Studien Zur Modernen Deutschen Lexikographie:

I-R Herbert Ernst Wiegand, 2012-02-13 Diese vierbändige Bibliographie führt erstmals die internationale Forschungsliteratur zur Wörterbuchforschung zusammen. Sie erlaubt den schnellen und gezielten Zugriff auf historische ebenso wie auf gegenwartsbezogene Themen und Arbeitsgebiete und stellt ein bibliographisches Fundament zur Verfügung, auf dem zukünftige Forschung aufbauen kann. Sie ist zugleich eine bibliographische Dokumentation der Geschichte der germanistischen Wörterbuchforschung und Lexikographie des Deutschen im Kontext seiner wichtigsten lexikographischen Partnersprachen. Die Bibliographie ist ein Arbeitsinstrument für die Lexikographie zahlreicher Sprachen und für die internationale Wörterbuchforschung. Auch für Lexikologen ist sie von Interesse. Sie erfasst ca. 25 000 Titel aus über 15 Sprachen und berücksichtigt alle Arten der Lexikographie. Die Titel sind alphabetisch geordnet und zu Texten mit kurzen Kommentaren und mit Hinweisen auf Rezensionen versehen. Sie werden über ein Sachregister sowie ein Namenregister zu denjenigen Personennamen erschlossen, die nicht im Alphabet stehen. Die Orientierung wird durch Querverweise zwischen den Titeln erleichtert. Im Zentrum der Bibliographie wurde die gesamte einschlägige Literatur zur germanistischen Lexikographie von den glossographischen Anfängen bis zur elektronischen Gegenwart berücksichtigt. Insbesondere mit Rücksicht auf die metalexikographische Theoriebildung, die lexikographischen Methoden und die zwei- und mehrsprachige Lexikographie wurde auch die anglistische, nordistische, romanistische und slavistische Lexikographie und Wörterbuchforschung berücksichtigt. Dabei wurde der Herausgeber von namhaften Kollegen unterstützt. Die Bibliographie richtet sich an alle Philologen, besonders die Germanistik, Sprachwissenschaftler, Lexikographen und alle in Verlagen und Wörterbuch-Arbeitsstellen, Computerlinguisten und Literaturwissenschaftler.

The Verb in Turkish Eser Erguvanli? Taylan, 2002-02-21 This book is a collection of articles on the properties of the verb in Turkish as the core element of clause structure by linguists from different parts of the world Articles present the most recent analyses on the Turkish language carried out in various theoretical orientations within the functional formal range The topics researched in the contributions center around properties of verbal inflection as the morphological means to express temporal aspectual and modal notions and the implications of these morphological configurations to syntactic theory

Grammar as Processor Roland Pfau, 2009-01-14 Spontaneous speech errors provide valuable evidence not only for the processes that mediate between a communicative intention and the articulation of an utterance but also for the types of grammatical entities that are manipulated during production This study proposes an analysis of speech errors that is informed by grammar theory In particular it is shown how characteristic properties of erroneous German utterances can be accounted for within Distributed Morphology DM The investigation focuses on two groups of errors Errors that result from the manipulation of semantic and morphosyntactic features and errors which appear to involve the application of a post error repair strategy It is argued that a production model which incorporates DM allows for a straightforward account of the attested sometimes complex error patterns DM mechanisms for instance render unnecessary the assumption of repair processes Besides providing an account for the attested error patterns the theory also helps us in explaining why certain errors do not occur In this sense DM makes for a psychologically real model of grammar

Adverbials Jennifer R. Austin, Stefan Engelberg, Gisa Rauh, 2004-08-31 Adverbials have become an important testing ground for research on the interfaces between syntax semantics and pragmatics The articles selected for this volume present recent research on this topic Among the issues addressed are the occurrence of adverbials in various domains of the sentence Mittelfeld left and right periphery adverbials in front of gaps and the influence of the discourse context on the interpretation and position of adverbials Particular classes of adverbials that are discussed include domain locative temporal manner transparent and degree adverbials Beyond the exploration of these topics the volume reflects the current debate between proponents of semantic driven approaches to the positioning of adverbials which assume adverbials to be adjuncts and approaches that claim a primacy of syntax in conceiving of adverbials as specifiers in a universally valid hierarchy of functional projections

Deriving Coordinate Symmetries John R. te Velde, 2006-01-18 This monograph proposes a minimalist phase based approach to the derivation of coordinate structures utilizing the operations Copy and Match to account for both the symmetries and asymmetries of coordination Data are drawn primarily from English German and Dutch The basic assumptions are that all coordinate structures are symmetric to some degree in contrast to parasitic gap and many verb phrase ellipsis constructions and these symmetries especially with ellipsis allow syntactic derivations to utilize Copy and Match in interface with active memory for economizing with gaps and assuring clarity of interpretation With derivations operating at the feature level troublesome properties of coordinate structures such as cross categorial and non constituent coordination violations of the Coordinate Structure Constraint as well as coordinate ellipsis Gapping RNR Left Edge Ellipsis are accounted for without separate mechanisms or conditions applicable only to coordinate structures The proposal provides support for central assumptions about the structure of West Germanic

Modality and its Interaction with the Verbal System Sjef Barbiers, Frits Beukema, Wim van der Wurff, 2002-05-29 This book provides a broad overview of the issues relevant for the study of syntax of modals and their interaction with the verbal system A large number of novel observations are offered from a variety of languages including Dutch Modern and Middle English German Lele Macedonian Middle Dutch and Slovene The wealth of data the critical evaluation of existing syntactic analyses of modality and the alternative analyses proposed make the book interesting for both for descriptively and for theoretically oriented syntacticians Major concerns addressed are the distinction between epistemic and root modality where the arguments pro and contra the assumption of a corresponding difference in syntactic structure are evaluated refined and supplemented by arguments for syntactic distinction between necessity and possibility modals and by consideration of the influence of the modal s complement on the interpretation the interaction between modality and clausal phenomena in particular negation but also imperatives aspect and Aktionsart and the acquisition of modality addressing cross linguistic differences in the possibility for root infinitives to express modal interpretations and the late acquisition of epistemic interpretations as compared with non epistemic interpretations

Cyclical Change Elly van Gelderen, 2009 Linguistic Cycles are ever present in language change and

involve a phrase or word that gradually disappears and is replaced by a new linguistic item The most well known cycles involve negatives where an initial single negative such as not is reinforced by another negative such as no thing and subjects where full pronouns are reanalyzed as endings on the verb This book presents new data and insights on the well known cyclical changes as well as on less well known ones such as the preposition auxiliary copula modal and complementation cycles Part I covers the negative cycle with chapters looking in great detail at the steps that are typical in this cycle Part II focuses on pronouns auxiliaries and the left periphery Part III includes work on modals prepositions and complementation The book ends with a psycholinguistic chapter This book brings together linguists from a variety of theoretical frameworks and contributes to new directions in work on language change

Complex Predicates Leila Lomashvili, 2011 Complex predicates present different levels of complexity at the syntactic and morphological levels crosslinguistically The focus of this book is a subset of these constructions causative and applicative in three polysynthetic languages of the South Caucasian language family in which the functional morphology associated with the argument structure of these constructions is unusually rich Due to such focus the syntax morphology interface in causative and applicative constructions is subject to scrutiny in two main chapters of the book The analysis includes the argument structure of causatives and applicatives along with the morpho phonological instantiation of the functional heads involved in these constructions The book is written very clearly and is accessible for a wide audience including undergraduate students in the introductory syntax and morphology courses as well as graduate students in basic syntax courses and seminars in linguistics It naturally appeals to a general linguistic audience interested in theoretical linguistics
