Studies In The History Of The English Language A Millennial Perspective:

Studies in the History of the English Language Donka Minkova, Robert P. Stockwell, 2002 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics **Methods in Historical Pragmatics**

Susan M. Fitzmaurice, Irma Taavitsainen, 2008-08-22 This volume represents a timely collective review and assessment of what it is we do when we do English historical pragmatics or historical discourse analysis The context for the volume is a critical assessment of the assumptions and practices defining the body of research conducted on the history of the English language from the perspective of historical pragmatics broadly construed The aim of the volume is to engage with matters of approach and method from different perspectives accordingly the contributions offer insights into earlier communicative practices registers and linguistic functions as gleaned from historical discourse The essays are grouped according to their orientations within the scope of the study of language and meaning in historical texts both literary and non literary The structure of the volume thus represents a critical convergence of traditions of reading texts and analyzing discourse and this in turn exposes key questions about the methods and the outcomes of such readings or analyses The volume contributes to the growing maturity of historical pragmatic research approaches as it exemplifies and extends the range of approaches and methods that dominate the research enterprise Contributors are prominent international scholars in the fields of linguistics literature and philology Dawn Archer Birte B s Laurel Brinton Gabriella Del Lungo Camiciotti James Fitzmaurice Susan Fitzmaurice Monika Fludernik Andreas Jucker Thomas Kohnen Ursula Lenker Lynne Magnusson and Irma Taavitsainen

Crossing Linguistic Boundaries Paloma Núñez-Pertejo, María José López-Couso, Belén Méndez-Naya, Javier Pérez-Guerra, 2019-12-26 Breaking away from previously rigid descriptions of the linguistic system of the English language *Crossing Linguistic Boundaries* explores fascinating case studies which refuse to fall neatly within the traditional definitions of linguistic domains and boundaries Bringing together leading international scholars in English linguistics this volume focusses on these controversies in relation to seeking to overcome the temporal and geographical limits of the English language Approaching tensions in the areas of English phonology and phonetics pragmatics semantics morphology and syntax chapters discuss not only British and American English but also a wide variety of geographical variants Containing synchronic and diachronic studies covering different periods in the history of English *Crossing Linguistic Boundaries* will appeal to anyone interested in linguistic variation in English **External Influences on English** D. Gary Miller, 2012-08-02 In this fascinating history of the influences on English during the first thousand years of its formation the author shows when and why the Anglo Saxons began to borrow words from Latin and Greek and the effects of contact with the Vikings Celts and

French A book of enduring value to everyone interested in the history of English *English as a Lingua Franca* Anna Mauranen, Elina Ranta, 2009-10-02 English as a lingua franca has become a hot topic in Applied Linguistics and English Studies While it has been a subject of controversy for some time linguistic observations on actual use have largely been missing out of the debate This is now changing fast and the study of English as a lingua franca has become a vibrant research field This book reflects achievements in the growing field it presents a good selection of empirical findings thus providing substance to arguments It comprises contributions from pioneers and established scholars in the field along with reports from substantial ongoing research projects The papers offer insights into the workings of English as a lingua franca in different contexts conversational academic professional and business situations They tackle essential theoretical issues analyse linguistic and interactional features of ELF and discuss attitudes towards ELF The studies are firmly anchored in analyses of authentic language in social interaction some also using survey and interview data Many papers also touch upon debates on language policy and linguistic ideologies This collection of papers from the key areas of current ELF research will be of interest to English linguists and applied linguists graduate and undergraduate students of English educational and language planners and teachers of English Medical Writing in Early Modern English Irma Taavitsainen, Päivi Pahta, 2011-02-03 Medical writing tells us a great deal about how the language of science has developed in constructing and communicating knowledge in English This volume provides a new perspective on the evolution of the special language of medicine based on the electronic corpus of Early Modern English Medical Texts containing over two million words of medical writing from 1500 to 1700 The book presents results from large scale empirical research on the new materials and provides a more detailed and diversified picture of domain specific developments than any previous book Three introductory chapters provide the sociohistorical disciplinary and textual frame for nine empirical studies which address a range of key issues in a wide variety of medical genres from fresh angles The book is useful for researchers and students within several fields including the development of special languages genre and register analysis historical corpus linguistics historical pragmatics and medical and cultural history **Continuity and Change in Grammar** Anne Breitbarth, 2010 One of the principal challenges of historical linguistics is to explain the causes of language change Any such explanation however must also address the actuation problem why is it that changes occurring in a given language at a certain time cannot be reliably predicted to recur in other languages under apparently similar conditions The sixteen contributions to the present volume each aim to elucidate various aspects of this problem including What processes can be identified as the drivers of change How central are syntax external phonological lexical or contact based factors in triggering syntactic change And how can all of these factors be reconciled with the actuation problem Exploring data from a wide range of languages from both a formal and a functional perspective this book promises to be of interest to advanced students and researchers in historical linguistics syntax and their intersection *Corpora and the Changing Society* Paula Rautioaho, Arja Nurmi, Juhani

Klemola,2020-04-15 This book showcases eleven studies dealing with corpora and the changing society The theme of the volume reflects the fact that changes in society lead to changes in language and vice versa Focusing on the English language be it from Old English to the present or a shorter time span in the immediate past the contributors in this volume use a variety of corpus methods to address the two patterns of change The cross fertilization of cultural studies and corpus linguistics we hope is beneficial for both parties as corpus linguistics offers a vast array of materials and methods to investigate cultural and societal change while cultural studies provide the theoretical background on which to build our research The studies included in the present volume illustrate the potential avenues and the merits of combining changing language and changing societies **The Adaptive Value of Languages: Non-Linguistic Causes of Language Diversity**

Antonio Benítez-Burraco,Steven Moran,2018-11-08 The goal of this eBook is to shed light on the non linguistic causes of language diversity and in particular to explore the possibility that some aspects of the structure of languages may result from an adaptation to the natural and or human made environment Traditionally language diversity has been claimed to result from random internally motivated changes in language structure However ongoing research suggests instead that different factors that are external to language can promote language change and ultimately account for aspects of language diversity specifically features of the social and physical environments The contributions in this eBook discuss whether some aspects of languages are an adaptation to ecological social or even technological niches **Early English Poetic Culture and Meter**

Lindy Brady,M J Toswell,2016-10-21 This volume develops G R Russom s contributions to early English meter and style including his fundamental reworkings and rethinkings of accepted and oft repeated mantras including his word foot theory concern for the late medieval context for alliterative meter and the linguistics of punctuation and translation as applied to Old English texts Ten eminent scholars from across the field take up Russom s ideas to lead readers in new and exciting directions
