Merton** Charles Crothers, 2020-12-30 This book reintroduces the work of Robert K Merton as a bridge between classical sociology and modern sociology Founded in the sociological classics but developing a modern approach to the advancement of theory and research methodology Merton's thought helped to construct modern sociology in its coverage of many of the social institutional areas of contemporary society Recovering and analysing the system of structural analysis which Merton progressively developed a system largely overlooked due to the tendency among commentators to stereotype him as a functionalist the author considers the

applications of this approach to various substantive fields particularly science and criminal justice and examines the effect of Merton's later sociological semantics on his overall schema. A clear and accessible presentation of the array of concepts introduced by Merton to sociology. Reintroducing Robert K Merton will appeal to scholars and students with interests in sociological theory, social research, the history of sociology and the various substantive areas covered in the work of Merton: deviance, science and communications.

Robert K. Merton Craig Calhoun, 2010-09-07 Robert K Merton 1910-2003 was one of the most influential sociologists of the twentieth century producing clear theories and innovative research that continue to shape multiple disciplines. Merton's reach can be felt in the study of social structure, social psychology, deviance, professions, organizations, culture and science. Yet for all his fame Merton is only partially understood. He is treated by scholars as a functional analyst when in truth his contributions transcend paradigm. Gathering together twelve major sociologists, Craig Calhoun launches a thorough reconsideration of Merton's achievements and inspires a renewed engagement with sociological theory. Merton's work addressed the challenges of integrating research and theory. It connected different fields of empirical research and spoke to the importance of overcoming divisions between allegedly pure and applied sociology. Merton also sought to integrate sociology with the institutional analysis of science, each informing the other. By bringing together different aspects of his work in one volume, Calhoun illuminates the interdisciplinary and unifying dimensions of Merton's approach while also advancing the intellectual agenda of an increasingly vital area of study.

Smith, are indispensable for researchers and students interested in theoretical construction work in the social sciences. Society in Action Piotr Sztompka, 1991-08-27 In *Society in Action* Piotr Sztompka sets forth a highly topical contribution to central theoretical debates of contemporary sociology Taking the idea and practice of collective mobilization as his theme Sztompka argues that modern institutions particularly of late are characterized by an increasing

awareness of collective empowerment The most obvious concrete expression of this phenomenon as Sztopmka makes clear is the rise of a diversity of active social movements such as those which dramatically transformed Europe in the 1980s from the birth of Solidarity in 1980 to the 1989 Autumn of Nations Sztopmka connects the interpretations of such collective activity to a wider grasp of the nature of social action The result is a comprehensive and original theory of social change which focuses on the self transforming influence on society of its members striving for freedom autonomy and self fulfillment He develops his theory by means of a general concept of social becoming the roots of which he traces to the early romantic and humanist work of Karl Marx and his followers and to two influential sociological schools of today the theory of agency and historical sociology Sztopmka situates his theory midway between the rigid determinism of social totalities and the unbridled voluntarism of free individuals Social change he demonstrates can be understood neither as the outcome of individual actions taken alone nor as structurally determined actions Instead he confers upon social organizations and movements a self transcending quality they express human agency yet by virtue of their active character are quite often able to achieve unpredictable outcomes Throughout his analysis of social movements and revolutions in history Sztopmka emphasizes the dynamics of spontaneous social change generated from below a theoretical testimony to the rapid and fundamental social change in Eastern Europe in recent history Against the fashions of postmodernist malaise boredom and disenchantment his theory of social becoming expresses the possibility of emancipation of change leading to positive gains His work registers a belief in progress not inevitably gained but its attainment fully dependent upon the creativity and optimism of an active citizenry
