Socialist Banking And Monetary Control The Experience Of Poland:

Socialist Banking and Monetary Control T. M. Podolski, 1973 This book deals with the development of financial institutions changes in methods of finance and the role of monetary control in socialist economic management *Banking and Monetary Policy in Eastern Europe* Adalbert Winkler, 2016-01-26 At the beginning of the transition process the countries of Central and Eastern Europe faced the task of creating a functioning financial system where none had existed before A decade later high level practitioners and well known experts take stock of banking and monetary policy in the region centring on the governance of banks the spread of financial crisis and perspectives for monetary policy and banking sector development

Banking and Financial Stability in Central Europe David Green, Karl Petrick, 2002-04-26 this book would be suited to lawyers and non lawyers alike In addition it provides an interesting look at the EU banking system and the systems of Central and Eastern European countries Ellie Palmer *Journal of International Banking Law and Regulation* The eastwards expansion of the European Union is one of the most explosive economic and political issues of the early 21st century Economic and financial stability combined with rising prosperity in the applicant countries are increasingly seen as necessary preconditions for European Union membership This authoritative volume written by scholars and practitioners from Central and Western Europe and the United States confronts the issues involved in three of the countries most likely to be successful applicants to the EU the Czech Republic Hungary and Slovenia A spotlight is turned on the banking and financial industries as they are crucial to the achievement of economic stability The blend of expertise deployed which draws on in depth knowledge and extensive experience in central banking financial and commercial law business practical policy making and economic analysis ensures that this book is timely relevant and insightful The authors suggest that the role of the state in both creating and maintaining an effective financial sector is central Furthermore they argue that well regulated commercial banks and strategic foreign investors are a must as in practice the attempt to skip straight to modern capital markets has been ruinous This accessibly written volume will be of interest to students and scholars of economics finance law political science the sociology of economic life and European studies

The Soviet Study of International Relations Allen Lynch, 1989-07-28 Current divergence from traditional Leninist orthodoxy is attributed to such phenomena as nuclear warfare continued Western prosperity and the Sino Soviet split according to this systematic analysis of Soviet foreign policy

The Political Economy of Dual Transformations David L. Bartlett, 2010-05-06 In the early 1990s scholars voiced skepticism about the capacity of Eastern Europe's new democracies to manage simultaneous political and economic reform They argued that the surge of popular participation following democratization would thwart efforts by successor governments to enact market reforms that imposed high costs on major elements of post Communist society David Bartlett challenges the conventional wisdom regarding the hazards of dual transformations far from hindering marketization democratization facilitated it Bartlett argues that the transition to democracy in East Central Europe lowered the political

barriers to market reforms by weakening the ability of actors most vulnerable to marketization to manipulate the existing institutional structure to stop or slow down the process. Although the analysis focuses on Hungary whose long history of market reforms makes it an ideal vehicle for assessing the impact of institutional change on reform policy, the author shows how his findings call into question the use of shock therapy and arguments based on the experience in East Asia that economic development and democratization are incompatible. This book will appeal to economists, political scientists and others interested in transition problems in formerly communist countries, democratic transitions and the politics of stabilization and adjustment. David L. Bartlett is Assistant Professor of Political Science, Vanderbilt University. *Soviet Workers and the Collapse of Perestroika*, Donald Filtzer, 1994-06-09. A comprehensive analysis of the role of labour policy in the development and ultimate collapse of Mikhail Gorbachev's reforms.

Internationalism and the Ideology of Soviet Influence in Eastern Europe, Jonathan C. Valdez, 1993-04-29. Valdez argues that the use of the fundamental principles of Marxism-Leninism to perform various functions ultimately brought about a change in the basic assumptions of the theory itself. This resulted in the abandonment of the previous insistence on a universal model of socialism and of the idea that the international interests of the socialist bloc must take precedence over individual national interest. Soviet influence in Eastern Europe rested on little else than these ideological principles and consequently stood little chance of surviving their re-interpretation. Finally, Valdez assesses the re-interpretation of the fundamental principles of Soviet-East European relations by reformist scholars in the Soviet Union and the response by conservative members of the party apparatus.

Vlasov and the Russian Liberation Movement, Catherine Andreyev, 1987. Vlasov and the Russian Liberation Movement deals with the attempt by Soviet citizens to create a Russian anti-Stalinist liberation movement during the Second World War. These Soviet citizens were mainly prisoners of war, forced labourers or part of the population of the occupied territories of the USSR. The Liberation Movement was encouraged by German officers who disagreed with Nazi policy towards the USSR as their experience showed that treating the population as subhumans (*Untermensch*) merely increased resistance to Nazi occupation. Throughout the development of the Liberation Movement, there existed a divergence of aims between the Russian members who wished to form an army and a political movement which would effect change within the USSR and its German supporters who merely wished to alter the type of propaganda directed towards the population of the USSR. Catherine Andreyev provides an account of the evolution of the Russian Liberation Movement and examines the motivation of the titular leader of the movement, Lieutenant General Andrey Andreyevich Vlasov. The main focus of the book is the ideology of the Liberation Movement, the importance of which lies in the fact that it represented the first grass-roots opposition movement within the Soviet Union since the end of the Civil War in 1922. The programme of the Movement reflects issues which would have been raised by citizens in the 1930s had they been free to do so. Catherine Andreyev examines influences on the programme and the ideas expressed are placed within the context of the pre-war Soviet and Russian migratory society.

Russian Constitutional Experiment Geoffrey A. Hosking, 1973-05-10 *The Czechoslovak Economy 1948-1988* Martin Myant, 2010-06-24 Dr Myant presents a detailed account of the development and performance of the Czech economy over a period of forty years and reveals the problems and tensions created by the chosen system of centralised planning Dr Myant's conclusion is that any economic reform will have little substance unless accompanied by appropriate political change *The Banker*, 1973 **An Algebra of Soviet Power** Michael E. Urban, 1989-11-23 Control of office has long been regarded as the key element in understanding power and policy in the Soviet system What however accounts for the control of office and how are individuals recruited into positions of power and responsibility In *An Algebra of Soviet Power* Michael Urban adopts a fresh approach and introduces into the field of political elite studies the sociological technique of vacancy chain analysis

The New World Order in International Finance G. Underhill, 1997-04-12 The author provides a clear portrait of the dramatic transformation of the global financial system in the late 20th century Drawing on work by a prestigious and interdisciplinary set of specialists this volume looks at the political economy of individual sectors of the financial services industry at regional market patterns such as the EU and NAFTA and at individual countries from the Asian NICs to Europe and the United States The book captures the complexity and dynamics of a sector with vital implications for the future of global economic development **The Bread of Affliction** William Moskoff, 2002-08-08 This book tells how the Soviet Union fed itself after the invasion by the Germans during World War II The author argues that central planning became much less important in feeding the population and civilians were thereby forced to become considerably more self reliant in feeding themselves A rationing system was instituted soon after the war began but quickly became irrelevant because of the chronic food shortages The breakdown in central supplies of food was accompanied by the diminished importance of the ruble which in many places was replaced by bread and clothing as the medium of exchange Although the Soviet army was given high precedence over civilians the author also shows that the population living under German occupation was much worse off than were Soviet civilians living in the rear In addition to extensive use of American and German archives from the war period the author interviewed more than thirty Soviet emigrants who survived the war **Professionals, Power and Solidarity in Poland** Michael D. Kennedy, 1991-02-14 The Solidarity movement of the early 1980s not only triggered a transformation in Polish society it forced a fundamental reconsideration of the nature of socialism throughout the Soviet Union and Eastern Europe Seen as one of the most important social movements of the century this pathbreaking study analyses Solidarity's significance in Soviet societies **China's Financial System** William Byrd, 2019-08-20 Strengthening the banking system and expanding its role in resource mobilization and allocation have been key components of recent economic reform policies in the People's Republic of China This study of China's financial system focuses on new policies and reforms undertaken since 1976 including institutional restoration proliferation and decen *Economic Reforms in Eastern Europe and Prospects for the 1980s* Sam Stuart, 2014-05-09 *Economic Reforms in Eastern Europe and Prospects for the 1980s* focuses on the

institution of economic reforms and prospects in Eastern Europe including manpower availability scarce and expensive energy and raw materials deficiency of technological innovation and inflexibilities in management The selection first offers information on the economic reforms in Bulgaria Romanian economic reforms and the economic reforms in Czechoslovakia Discussions focus on the key problem and its resolution evaluation of the Bulgarian model Romanian economic development and principles contained in the directives The text then examines the reform of the system of economic management in Poland economic reforms and consumers in Eastern Europe and the prospects for the 1980s of the economic reforms in Bulgaria and Romania The publication takes a look at the economic prospects for the 1980s of Czechoslovakia and the German Democratic Republic Topics include factors impeding economic growth overemployment increases in consumer good prices welfare of consumers and decreasing economic growth The book further elaborates on the economic prospects for the 1980s of Hungary and Poland and the effects of energy development on East European economic prospects The selection is a vital reference for economists and readers interested in the prospects for the 1980s of the economic reforms in Eastern Europe

Monetarism, Economic Crisis and the Third World Karel Jansen, 2014-03-05 First Published in 1983 This book is a contribution to the debate about Monetarism as an economic policy and whether and how Monetarist policies can contribute to solving the current economic crisis The diverse backgrounds and opinions of the distinguished economists writing in this volume some supportive and some critical of Monetarism ensure a variety of interpretations of the causes of and responses to the crisis Overall however the book lays emphasis on two related factors which are frequently neglected in the current debates Firstly that the current economic crisis is a world crisis which is felt concomitantly though in different forms and with different intensities in the industrial countries in the countries of the socialist bloc and in the Third World And although its manifestations in the industrial and in the developing countries have been quite different the proposed policy answer has been fairly homogeneously Monetarist Secondly the message occurs throughout the book that in today's highly integrated world economy national economic policies have lost much of their autonomy Monetarist policies should therefore be assessed as to their consistency with external conditions and their effects on other countries The contributors analyse the manifestations of the economic crisis in various parts of the world and give their individual views on Monetarist policies Obviously there is no agreement but that is not the purpose of this volume its aim is to place the Monetarism discussion in the international context in which it should be conducted

Central Banking in Central and Eastern Europe Marcello De Cecco, 1994-10-01 This paper examines the philosophies which inspired the institution of central banking in Central and Eastern Europe in the interwar years Influenced by the Financial Section of the League of Nations the new central banks adopted laws which prohibited or severely restricted the financing of government fiscal debt They were encouraged to centralize their payments systems and manage exchange rates to keep control of the money supply and achieve monetary stability Before long they were forced to adopt further provisions in the area of banking supervision to regulate commercial

banks This paper considers the particular cases of Czechoslovakia Hungary and Poland **Leon Trotsky and the Politics of Economic Isolation** Richard B. Day, 1973 A highly original and controversial examination of events in Soviet Russia from 1917 to 1927 in which Professor Day challenges both the standard Trotskyite and Stalinist interpretations of the period At the same time he rejects the traditional emphasis on Trotsky's concept of Permanent Revolution and argues that a Marxist theorist is essential Professor Day concentrates upon the economic implications of revolutionary Russia's isolation from Europe How to build socialism in a backward war ravaged society without aid from the West this problem lay behind many of the most important political conflicts of Soviet Russia's formative years
