## **Study Of Human Nature:**

*The Science of Human Nature* William Henry Pyle,1917 This book is written for young students in high schools and normal schools No knowledge can be of more use to a young person than a knowledge of himself no study can be more valuable to him than a study of himself A study of the laws of human behavior that is the purpose of this book What is human nature like Why do we act as we do How can we make ourselves different How can we make others different How can we make ourselves more efficient How can we make our lives more worth while This book is a manual intended to help young people to obtain such knowledge of human nature as will enable them to answer these questions I have not attempted to write a complete text on psychology There are already many such books and good ones too I have selected for treatment only such topics as young students can study with interest and profit I have tried to keep in mind all the time the practical worth of the matters discussed and the ability and experience of the intended readers

**A Study in Human Nature** Lyman Abbott,1884

**The Battle for Human Nature** Barry Schwartz,1987 Suggests that modern science equates human nature with the single minded pursuit of self interest and presents examples from economics evolutionary biology and psychology that show this view will lead to society s destruction

**The Study of Human Nature** Leslie Forster Stevenson,2000 Now in a new edition this exceptional anthology provides an introduction to a wide variety of views on human nature Drawing from diverse cultures over three millennia Leslie Stevenson has chosen selections ranging from ancient religious texts to contemporary theories based on evolutionary science An ideal companion to the editor s recent book *Ten Theories of Human Nature* 3 e OUP 1998 this interdisciplinary reader can also be used independently *The Study of Human Nature* 2 e offers substantial selections illustrating the ten perspectives discussed in *Ten Theories of Human Nature* 4 e The Bible Hinduism Confucianism Plato Kant Marx Freud Sartre B F Skinner s behaviorism and Konrad Lorenz s ethological diagnosis of human aggression The Islamic tradition is represented by a selection from the 20th century Iranian philosopher Ayatullah Murtaza Mutahhari The 17th and 18th century philosophers Descartes Hobbes Hume Rousseau and Kant are also represented Selections from Rousseau J S Mill and Nancy Holmstrom discuss alleged differences between women and men and a paper by Henry Bracken deals with racial issues Examples from E O Wilson s sociobiology and his critics are also included together with material from Chomsky and from recent evolutionary psychology This new edition includes more substantial selections from the Hindu Confucian and Christian traditions and provides more accessible extracts from Marx Sartre and Lorenz An excellent reader for introductory courses in philosophy religious studies human nature and intellectual history *The Study of Human Nature* 2 e is also an essential resource for anyone interested in ancient modern and contemporary perspectives on human nature

**The Science of Human Nature** William Pyle,2014-11-12 *The Science of Human Nature A Psychology for Beginners* by William Henry Pyle With Class Exercises There are at least two possible approaches to the study of psychology by teacher training students in high schools and by beginning students in normal schools One of these is through methods of

teaching and subject matter The other aims to give the simple concrete facts of psychology as the science of the mind The former presupposes a close relationship between psychology and methods of teaching and assumes that psychology is studied chiefly as an aid to teaching The latter is less complicated The plan contemplates the teaching of the simple fundamentals at first and applying them incidentally as the occasion demands This latter point of view is in the main the point of view taken in the text The author has taught the material of the text to high school students to the end that he might present the fundamental facts of psychology in simple form You are beginning the study of human nature You cannot study human nature from a book you must study yourself and your neighbors This book may help you to know what to look for and to understand what you find but it can do little more than this It is true this text gives you many facts learned by psychologists but you must verify the statements or at least see their significance to you or they will be of no worth to you However the facts considered here properly understood and assimilated ought to prove of great value to you But perhaps of greater value will be the psychological frame of mind or attitude which you should acquire The psychological attitude is that of seeking to find and understand the causes of human action and the causes consequences and significance of the processes of the human mind If your first course in psychology teaches you to look for these things gives you some skill in finding them and in using the knowledge after you have it your study should be quite worth while This book is written for young students in high schools and normal schools No knowledge can be of more use to a young person than a knowledge of himself no study can be more valuable to him than a study of himself A study of the laws of human behavior that is the purpose of this book What is human nature like Why do we act as we do How can we make ourselves different How can we make others different How can we make ourselves more efficient How can we make our lives more worth while This book is a manual intended to help young people to obtain such knowledge of human nature as will enable them to answer these questions I have not attempted to write a complete text on psychology There are already many such books and good ones too I have selected for treatment only such topics as young students can study with interest and profit I have tried to keep in mind all the time the practical worth of the matters discussed and the ability and experience of the intended readers

*The Foundations of Human Nature* John Morris Dorsey, 1935

**The Science of Human Nature** William Henry Pyle, 2017-06-27

**Readings on Human Nature** Peter Loftson, 1998-02-04

This anthology brings together 45 selections by a wide range of philosophers and other thinkers and provides a representative sampling of the approaches to the study of human nature that have been taken within the western tradition. The selections range in time from the ancient Greeks to the 1990s and in political orientation from the conservative individualism of Ayn Rand to the liberalism of John Rawls. Classic writings from the sixteenth through nineteenth centuries are here: Descartes, Machiavelli, Hobbes, Rousseau, and so on, but so are a wide range of twentieth century writings including a number of feminist voices, the biological theory of Edward O. Wilson, and the cultural materialist theory of Marvin Harris. A substantial selection of Christian views of human nature is a central part of the anthology. The anthology is as notable for its depth as it is for its breadth; an important editorial principle has been to include a variety of substantial selections, thus allowing the reader to engage more readily with some of the complexities of each approach.

**On Human Nature** Jonathan H. Turner, 2020-11-24

In this book Jonathan H. Turner combines sociology, evolutionary biology, cladistic analysis from biology, and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present day great apes. Selection pressures altered this inherited legacy for the ancestors of humans, termed hominins, for being bipedal and forced greater organization than extant great apes when the hominins moved into open country, terrestrial habitats. The effects of these selection pressures increased hominin ancestors' emotional capacities through greater social and group orientation. This shift in turn enabled further selection for a larger brain, articulated speech, and culture along the human line. Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes, being fed through the transforming effects of a larger brain, speech, and culture. These complexes, he shows, can be understood as the cognitive complex, the psychological complex, the emotions complex, the interaction complex, and the community complex.
