Principles of Conflict Economics Charles H. Anderton, John R. Carter, 2009-03-16 Conflict economics contributes to an understanding of violent conflict in two important ways First it applies economic analysis to diverse conflict activities such as war arms races and terrorism showing how they can be understood as purposeful choices responsive to underlying incentives Second it treats appropriation as a fundamental economic activity joining production and exchange as a means of wealth acquisition Drawing on a half century of scholarship this book presents a primer on the key themes and principles of conflict economics Although much work in the field is abstract the book is made accessible to a broad audience of scholars students and policymakers by relying on historical data relatively simple graphs and intuitive narratives In exploring the interdependence of economics and conflict the book presents current perspectives of conflict economics in novel ways and offers new insights into economic aspects of violence

Understanding Near Crises and Escalation in World Politics Steven E. Lobell, Patrick James, Scott A. Silverstone, Victor Asal, Kyle Beardsley, Edward Gonzalez, Norrin M. Ripsman, 2025-07-31 This book introduces the near crisis phase of conflict and escalation These time sensitive disputes between states and even with violent non state actors do not involve significant risk of military escalation at least in the moment Investigating how and why some near crises escalate while others do not requires an explanation of the different dynamics of international disputes and the policy tools that states and international institutions can employ We ask an expanded set of questions about specific cases and general patterns of conflict behavior such as why did Israeli leaders respond to Hezbollah's 2006 cross border raid with escalation resulting in the Second Lebanon War while in previous instances the Israelis limited their retaliation Why didn't the 2015 Iranian Ballistic Missile Test or the 1995 Norwegian Black Brant Missile Launch escalate while the 2009 North Korea Missile Movement and the 1995 Taiwan Straits dispute tipped into a full blown crisis and why did the 2008 Russia Georgia conflict escalate from near crisis to war We use primary sources and newly created data on near crises to answer these questions and others The overall conclusion is that an ounce of prevention at the near crisis phase is worth a pound of cure in averting a full blown crisis or war This book will be of great interest to students of security studies conflict studies foreign policy and international relations

Explanation and Progress in Security Studies Fred Chernoff, 2014-08-20 *Explanation and Progress in Security Studies* asks why Security Studies as a central area of International Relations has not experienced scientific progress in the way natural sciences have and answers by arguing that the underlying reason is that scholars in Security Studies have advanced a range of different notions of explanation or different criteria of explanatory superiority to show that their positions are better than rival positions To demonstrate this the author engages in in depth content analysis of the generally recognized exemplars of explanation and explanatory superiority in three of the core debates in the disciplines Why do states pursue policies of nuclear proliferation Why do states choose to form the alliances they do And why do liberal democratic states behave the way they do toward other liberal democracies The book reveals that authors in the debates that have shown the most progress use similar criteria in arguing for and against the key explanations In the nuclear proliferation debate there is wide divergence in the criteria the most visible authors use and there is wide divergence in the explanations offered In the alliance formation balance of power debate there is some overlap of criteria the most important authors use and there has been some limited movement toward consensus In the democratic peace debate there has been much more overlap of criteria the most prominent authors use and there is agreement on both some positive and negative conclusions
