Sociobiology And Mental Disorder A New View:

Sociobiology & Mental Disorder Brant Wenegrat, 1984

Origins of Psychopathology Horacio Fabrega (Jr.), 2002

What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In *Origins of Psychopathology* Horacio Fabrega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution Fabrega approaches the prominent features of mental disorders as adaptive responses to the environment and life's circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology Fabrega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice

Social Support and Psychiatric Disorder Traolach S. Brugha, 1995-08-24 This second volume in a series looking at the social dimensions of mental illness collates and critically examines the information currently available on social support as it impacts on mental health The international team of contributors each actively involved in both clinical and research work in this field collectively covers the whole range of perspectives from biological mechanisms through to psychological and social theory An overview of the latest published evidence and a description of the nature and origins of social support are followed by evidence from observational studies and specific interventions and trials The text concludes with a summary which will act as a valuable resource for practitioners in their evaluation of social and psychological treatments and should also serve to stimulate further research and intervention trials Practitioners and researchers in psychiatry psychology and social work are certain to welcome this timely guide

The Adaptive Design of the Human Psyche Malcolm Owen Slavin, Daniel H. Kriegman, 1992-09-25

Addressing one of the most fundamental issues in any examination of human experience this important new work connects evolutionary biological concepts to modern psychoanalytic theory and the clinical encounter Synthesizing their years of experience in the practice of psychotherapy and psychoanalysis the authors provide a comparative psychoanalytic map of current theoretical controversies and a new way of deconstructing the hidden assumptions that underlie Freudian Ego Psychological Kleinian Object Relational Self Psychological and Interpersonal theories In so doing they provide a new vantage point from which to integrate competing models into a larger picture that more fully embraces the many facets of human nature Moreover they offer clinicians a new framework with which to understand and respond to the inevitable

paradoxes and conflicts that arise in the therapeutic relationship *Blackwell Handbook of Social Psychology* Garth J. O. Fletcher, Margaret S. Clark, 2002-12-13 This authoritative handbook provides a cutting edge overview of classic and current research as well as an assessment of future trends in the field of interpersonal processes Ensures thorough and up to date coverage of all aspects of interpersonal processes Includes contributions by academics and other experts from around the world to ensure a truly international perspective Provides a comprehensive overview of classic and current research and likely future trends Fully referenced chapters and annotated bibliographies allow easy access to further study Now available in full text online via xreferplus the award winning reference library on the web from xrefer For more information visit www.xreferplus.com

The Adapted Mind Jerome H. Barkow, Leda Cosmides, John Tooby, 1995-10-19 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection language acquisition cooperation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture *The Adapted Mind* explores this new approach evolutionary psychology and its implications for a new view of culture [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.), 1985 [Handbook of Culture, Therapy, and Healing](#) Uwe P. Gielen, Jefferson M. Fish, Juris G. Draguns, 2012-10-12 Emotional as well as physical distress is a heritage from our hominid ancestors it has been experienced by every group of human beings since our emergence as a species And every known culture has developed systems of conceptualization and intervention for addressing it The editors have brought together leading psychologists psychiatrists anthropologists and others to consider the interaction of psychosocial biological and cultural variables as they influence the assessment of health and illness and the course of therapy The volume includes broadly conceived theoretical and survey chapters detailed descriptions of specific healing traditions in Asia the Americas Africa and the Arab world *The Handbook of Culture Therapy and Healing* is a unique resource containing information about Western therapies practiced in non Western cultures non Western therapies practiced both in their own context and in the West [Illness and Power](#) Brant Wenegrat, 1996-09 Since ancient times physicians have believed that women are especially vulnerable to certain mental

illnesses Contemporary research confirms that women are indeed more susceptible than men to anxiety depression multiple personality and eating disorders and several forms of what used to be called hysteria Why are these disorders more prevalent in women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power He reviews women s social power from an evolutionary and cross cultural perspective and places mental disorders in the context of evolution and societal organization In this comprehensive look at mental disorders commonly associated with women Brant Wenegrat convincingly asserts that women s excess risk stems from a lack of social power *New World New Mind* Robert Evan Ornstein,Paul R. Ehrlich,2000 There is no longer sufficient time to rely on the normal pace of cultural evolution to deal with today s dilemmas Human beings have always been the most adaptable creatures on the planet and they should be able to chart a new course for themselves Some of that charting is already being done The old mind today is being challenged and changed by many scattered efforts Can we bring these efforts together to produce a large scale program for a rapid change of mind We know what the problem is The solution is not simple to generate the social and political will to move a program of conscious evolution to the top of the human agenda
