**Ontological Fundamentals for Ethical Management** Dominik Heil, 2011-07-06 The book develops a philosophical foundation to the field of management education using the work of Martin Heidegger as a guiding philosophy It asks the questions what is a corporation and what is corporate management These two questions are foundational for management thought in general and management ethics in particular Most other academic fields are in some way defined and guided by a philosophical discourse This philosophical discourse is largely missing in the field of management thought and education Without this foundation it can never be clear what actually belongs into a certain academic discipline and what does not It also therefore lacks a sound and well articulated ontological foundation critical for developing approaches to ethical management This book seeks to fill this gap and consequently represents an interdisciplinary effort between the academic field of management business administration and philosophy which is vital for business ethics Intended as required reading for an elective on philosophy of management that is offered annually at the Wits Business School University of the Witwatersrand Johannesburg The structure of the course will be largely based on the structure of the book

Domestic Violence and Psychology Paula Nicolson,2010-12-14 This book rethinks the way psychological knowledge of domestic violence has typically been constructed It puts forward a psychological perspective which is both critical of the traditional woman blaming stance as well as being at odds with the feminist position that men are wholly to blame for domestic abuse and that violence in intimate relationships is caused by gender power relations It is rather argued that to neglect the emotions experiences and psychological explanations for domestic violence is to fail those who suffer and thwart attempts to prevent future abuse Paula Nicolson suggests that domestic violence needs to be discussed and understood on several levels material contexts including resources such as support networks as well as the physical impact of violence the discursive as a social problem or gendered analysis and the emotional level which can be both conscious and unconscious Drawing on the work of scholars including Giddens Foucault Klein and Winnicott and using interview and survey data to illustrate its arguments Domestic Violence and Psychology develops a theoretical framework for examining the context intentions and experiences in the lives of women in abusive relationships the men who abuse and the children who suffer in the abusive family As such this book will be of great interest to those studying social and clinical psychology social work cultural studies sociology and women s studies *Making New York Dominican* Christian Krohn-Hansen,2012-12-18 Large scale emigration from the Dominican Republic began in the early 1960s with most Dominicans settling in New York City Since then the growth of the city s Dominican population has been staggering now accounting for around 7 percent of the total populace How have Dominicans influenced New York City And conversely how has the move to New York affected their lives In *Making New York Dominican* Christian Krohn Hansen considers these questions through an exploration of Dominican immigrants economic and political practices and through their constructions of identity and belonging Krohn Hansen focuses especially on Dominicans in the small business sector in particular the bodega and supermarket and taxi and black car industries While studies of immigrant business and entrepreneurship have been predominantly quantitative using survey data or public statistics this work employs business ethnography to demonstrate how Dominican enterprises work how

people find economic openings and how Dominicans who own small commercial ventures have formed political associations to promote and defend their interests The study shows convincingly how Dominican businesses over the past three decades have made a substantial mark on New York neighborhoods and the city's political economy Making New York Dominican is not about a Dominican enclave or a parallel sociocultural universe It is instead about connections between Dominican New Yorkers economic and political practices and ways of thinking and the much larger historical political economic and cultural field within which they operate Throughout Krohn Hansen underscores that it is crucial to analyze four sets of processes the immigrants forms of work their everyday life their modes of participation in political life and their negotiation and building of identities Making New York Dominican offers an original and significant contribution to the scholarship on immigration the Latinization of New York and contemporary forms of globalization

**A Difference of Reason** Nancy E. Rourke, 1997 This book sets out a new jurisprudence to displace legal pragmatism Legal pragmatism has been the law's deep operating theory for a century but it no longer meets the needs of a nation as diverse as ours William James defined pragmatism as a method and a theory of truth This book offers a new method and a new theory of truth for use in law one specifically designed to serve the needs of a diverse nation One key feature is perspective reason Human reason consists of two elements the empirical or sense based and the rationalistic or reason based elements In parallel with the philosophy of pragmatism legal pragmatism attempted a synthesis of the two This book argues for changes in the design of the trial made possible by the new theory of truth and method The legal pragmatists believed

that the trial as a reasoned inquiry into social dynamics may be ongoing The proposed new method draws on recent developments in organizational science The legal pragmatists treated practicing lawyers as the legal equivalent of scientists engaged in inductive inquiry Thus 20th century law practice works by requiring that lawyers set out a statement of facts and conclusion of law in legal pleadings The trial then inquires into the claims of fact This form of legal science works from the perspective of the social factor as is true of the newer form of organizational science An action based legal method will make the law much more practical and useful to society The trial remains to be rationalized in ways that can accomodate the reasoning of those who are subject to law The new theory of the trial as an action based reasoned inquiry into social dynamics offers lawyers the means to do so
