**Annual of German and European Law** Russell Miller, 2007-02-01 German law has been of long standing interest and increasing relevance around the world but access for researchers and practitioners very frequently was limited by the necessity of German language proficiency Offering English language access to these fields the Annual of German 2 jurisdictional reports comments on the latest caselaw from Germany s most significant courts and the case law of the European courts having importance for Germany 3 book reviews surveying the most compelling recent literature whether in the German or English language in the fields of German and European law and 4 translations exclusive English language versions of significant primary sources of German law including statutes and court opinions The first volumes of the Annual of German Juliet Lodge Volume I Alexander Somek Volume I Susanne Baer Volume I Renate Jaeger Volume II G nter Frankenberg Volume II Bootjan Zupan i Volume II Nigel Foster Volume II The third volume maintains this tradition of high quality peer reviewed scholarship with contributions expected from Gertrude L bbe Wolff Justice German Federal Constitutional Court and Christian Joerges European University Institute

**EU Law and the Harmonization of Takeovers in the Internal Market** Thomas Gr. Papadopoulos, 2010-08-27 Analysing the Takeover Bid Directive in light of EU Law this important monograph examines the extent to which the Directive facilitates the exercise of the fundamental freedom of establishment and the free movement of capital in the internal market The analysis begins with a discussion of the fundamental freedom of establishment of companies as well as of the legal bases for the harmonization of company law and capital markets law at the EU level Additionally the significance of corporate mobility and of the freedom of establishment case law of the European Court of Justice for the takeover process is analysed The author shows that far from achieving market integration in the field of EU company law the Takeover Bid Directive is a compromise resulting from the very different legal and policy approaches of the Member States in the field of takeover regulation Although some provisions of the Directive are obligatory for all Member States two key provisions have been made optional the non frustration rule which requires a board of directors to obtain the prior authorization of a general meeting of shareholders before taking any action that could result in the frustration of the bid and the breakthrough rule which restricts significant transfer and voting rights during the time allowed for acceptance of the bid

**Towards a Sustainable European Company Law** Beate Sjøfjell, 2009-01-01 No one doubts any longer that sustainable development is a normative imperative Yet there is unmistakably a great reluctance to acknowledge any legal basis upon which companies are obliged to forgo shareholder value when such a policy clearly dilutes responsibility for company action in the face of continuing environmental degradation Here is a book that boldly says Shareholder primacy is wrong Such a narrow short term focus the author shows works against the achievement of the overarching societal goals of European law itself The core role of EU company and securities law is to promote economic development notably through

the facilitation of market integration while its contributory role is to further sustainable development through facilitation of the integration of economic and social development and environmental protection There is a clear legal basis in European law to overturn the poorly substantiated theory of a market for corporate control as a theoretical and ideological basis when enacting company law With rigorous and persuasive research and analysis this book demonstrates that European companies should have legal obligations beyond the maximization of profit for shareholders human and environmental interests may and should be engaged with in the realm of company law and company law has a crucial role in furthering sustainable development As a test case the author offers an in depth analysis of the Takeover Directive showing that it neither promotes economic development nor furthers the integration of the economic social and environmental interests that the principle of sustainable development requires This book goes to the very core of the ongoing debate on the function and future of European company law Surprisingly it does not make an argument in favour of changing EU law but shows that we can take a great leap forward from where we are For this powerful insight and the innumerable recognitions that support it this book is a timely and exciting new resource for lawyers and academics in both camps those on the activist side of the issue and those with company or official policymaking responsibilities

Practical Regulation of the Mobility of Sportsmen in the EU Post Bosman Stefaan Van den Bogaert, 2005-01-01 Sport is recreational social educational healthful and cultural It has always been all of these things Perhaps also it has always been political In recent years however it has become something else besides economic Nowadays a lot of money is invested in sport and sporting competitions often generate enormous amounts of revenue This has entailed serious repercussions especially for the relations between individual sportsmen sportswomen and the sporting clubs and federations that act as brokers for their careers Into this protected area for decades a closed shop now come the European institutions especially the European Court of Justice and the European Commission with the declared intention of ensuring respect for the exigencies of Community law while at the same time protecting the specificity and the integrity of sport This important book presents an in depth analysis of the viability under Community law of traditional sports regulations such as transfer rules and nationality clauses both sets of rules seriously compromised by the Bosman case of 1995 The author asks in particular whether certain rules elaborated by sporting associations can withstand the test of compatibility with the free movement provisions of the EC Treaty In the light of Bosman he also rigorously investigates whether valuable arguments exist for keeping certain sporting rules and practices entirely outside the scope of the EC Treaty and whether the private nature of sporting clubs constitutes a stumbling block for the application of the relevant free movement rules Practical Regulation of the Mobility of Sportsmen in the EU Post Bosman comes at a moment when clarification of where this complex and contentious matter currently lies is essential if we are to gauge where it is going The topic is of special and increasing interest as official declarations on sport were attached to the Treaties of both Amsterdam and Nice And if the draft Constitution for Europe actually enters into force sport will even become an official

area of Union policy This trend confirms the value and significance of this ground breaking book for practitioners policymakers and regulators in the burgeoning field of sports law European Monographs 48

policy priorities both by national governments and international bodies and corporations This proudly interdisciplinary collection is built on the premise that these topics are too often artificially separated both in scholarship and the classroom Bringing together scholars from law the social sciences and the humanities this book showcases a diverse range of perspectives on these complex and compelling global issues and the criminal justice challenges that they pose The themes discussed include legal theory and procedure regulation and enforcement prevention and punishment media representation and perception Readers are encouraged to think outside traditional disciplinary bounds and form their own connections and conclusions inspired by the juxtaposition of perspectives rarely seen together in the same volume **Whitaker's Books in Print** ,1998
