

DIFFERENTIAL FERTILITY IN NORTH EASTERN LIBYA

DR. MAHJOUB A. ELAMIN AND DR. K.C. BHUYAN

INTRODUCTION

Fertility is influenced by a variety of interrelated factors such as education, occupation, duration of marriage, breastfeeding period, desired family size, child mortality, socioeconomic status of the parents, contraception and so on.¹⁻⁵ Differences in the socio-cultural characteristics of parents have been observed to be associated with fertility differentials, and such socio-cultural characteristics as age at marriage, value of children, contraception and child mortality are reported to be influenced by education. Moreover, the decision to have children and their number depends on the resources that parents have. The time of parents, particularly the mother's time is an important input in childbearing and rearing.

In many studies in both developed and developing countries, it has been observed that childbearing and rearing has economic consequences and that economic factors exert considerable influence on the reproductive decisions of couples.^{6,7}

Another important factor which influences fertility is contraceptive use. The couple plan their family size and execute the plan successfully to realise the desired number of children depending on their socioeconomic condition and contraceptive behaviour.

Achieving small families is possible in a society where contraception is not prohibited, because without contraception, only education and socioeconomic condition cannot reduce fertility. In Libya, contraceptive practice is not common, if not prohibited. Therefore, it was considered of interest to study the importance of socioeconomic variables in a society where couples have no experience of an organised family planning programme.

The specific objectives of the study then were: to study the fertility behaviour of couples in relation to their socio-demographic characteristics, child loss experience; and the influence of factors affecting the fertility of those couples who had experienced child loss.

Dr. M.A. Elamin is from the Department of Statistics, Garyounis University, Benghazi, Libya. Prof. K.C. Bhuyan is Visiting Professor at Garyounis University.

The Swedish Experiment in Family Politics Allan C. Carlson, 2024-12-06 This devastating account of the work of Gunnar and Alva Myrdal is a monumental case study in the uses and abuses of social science It portrays how these two young scholars used the power of ideas to help engineer a new domestic order in Sweden The book focuses on the Myrdals unique fusion of socialism and feminism with nationalism and pro nationalism in their joint 1934 book *Crisis in the Population* Question turning the issue of Sweden s declining birthrate into the most effective argument for a radical socialist remodeling of society The author uses interviews with many of the figures involved and extensive archival research including restricted materials held by Sweden s Social Democratic Party to weave an uncommonly personal account of triumphant social engineering The work of the Myrdals covered every major area of family policy and planning from a marriage loan program to maternity relief Using theories and research of a then new science of demography the Myrdals did not so much demonstrate the interpretation of facts and values as blur the distinction between them in order to insinuate ideological claims and policy mandates Carlson provides careful historical documentation of social welfare and policy in Sweden indicating the uneven path to the brave new middle way There was renewed emphasis on domesticity and traditionalism in the 1950s and only in the 1980s was the Myrdal revolution truly completed For Carlson that revolution was less a tribute to the Myrdals perspicacity than to a concurrence of circumstances weak and inconsistent data confusion over cause and effect and avoidance of controls in experimental settings Swedish experiments in marriage and family yielded a variety of results a triumph of feminism over socialism of reason over tradition central government over regionalism urban multi family dwellings over suburban single family models the therapeutic over the moral and finally the state over the family Because the Swedish model is widely regarded and emulated this critique is of immediate significance It offers the general reader remarkable insight into the nature of Scandinavian social life and to the specialist in demography economy and sociology a perspective on how social science can become itself the problem rather than provide solutions in contemporary post industrial life Allan Carlson is president of the Rockford Institute and a member of the National Commission on Children He is the author of *Family Questions Reflections on the American Social Crisis* Nation&Family:Swedish IIs 136 Josephine Klein, 2013-07-04 This is Volume XIV out of fifteen on a series of the *Sociology of Gender and the Family* Originally published in 1945 this study shows the Swedish Experiment in democratic family and population policy **International bibliography of research in marriage and the family** Joan Aldous, 1967 *The Economics of Population Growth* Julian Lincoln Simon, 2019-04-23 Comparison with stationary and very fast rates of population growth shows modern population growth to have long run positive effects on the standards of living This is Julian Simon s contention and he provides support for its validity in both more and less developed countries He notes that since each person constitutes a burden in the short run whether population growth is judged good or bad depends on the importance the short run is accorded relative to the

long run The author first analyzes empirical data formulating his conclusions using simulation models He then reviews our knowledge of the effect of economic level upon population growth A final section of his book considers the framework of welfare economics and values within which population policy decisions are now made He finds that the implications of policy decisions can prove inconsistent with the values that prompt their recommendation Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Protestant Establishment Revisited Digby Baltzell,1999-01-01 In the latter half of the twentieth century The American upper class has become less like an aristocracy governing and guiding the nation and more like a caste a privileged and closed body whose contribution to national leadership has steadily declined This loss of power and authority has been the focus of the work of E Digby Baltzell whose 1964 work The Protestant Establishment analyzed the fate and function of a predominantly Anglo Saxon and Protestant upper class in an ethnically and religiously heterogeneous democracy After 27 years Baltzell s theory of the structure and function of the establishment remains unique in the literature of class stratification and authority Baltzell views an open and authoritative establishment as a necessary and desirable part of the process of securing responsible leaders in a democratic society Such an establishment is the product of upper class institutions that are open to talented individuals of varying ethnic and social backgrounds The values of upper class tradition include an aristocratic ethos emphasizing the duty to lead as opposed to the snobbish ethos of caste that emphasizes only the right to privilege Baltzell regards this as a protector of freedom in modern democratic societies guaranteeing rules of fair play in contests of power and opinion As Baltzell points out historically the alternatives to rule by establishments have been rule by functionaries and demagogues neither of which has proven satisfactory in protecting freedoms As against Marxists who see hegemony as a social evil Baltzell following Tocqueville sees it as necessary to the well being of society Hegemonic establishments give coherence to the social spheres of greatest contest They do not eliminate conflict but prevent it from ripping society apart Baltzell s work provides uncommon insight into the relationship of social class and personal power in contemporary America This book will be of interest to sociologists political scientists historians of urban life and American studies specialists

Class in American Society Leonard Reissman,2013-08-21 This is Volume II of twenty one in a collection of Race Class and Social Structure Originally published in 1960 this book is about the place of class and its synonyms status prestige and power in the structure of American society A dominant theme of the book is that classes do exist even though individuals are not chained to these social positions with unequivocal finality
