair,2021-05-13 This 50th anniversary publication provides a comprehensive history of community development Beginning in 1970 with the advent of the Community Development Society and its journal shortly thereafter Community Development the editors have placed the chapters in major themed areas or issues pertinent to both research and practice of community development The evolution of community development as an area of scholarship and application and the subsequent founding of the discipline is vital to capture At the 50 year mark it is particularly relevant to revisit issues that reoccur throughout the last five decades and look at approaches to addressing them These include issues and themes around equity and inclusion collective impact leadership and policy development as well as resilience and sustainability Community change over time has much to teach us and this set will provide a foundation for fostering understanding of the history of community development and its focus on community change The chapters in this book were originally published in the journal Community Development **Cultural Politics and the Transatlantic Divide over GMOs** H. Stephan,2014-12-15 Alongside other factors cultural values and identities help to explain different regulatory frameworks for genetically modified organisms This book uses insights from environmental history and sociology to illuminate the cultural politics of regulation in the US and the EU with particular attention to public opinion and anti GMO activism **Rethinking Globalism** Manfred B. Steger,2004 What is the hottest American export since 9 11 The

contributors to this provocative volume contend that it is Western style globalism the dominant free market ideology that determines everything from most favored nation status to the declaration of war In this much needed post September 11 analysis an interdisciplinary team of authors shows how central concepts like globalization liberty free markets and free trade are increasingly being subordinated to and lumped together with the war on terrorism led by the U S and its allies The authors here hailing from all five continents contend that globalism is being adapted to particular social and political contexts in various parts of the world Nonetheless the impact of globalization with an ideological twist can be devastating as military operations and propaganda supplant transnational trade initiatives as the focal point of global exchange And ironically the post 9 11 framework contains a major ideological contradiction Social forces otherwise profiting from expanded global mobility and interchange must come to grips with necessary limitations on certain aspects of globalization This volume was handcrafted to outline the major lines of inquiry proposed for the new Globalization series edited by Manfred B Steger and Terrell Carver Writing in accessible engaging prose the contributors to this anchor volume consider themselves critical globalization theorists who seek to provide readers with a better understanding of how dominant beliefs about globalization fashion their realities and how these ideas can be changed to bring about more equitable social arrangements Books in the series will share the same perspective and goals

An Invitation to Environmental Sociology Michael Mayerfeld Bell, Loka L. Ashwood, Isaac Sohn Leslie, Laura Hanson Schlachter, 2020-09-23 An Invitation to Environmental Sociology invites students to delve into this rapidly changing field Written in a lively engaging style the authors cover a broad range of topics in environmental sociology with a personal passion rarely seen in sociology texts

The Politics of Unsustainability Ingolfur Bluhdorn, Ian Welsh, 2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics

Animals in the Sociologies of Westermarck and Durkheim Salla Tuomivaara, 2019-09-04 This book explores why animals at some point disappeared from the realm and scope of sociology

The role of sociology in the construction of a science of the human has been substantial building representations of the human sphere of life as unique Within the sociological tradition however animals have often been invisible even non existent Through in depth comparisons of the texts of prominent early sociologists Emile Durkheim and Edward Westermarck Tuomivaara shows that despite this exclusion representations of animals and human animal relations were far more varied in early works than in the later sociological cannon Addressing a significant gap in the interdisciplinary field of animal studies Tuomivaara presents a close reading of the historical treatment of animals in the works of Durkheim and Westermarck to determine how the human animal boundary was established in sociological theory The diverse forms in which animals and the animal appear in the works of early classical sociology are charted and explored alongside the sociological themes that bring animals into these texts Situated in contemporary theory from critical animal studies to posthumanism this important book lays the groundwork for a disciplinary shift away from this sharp human animal dualism
