Studies In Language Origins Studies In Language Origins:

Studies in Language Origins Jan Wind, Abraham Jonker, Robin Allott, Leonard Rolfe, 1994-01-01 This collection brings together the best papers presented at recent meetings of the Language Origins Society The volume reflects the diversity of approaches from many disciplines that are used to unravel the mystery of the origin of language linguistics anatomy physiology paleoanthropology neuropsychology physical anthropology evolutionary biology and psychology *Studies in Language Origins* Jan Wind, Edward G. Pulleyblank, Bernhard H. Bichakjian, 1989-01-01 The question of language origin has fascinated people for years Traditionally humanists like linguists and philosophers attempted to solve it with limited success In the last decades however the sciences have begun to study the same question seemingly with more success This book is the result of the activities of a group of scholars members of the Language Origins Society who approach the problem not only from the viewpoint of linguistics but also from that of anatomy physiology social sciences physical anthropology paleoanthropology paleontology comparative zoology general biology ethology evolutionary biology and psychology The volume thus clearly reflects the interdisciplinary approach the Language Origins Society is advocating Since this book is the first of a series meant for the general scholar it attempts to avoid specialist jargon Hence it is equally useful for student courses in linguistics social sciences communication science ethology evolutionary biology and speech therapy **Studies**

Wallin, Bjorn Merker, Steven Brown, 2001-07-27 The book can be viewed as representing the birth of evolutionary biomusicology What biological and cognitive forces have shaped humankind s musical behavior and the rich global repertoire of musical structures What is music for and why does every human culture have it What are the universal features of music and musical behavior across cultures In this groundbreaking book musicologists

biologists anthropologists archaeologists psychologists neuroscientists ethologists and linguists come together for the first time to examine these and related issues The book can be viewed as representing the birth of evolutionary biomusicology the study of which will contribute greatly to our understanding of the evolutionary precursors of human music the evolution of the hominid vocal tract localization of brain function the structure of acoustic communication signals symbolic gesture emotional manipulation through sound self expression creativity the human affinity for the spiritual and the human attachment to music itself Contributors Simha Arom Derek Bickerton Steven Brown Ellen Dissanayake Dean Falk David W Frayer Walter Freeman Thomas Geissmann Marc D Hauser Michel Imberty Harry Jerison Drago Kunej Fran ois Bernard M che Peter Marler Bj rn Merker Geoffrey Miller Jean Molino Bruno Nettle Chris Nicolay Katharine Payne Bruce Richman Peter J B Slater Peter Todd Sandra Trehub Ivan Turk Maria Ujhelyi Nils L Wallin Carol Whaling Oxford Handbook of Deaf Studies, Language, and Education Marc Marschark Professor at the National Technical Institute of the Deaf at Rochester Institute of Technology, Patricia Elizabeth Spencer Research Professor in the Department of Social Work Gallaudet University, 2003-03-27 In Plato's *Cratylus* which dates to 360 B C Socrates alludes to the use of signs by deaf people In his *Natural History* completed in 79 A D Pliny the Elder alludes to Quintus Pedius the deaf son of a Roman consul who had to seek permission from Caesar Augustus to pursue his training as an artist During the Renaissance scores of deaf people achieved fame throughout Europe and by the middle of the 17th century the talents and communication systems of deaf people were being studied by a variety of noted scientists and philosophers However the role of deaf people in society has always been hotly debated could they be educated Should they be educated If so how How does Deaf culture exist within larger communities What do advances in the technology and the genetics of hearing loss portend for Deaf communities In this landmark volume a wide range of international experts present a comprehensive and accessible overview of the diverse field of deaf studies language and education Pairing practical information with detailed analyses of what works why and for whom and banishing the paternalism once intrinsic to the field the handbook consists of specially commissioned essays on topics such as language and language development hearing and speech perception education literacy cognition and the complex cultural social and psychological issues associated with individuals who are deaf or hard of hearing Through careful planning collaboration and editing the various topics are interwoven in a manner that allows the reader to understand the current status of research in the field and recognize the opportunities and challenges that lie ahead providing the most comprehensive reference resource on deaf issues Written to be accessible to students and practitioners as well as researchers The *Oxford Handbook of Deaf Studies Language and Education* is a uniquely ambitious work that will alter both theoretical and applied landscapes It surveys a field that has grown dramatically over the past 40 years since sign languages were first recognized by scientists to be true languages From work on the linguistics of sign language and parent child interactions to analyses of school placement and the mapping of brain function in deaf individuals research across a wide

range of disciplines has greatly expanded not just our knowledge of deafness and the deaf but of the very origins of language social interaction and thinking Bringing together historical information research and strategies for teaching and service provision Marc Marschark and Patricia Elizabeth Spencer have given us what is certain to become the benchmark reference in the field
