Snow, 2010-07-29 Virtue as Social Intelligence An Empirically Grounded Theory takes on the claims of philosophical situationism the ethical theory that is skeptical about the possibility of human virtue Influenced by social psychological studies philosophical situationists argue that human personality is too fluid and fragmented to support a stable set of virtues They claim that virtue cannot be grounded in empirical psychology This book argues otherwise Drawing on the work of psychologists Walter Mischel and Yuichi Shoda Nancy E. Snow argues that the

social psychological experiments that philosophical situationists rely on look at the wrong kinds of situations to test for behavioral consistency Rather than looking at situations that are objectively similar researchers need to compare situations that have similar meanings for the subject When this is done subjects exhibit behavioral consistencies that warrant the attribution of enduring traits and virtues are a subset of these traits Virtue can therefore be empirically grounded and virtue ethics has nothing to fear from philosophical situationism

Emotional Intelligence and Social Intelligence in Terms of Leadership Behavior and Personal Effectiveness Among +2 Level Students Dr. Amarnath Reddy, 2021-11-30
Effective leadership is essential for an organization's success hence the ability to identify and define effective leadership is crucial. Technical expertise, superior performance and established experience are no longer only criterion of effective leadership. Today effective leaders are defined by inspiring and motivating others, promoting a positive work environment, understanding and managing emotions, building bonds, communications and influence and so forth. Emotional Intelligence (EI) has an emerging track record of being linked to leadership performance. Emotional intelligence connects a leader's cognitive abilities with their emotional state. The ability for leaders to recognize the impact of their own emotions on their decision making is paramount if a leader is to make sound decisions based on the best interests of the organization. A leader must be able to read emotions in his/her peers and employees in order to be as effective as possible. Stodgily originated this notion with linkages of leader personality and control over emotions to employee perception of leader effectiveness. Due to the complexity of organizational change and the role emotions play in changes such as global expansion, job eliminations, leadership changes as well as stressors of day to day responsibilities, the EI of managers and how they manage their associates is an element that leadership needs to consider while moving their organizations forward. Organizations everywhere need now to realize the benefits of primal leadership by cultivating leaders who generate the emotional resonance that lets people flourish.

Arguing that social intelligence is every bit as vital as intellectual prowess if not more so, Social Intelligence explores
