By Guthman and Dougal, Finances play a vital role; hence this area of study focuses on how to acquire and effectively spend money. The term financial management refers to the administration of the financial system. Planning, organising, managing and controlling a business's financial operations fall within the purview of financial management. Financial management affects every facet of for-profit and non-profit organisations alike. It is responsible for a wide variety of tasks such as raising capital, allocating resources and monitoring results in the financial realm. As a result, it has become an essential part of every business. Economics is the study of fundamental financial theory and its application to the conduct of economic or monetary operations. As a result, it is clear that economic ideas are applicable to financial matters.
