Studies On The Origin And Early Tradition Of English Utopian Fiction:

Studies on the origin and early tradition of English Utopian fiction Sten Bodvar Liljegren, 1973 **Modern British Utopias, 1700-1850 Vol 1** Gregory Claeys, 2024-10-28 In the period 1700 1850 the history of utopian thought cast light on ideas of property holding community and social and political reform movements including those for the extension of rights to slaves women and animals This text includes some of the best known tracts of the period The New Cambridge Bibliography of English Literature George Watson, Ian Roy Willison, 1974 James Harrington Rachel Hammersley, 2019-10-03 Despite not being an active participant in the English Civil War seventeenth century political thinker James Harrington exercised an important influence on the ideas and politics of that crucial period of history In The Commonwealth of Oceana he sought to explain why civil war had broken out in 1642 to put the case for commonwealth government and to offer a detailed constitutional blueprint for a new and successful English government In this intellectual biography of Harrington Rachel Hammersley sets a fresh analysis of this and Harrington's other writings against the background of his life and the turbulent period in which he lived In doing so this study seeks to move beyond the conventional view of Harrington as primarily a republican thinker offering a broader and more comprehensive account of him which addresses the complexity of his republicanism as well as exploring his contributions to economic historical religious philosophical and scientific debates his experimentation with vocabulary and literary form and the relationship between his life and thought Harrington is presented as an innovative political thinker committed to democracy social mobility and meritocracy Ultimately this broader examination of Harrington's life and work opens a window on political economic religious and scientific issues which serve to complicate understandings of the English Revolution and sheds fresh light on the relevance of seventeenth century ideas to the modern world **Annual Bibliography of English Language and Literature** John Horden, 1973 *Crossroads in Literature and Culture* Jacek Fabiszak, Ewa Urbaniak-Rybicka, Bartosz Wolski, 2012-11-05 The book contains a selection of papers focusing on the idea of crossing boundaries in literary and cultural texts composed in English The authors come from different methodological schools and analyse texts coming from different periods and cultures trying to find common ground the theme of the volume between the apparently generically and temporarily varied works and phenomena In this way a plethora of perspectives is offered perspectives which represent a high standard both in terms of theoretical reflection and in depth analysis of selected texts Consequently the volume is addressed to a wide scope of both scholars and students working in the field of English and American literary and cultural studies furthermore it will be of interest also to students interested in theoretical issues linked with investigations into literature and culture **Apocalyptic Representations of Jerusalem** Maria Leppäkari, 2018-08-14 Jerusalem as a symbolic expression of hope attracts attention and religious adherence in relation to its physical presence The study identifies traces and examines apocalyptic representations of Jerusalem and illustrates what happens when these become experienced reality

The empirical part of the book shows how these representations become living images in two contemporary groups activity in Jerusalem Private and public endtime representations of Jerusalem provide meaningful models for interpreting the religious past present and future The interplay of these representations also shapes our present images of Jerusalem *Studies on the Origins and Early Tradition of English Utopian Fiction* S. B. Liljegren,1978-08-01 **Radical Ideas and the Crisis of Christianity in England, 1640-1740** Katherine A East,Alex W Barber,2024-08-20 Examines the evolving relationship between Church and State the character of radical thought in Enlightenment England and the nature of that Enlightenment itself A tribute to the work of the late Justin Champion this volume explores the radical religious and political ideas of seventeenth and eighteenth century England which were at the heart of Champion s intellectual contributions Drawing on the debates and upheavals that dominated the period from the British Civil Wars to the mid eighteenth century the essays in this collection interrogate the challenging relationship between politics and religion which prompted what Champion called a Crisis of Christianity Diverse perspectives on that crisis are reconstructed encompassing the experiences of republicans and radicals philosophers and historians atheists and clergymen Through these individuals a complex discourse which defies easy categorisation is recovered but which speaks to central discussions concerning the evolving relationship between Church and State the character of radical thought in Enlightenment England and indeed the nature of that Enlightenment itself
