volumes in the series examined the shape history and cultural expressions of class structures Now grappling with themes usually put under the labels of intersectionality and work life balance and bridging literatures seldom brought together this volume uses an innovative mix of statistical techniques to untangle the messy nexus of factors class age gender race ethnicity intimate relations political context and more underpinning everyday routines spaces possessions practices im possibilities and self perceptions in the US Germany and Sweden In the process it advances the specific vision of class and social relations developed by Pierre Bourdieu pursuing the case above all that conceptual and methodological progress is necessary to fully recognise and explore the multiplicity of desires dispositions and demands at play in people s lives The volume will be of major interest to scholars of class culture gender and family but will appeal to anyone interested in the interplay of identities and pressures implicated in contemporary experiences and inequalities
