and the journal began to attract pieces from some brilliant writers Mike Gibson John Challenor Nerys Williams and of course the superlative Anthony Seaton amongst many others Each article offers something different a peek into history a humorous adventure a quiet musing or a thought provoking observation but all are tied together under the umbrella of occupational medicine a speciality that is often little known or understood in the wider world of medicine This book brings together over 15 years worth of fascinating and diverse articles into one volume for the first time giving a rare insight into the world of the occupational physician      *Research on the Early Malay Doctors 1900-1957 Malaya and Singapore* Faridah Abdul Rashid,2012-07-17 This book explains how to do research on the early Malay doctors a detailed account of the meaning of the word Malay is given in due recognition of the high status accorded to Malay Civilization in the Malay annals and Chinese chronicles Forty three early Malay doctors were traced over nine years in Malaya and Singapore the techniques deployed to trace them are explained the sources of their biographies are described which include interviews narratives family accounts newspapers publications and contacting their former institutions friends and associations Only a brief one page biography for each doctor is included in this book There are 30 appendices that contain tabulated information about these doctors information about the early schools medical institutions and hospitals at the time This book is a resource guide on the early Malay doctors based on present research findings More research efforts need to be channeled to find the remaining 12 early Malay doctors      *Hearings, Reports and Prints of the Senate Committee on Appropriations* United States.
