## **Socioeconomic Renovation In Viet Nam The Origin Evolution And Impact Of Doi Moi:**

*Socioeconomic Renovation in Viet Nam* International Development Research Centre (Canada), Institute of Southeast Asian Studies, 2000 **Socioeconomic Renovation in Viet Nam** Peter Boothroyd, Xuân Nam Phạm, 2000 How Nations Escape Poverty Rainer Zitelmann, 2024-03-26 A rigorous defense of free markets and open enterprise in the tradition of Adam Smith During the 20th century Vietnam and Poland were both victims not only of devastating wars but also of socialist planned economies that destroyed whatever war hadn't already In 1990 Vietnam was still one of the poorest countries in the world while Poland was one of the poorest in Europe But in the three decades since then both countries have drastically improved their citizens standards of living and escaped the vicious cycle of national poverty In this book Rainer Zitelmann identifies the reasons behind the sensational growth of both nations economies drawing out the lessons that other countries can learn from these two success stories To explain the source of their success he returns to Adam Smith's 1776 treatise *The Wealth of Nations* the only way to overcome poverty is through economic growth Smith wrote and economic freedom is the crucial prerequisite for such growth Developments over the past 250 years have proved Smith right The market economy has led to a global decline in poverty unparalleled in human history Compare this to the fifty years of development aid in Africa that have only entrenched the status quo and it is clear which approach yields superior results Despite these strides almost ten percent of the world's population still lives in extreme poverty So what measures actually help to alleviate poverty today Through a wealth of data and stories from the everyday lives of Polish and Vietnamese people who experienced reforms Zitelmann demonstrates the persistent relevance of Smith's ideas to economic flourishing in the 21st century **The Vietnamese City in Transition** Patrick Gubry, Frank Castiglioni, Jean-Michel Cusset, Nguyen Thi Thieng, Pham Thuy Huong, 2010 Since the Doi Moi policy of economic renovation was introduced in 1986 Vietnam has undergone deep transformations as a result of the transition to a socialist oriented market economy Social and urban transition has taken place in parallel as urban dynamics were spurred on by Vietnamese public and private stakeholders and by external agents such as international organizations and international solidarity organizations experts consultants and bilateral aid organizations Here are the results of research carried out by French Canadian and Vietnamese teams from the north and south of the country on the overarching theme of Vietnamese cities in transition Some of this research deals with urban dynamics some with the issues at stake within such dynamics or with the strategies of the most significant stakeholders in urban transition civil society donors within the framework of official aid for development consultants and international consultancy firms These projects were carried out between 2001 and 2004 as part of the Urban Research Programme for Development PRUD and mainly focus on Hanoi and Ho Chi Minh City or both in the case of comparative studies Is there such a thing as a Vietnamese model of an Asian city It seems that urban transition in Vietnam is not taking place in as radical and abrupt a manner as in China The country's

capacity for absorbing external models the quest for a third way between state intervention and economic liberalism and the fact that the country's architectural heritage is taken into account in urban planning are just some of the reasons for its particularity The issues addressed in each chapter as well as the proposals for further research suggested by the contributors should act as a catalyst for urban research in Vietnam

**Agent Orange and Rural Development in Post-war Vietnam** Vu Le Thao Chi, 2020-03-04 Vu tells the story of Vietnamese farmers who have survived a 30 year war of independence and unification its damaging legacies in their living environment and the unfamiliar pressure of the market economy Vietnamese farmers are neither simply obedient beneficiaries of policy decisions made by higher authorities nor convention ridden cyphers Rather they are sophisticated decision makers capable of navigating the changes threatening to disrupt their lives over multiple generations Vu's research pays particular attention to those farmers whose families have suffered from direct and indirect exposure to the toxic herbicides popularly known as Agent Orange She demonstrates that their priority has tended to be the protection of their existing assets rather than pursuing the promise of new riches and that this tendency has helped them maintain stability in a turbulent economic environment A fascinating study for scholars of Vietnamese anthropology and society the book will also be of interest to sociologists and economists with a broader interest in the impact of economic and political change on rural lifestyles
