Passionate Society Lisa Hill, 2006-10-12 Adam Ferguson 1723-1816 was a major figure of the Scottish Enlightenment whose thought was in many respects original and distinctive. This book is a study of his ideas and of the intellectual forces that shaped them. Though somewhat overlooked in the nineteenth century, Ferguson was rescued from obscurity in the first half of the twentieth century by scholars interested in the origins of sociology and early critiques of modernity. Ferguson's interest in the mechanics of social life and especially social change led him to many groundbreaking insights. In fact, he is sometimes identified as the Father of Modern Sociology. In addition to exploring whether or not he merits this title, this study examines the whole of Ferguson's thought as a system and includes his moral and faculty psychology, historiography, theology, politics, and social science. Ferguson is distinguished by his deep appreciation of the complexity of the human condition; his study of society is based on the belief that it is not only reason but the unseen, unplanned, sub-rational and visceral forces that keep the human universe in motion. Ferguson's appreciation of this fact and his ability to make social science of it is his major achievement.

Science and Humanism in the French Enlightenment Aram Vartanian, 1999 Vartanian 1922-97 offered this set of three essays to the series editors just before he died and had no opportunity to write a general introduction explaining the direction they take. However, they were deemed to be a major contribution to the study of the French Enlightenment and are presented as The Cercle Social, the Girondins, and the French Revolution.

Gary Kates, 2014-07-14 Gary Kates reconstructs the history of the Cercle Social, a group of writers and politicians who wielded considerable influence during the French Revolution and whose pioneering interest in women's rights and land reform made their club one of the most progressive in Revolutionary Paris. Originally published in 1985, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. The Cultural Aesthetics of Eighteenth-Century Porcelain Michael E. Yonan, 2017-07-05 During the eighteenth century, porcelain held significant cultural and artistic importance. This collection represents one of the first thorough scholarly attempts to explore the diversity of the medium's cultural meanings. Among the volume's purposes is to expose porcelain objects to the analytical and theoretical rigor which is routinely applied to painting, sculpture, and architecture and thereby to reposition eighteenth-century porcelain within new and more fruitful interpretative frameworks. The authors also analyze the aesthetics of porcelain and its physical characteristics, particularly the way its tactile and visual qualities reinforced and challenged the social processes within which porcelain objects were viewed, collected, and used. The essays in this volume treat objects such as figurines representing British theatrical celebrities, a boxwood and ebony figural porcelain stand, works of architecture meant to approximate porcelain visually, porcelain flowers adorning objects such as candelabra and perfume burners, and tea

sets decorated with unusual designs The geographical areas covered in the collection include China North Africa Spain France Italy Britain America Japan Austria and Holland Evolutionism in Eighteenth-century French Thought Mary Efrosini Gregory, 2008 This book examines how eighteenth century French theorists Maillet Montesquieu La Mettrie Buffon Maupertuis Diderot Rousseau and Voltaire addressed evolutionism Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long held belief that the chain of beings is fixed This book describes how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be taught to speak as well as the issue of race and the family of man
