Revolutions Jack A. Goldstone, Robert King Merton, 1986

On Revolutions Colin J. Beck, Mlada Bukovansky, George Lawson, Erica Chenoweth, Sharon Erickson Nepstad, Daniel P. Ritter, 2022 A cutting edge appraisal of revolution and its future On Revolutions co authored by six prominent scholars of revolutions reinvigorates revolutionary studies for the twenty first century Integrating insights from diverse fields including civil resistance studies international relations social movements and terrorism they offer new ways of thinking about persistent problems in the study of revolution This book outlines an approach that reaches beyond the common categorical distinctions As the authors argue revolutions are not just political or social but they feature many types of change Structure and agency are not mutually distinct they are mutually reinforcing processes Contention is not just violent or nonviolent but it is usually a mix of both Revolutions do not just succeed or fail but they achieve and simultaneously fall short And causal conditions are not just domestic or international but instead they are dependent on the interplay of each Demonstrating the merits of this approach through a wide range of cases the authors explore new opportunities for conceptual thinking about revolution provide methodological advice and engage with the ethical issues that exist at the nexus of scholarship and activism

Theorizing Revolutions John Foran, 2003-09-02 In Theorizing Revolutions some of the most exciting thinkers in the study of revolutions today look critically at the many theoretical frameworks through which revolutions can be understood and apply them to specific revolutionary cases The theoretical approaches considered in this way include state centred perspectives structural theory world system analysis elite models demographic theories and feminism and the revolutions covered range in time from the French Revolution to Eastern Europe in 1989 and in place from Russia to Vietnam and Nicaragua

Handbook of Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last

decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

Information and Revolutions in Military Affairs Emily O. Goldman, 2013-09-13 Like the industrial revolution before it the information technology revolution appears to be creating a new ruling class a new economy and a new society Information technology is also transforming military operations and warfare A vast literature on the revolution in military affairs or RMA cites the important indeed dominant role of information technology in enabling a new military revolution This volume challenges conventional wisdom not by claiming that information's impact on military operations is not positive or transformative but by claiming its impact is not new Previous periods of military revolution can also be characterized as information revolutions Through the close examination of six case studies of military transformation during the industrial age the contributors to this volume demonstrate how the employment of emerging information systems was critical to realizing a major boost in military effectiveness The most successful adaptations to the new environment were made by the most skillful users of information This volume draws upon the expertise of leading military historians political scientists and defense practitioners to craft a set of original essays that provide the first retrospective examination of how information affects the process of military revolution This book was previously published as a special issue of the Journal of Strategic Studies *American Revolutions* Alan Taylor, 2016-09-06 Alan Taylor is featured in THE AMERICAN

REVOLUTION a film by Ken Burns Sarah Botstein and David Schmidt on PBS Excellent deserves high praise Mr Taylor conveys this sprawling continental history with economy clarity and vividness Brendan Simms Wall Street Journal The American Revolution is often portrayed as a high minded orderly event whose capstone the Constitution provided the nation its democratic framework Alan Taylor a two time Pulitzer Prize winner gives us a different creation story in this magisterial history The American Revolution builds like a ground fire overspreading Britain s colonies fueled by local conditions and resistant to control Emerging from the continental rivalries of European empires and their native allies the revolution pivoted on western expansion as well as seaboard resistance to British taxes When war erupted Patriot crowds harassed Loyalists and nonpartisans into compliance with their cause The war exploded in set battles like Saratoga and Yorktown and spread through continuing frontier violence The discord smoldering within the fragile new nation called forth a movement to concentrate power through a Federal Constitution Assuming the mantle of We the People the advocates of national power ratified the new frame of government But it was Jefferson s expansive empire of liberty that carried the revolution forward propelling white settlement and slavery west preparing the ground for a new conflagration
