Studies Voltaire 18th Century Volume 27:

The Secular City T. D. Hemming, 1994 Central to the Enlightenment is the ideal of the Secular City in militant reply to the Civitas Dei of St Augustine The essays in this volume illustrate the elaboration of that vision both in the planning and depiction of actual cities and in the speculation on social justice to which Voltaire in particular devoted himself **Human Nature, Cultural Diversity, and the French Enlightenment** Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot's celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire Rousseau and d'Holbach Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature there were also cracks in this concept that developed during the Enlightenment itself *A Natural History of Revolution* Mary Ashburn Miller, 2011-08-15 How did the French Revolutionaries explain justify and understand the extraordinary violence of their revolution In debating this question historians have looked to a variety of eighteenth century sources from Rousseau's writings to Old Regime protest tactics *A Natural History of Revolution* suggests that it is perhaps on a different shelf of the Enlightenment library that we might find the best clues for understanding the French Revolution namely in studies of the natural world In their attempts to portray and explain the events of the Revolution political figures playwrights and journalists often turned to the book of nature phenomena such as hailstorms and thunderbolts found their way into festivals plays and political speeches as descriptors of revolutionary activity The particular way that revolutionaries deployed these metaphors drew on notions derived from the natural science of the day about regeneration purgation and balance In examining a series of tropes earthquakes lightning mountains swamps and volcanoes that played an important role in the public language of the Revolution *A Natural History of Revolution* reveals that understanding the use of this natural imagery is fundamental to our understanding of the Terror Eighteenth century natural histories had demonstrated that in the natural world apparent disorder could lead to a restored equilibrium or even regeneration This logic drawn from the natural world offered the revolutionaries a crucial means of explaining and justifying revolutionary transformation If thunder could restore balance in the atmosphere and if volcanic eruptions could create more fertile soil then so too could episodes of violence and disruption in the political realm be portrayed as necessary for forging a new order in revolutionary France *Voltaire's Jews and Modern Jewish Identity* Harvey Mitchell, 2012-08-21 Harvey Mitchell's book argues that a reassessment of Voltaire's treatment of traditional Judaism will sharpen discussion of the origins of and responses to the Enlightenment His study shows

how Voltaire's nearly total antipathy to Judaism is best understood by stressing his self-regard as the author of an enlightened and rational universal history which found Judaism's memory of its past incoherent and in addition failed to meet the criteria of objective history a project in which he failed Calling on an array of Jewish and non-Jewish figures to reveal how modern interpretations of Judaism may be traced to the core ideas of the Enlightenment this book concludes that Voltaire paradoxically helped to foster the ambiguities and uncertainties of Judaism's future

L'Antisémitisme Éclairé Ilana Zinguer, Sam Bloom, 2021-10-11 This volume principally deals with perceptions on Jews dating from the beginnings of their emancipation to the Dreyfus Affair The title in French and the original title of the colloquium in Hebrew Enlightened Antisemitism not only reflects the overall anti-religious anti-Christian and hence by necessity anti-Jewish sentiments of an Enlightenment figure such as Voltaire but also refers to those who justified either their philosemitism or antisemitism with erudition Johann David Michaelis Antoine Guinée Charles Maurras etc With France as its focal point the volume also contains essays that treat various perceptions of Jews during the same period in England Germany and Italy Interdisciplinary in nature this collection of essays treats the Jewish question from historical literary and sociological angles

Enlightenment and Emancipation Susan Manning, Peter France, 2006 The Enlightenment has been represented in radically opposing ways on the one hand as the throwing off of the chains of superstition custom and usurped authority on the other hand in the Romantic period but also more recently as what Michel Foucault termed the great confinement in which mind-forged manacles imprison the free and irrational spirit The debate about the Enlightenment project remains a topical one which can still arouse fierce passions This collection of essays by distinguished scholars from various disciplines addresses the central question Was Enlightenment a force for emancipation Their responses working from within and frequently across the disciplinary lines of history political science economics music literature aesthetics art history and film reveal unsuspected connections and divergences even between well-known figures and texts In their turn the essays suggest the need for further inquiry in areas that turn out to be very far from closed The volume considers major writings in unusual juxtaposition highlights new figures of importance and demonstrates familiar texts to embody strange implications Publisher's website

Biology and Ideology from Descartes to Dawkins Denis R. Alexander, Ronald L. Numbers, 2010-05-15 Over the course of human history the sciences and biology in particular have often been manipulated to cause immense human suffering For example biology has been used to justify eugenic programs forced sterilization human experimentation and death camps all in an attempt to support notions of racial superiority By investigating the past the contributors to *Biology and Ideology from Descartes to Dawkins* hope to better prepare us to discern ideological abuse of science when it occurs in the future Denis R. Alexander and Ronald L. Numbers bring together fourteen experts to examine the varied ways science has been used and abused for nonscientific purposes from the fifteenth century to the present day Featuring an essay on eugenics from Edward J.
