Kay, Simon Horobin, Jeremy J. Smith, 2004-06-24 This is the first of two volumes of papers selected from those given at the 12th International Conference on English Historical Linguistics The second is *New Perspectives on English Historical Linguistics 2 Lexis and Transmission Together* the volumes provide an overview of many of the issues that are currently engaging practitioners in the field In this volume the primary concern is with the historical grammar of English Some papers take a broad overview of the subject positioning it within current advances in linguistic theory while others deal with specific points of syntax and morphology in a historical context There is a recurrent emphasis on data collection and analysis with a chronological range from Old to Present Day English and a geographical spread from Scotland to Newfoundland Contributions from scholars around the world remind us that not only English itself but the history of English is now an international possession *New Perspectives on English Historical Linguistics: Syntax and morphology* Christian Kay, Simon Horobin, Jeremy J. Smith, 2004-01-01 This is the first of two volumes of papers selected from those given at the 12th International Conference on English Historical Linguistics The second is *New Perspectives on English Historical Linguistics 2 Lexis and Transmission Together* the volumes provide an overview of many of the issues that are currently engaging practitioners in the field In this volume the primary concern is with the historical grammar of English Some papers take a broad overview of the subject positioning it within current advances in linguistic theory while others deal with specific points of syntax and morphology in a historical context There is a recurrent emphasis on data collection and analysis with a chronological range from Old to Present Day English and a geographical spread from Scotland to Newfoundland Contributions from scholars around the world remind us that not only English itself but the history of English is now an international possession **The Three Waves of Globalization** Franca Poppi, 2014-01-16 Globalization i e the spatio temporal processes of change leading to a transformation in the organization of human affairs is said to have started as long ago as the end of the 15th century This first wave of globalization was subsequently followed by two others The third wave of globalization which began after 2000 has made the world noticeably smaller In fact technological innovations have sharply increased the availability of new modes and channels of communication As a result the sharing of knowledge and information all around the world has substantially increased and this has prompted the emergence of new globalizing genres In addition

it has led to the implementation of a series of adaptations to the existing genres in an attempt to guarantee their success and survival in an era which celebrates the need for a global reach In order to investigate these winds of change in generic studies the present volume combines a historical perspective with a detailed survey of different contemporary discourses and genres situated in an array of contexts of interaction Accordingly the empirically informed analyses of discourses and genres do not only focus on the textual intertextual and interdiscursive features but also on the institutional organizational professional and socio cultural settings i e all those aspects which show how genres reflect changing disciplinary and professional cultures As a consequence and in line with the multi faceted nature of genre different reading paths can be followed in the present volume On the one hand it is possible to make a distinction between professional institutional and academic contexts On the other hand the concept of change will also be investigated by focusing on oral written and web mediated genres Throughout the volume the different reading paths aim at highlighting the influence of the three waves of globalization on genre evolution thus contributing to providing evidence in favour of the homogenization or fragmentation hypotheses which claim new global genres are outnumbering or are outnumbered by the proliferation of a myriad of new customized genres

The English Noun Phrase Evelien Keizer, 2007-08-09 English has an interesting variety of noun phrases which differ greatly in structure Examples are binominal two noun phrases a beast of a party possessive constructions the author's opinion and discontinuous noun phrases the review came out yesterday of his book How are these different noun phrases structured How do we produce and understand them These questions are central to this study which explores the interaction between the form of noun phrases their meaning and their use It shows how despite the need in linguistic analysis for strict categories many linguistic constructions in fact defy straightforward classification and concludes that in order to fully explain the internal structure of utterances we must first consider the communicative pragmatic and cognitive factors that come into play Drawing on a range of authentic examples this book sheds light not only on the noun phrase itself but also the nature of linguistic classification
