diversifies its energy mix and moves towards carbon free growth Renewable energy is today high on the global energy agenda Indian energy policy thus has to address a range of issues domestically and on foreign turf It has to move beyond the transactional mode by creating equity in the global energy industry Today the global energy regime is undergoing fundamental changes as is the power dynamics of the global energy order There are now many new producers and diverse consumers The trade in energy has increased in volume and its direction has shifted from the West to the East and the ongoing structural changes in the energy market call for a new security architecture Given the complex and competitive environment of the new geo economics and geopolitics of energy the question could well be should India frame energy issues in conflict mode or move toward innovative cooperation In either case the message is that India needs an integrated energy security policy
