Problem-Solving Exercises in Green and Sustainable Chemistry Albert S. Matlack, Andrew P. Dicks, 2015-11-05 When confronted with a problem in science the way to proceed is not always obvious The problem may seem intractable or there may be many possible solutions with some better than others Problem Solving Exercises in Green and Sustainable Chemistry teaches students how to analyze and solve real world problems that occur in an environmental context

The Watchman's Rattle Rebecca Costa, 2010-10-12 Why can't we solve our problems anymore Why do threats such as the Gulf oil spill worldwide recession terrorism and global warming suddenly seem unstoppable Are there limits to the kinds of problems humans can solve Rebecca Costa confronts and offers a solution to these questions in her highly anticipated and game changing book *The Watchman's Rattle* Costa pulls headline for today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities With compelling evidenced based on research in the rise and fall of Mayan Khmer and Roman empires Costa shows how that tendency to find a quick solutions leads to frightening long term consequence Society's ability to solve its most challenging intractable problems becomes gridlocked progress slows and collapse ensues A provocative new voice in the tradition of thought leaders Thomas Friedman Jared Diamond and Malcolm Gladwell Costa reveals how we can reverse the downward spiral Part history part social science part biology *The Watchman's Rattle* is sure to provoke engage and incite change

Why Do We Recycle? Frank Ackerman, 2013-04-15 The earnest warnings of an impending solid waste crisis that permeated the 1980s provided the impetus for the widespread adoption of municipal recycling programs Since that time America has witnessed a remarkable rise in public participation in recycling activities including curbside collection drop off centers and commercial and office programs Recently however a backlash against these programs has developed A vocal group of anti recyclers has appeared arguing that recycling is not an economically efficient strategy for addressing waste management problems In *Why Do We Recycle* Frank Ackerman examines the arguments for and against recycling focusing on the debate surrounding the use of economic mechanisms to determine the value of recycling Based on previously unpublished research conducted by the Tellus Institute a nonprofit environmental research group in Boston Massachusetts Ackerman presents an alternative view of the theory of market incentives challenging the notion that setting appropriate prices and allowing unfettered competition will result in the most efficient level of recycling Among the topics he considers are externality issues unit pricing for waste disposal effluent taxes virgin materials subsidies advance disposal fees the landfill crisis and disposal facility siting container deposit bottle bill legislation environmental issues that fall outside of market theory calculating costs and benefits of municipal recycling programs life cycle analysis and packaging policy Germany's Green Dot packaging system and producer responsibility the impacts of production in extractive and manufacturing industries composting and organic waste management economics of conservation and material use and long

term sustainability Ackerman explains why purely economic approaches to recycling are incomplete and argues for a different kind of decisionmaking one that addresses social issues future as well as present resource needs and non economic values that cannot be translated into dollars and cents Backed by empirical data and replete with specific examples the book offers valuable guidance for municipal planners environmental managers and policymakers responsible for establishing and implementing recycling programs It is also an accessible introduction to the subject for faculty students and concerned citizens interested in the social economic and ethical underpinnings of recycling efforts

Introduction to Green Chemistry John Andraos, Albert S. Matlack, 2022-03-09 Interest in green chemistry and clean processes has grown so much in recent years that topics such as fluororous biphasic catalysis metal organic frameworks and process intensification which were barely mentioned in the First Edition have become major areas of research In addition government funding has ramped up the development of fuel cells and biofuels This reflects the evolving focus from pollution remediation to pollution prevention Copiously illustrated with more than 800 figures the Third Edition provides an update from the frontiers of the field It features supplementary exercises at the end of each chapter relevant to the chemical examples introduced in each chapter Particular attention is paid to a new concluding chapter on the use of green metrics as an objective tool to demonstrate proof of synthesis plan efficiency and to

identify where further improvements can be made through fully worked examples relevant to the chemical industry
NEW AND EXPANDED RESEARCH TOPICS Metal organic frameworks Metrics Solid acids for alkylation of isobutene by butanes Carbon molecular sieves Mixed micro and mesoporous solids Organocatalysis Process intensification and gas phase enzymatic reactions Hydrogen storage for fuel cells Reactive distillation Catalysts in action on an atomic scale
UPDATED AND EXPANDED CURRENT EVENTS TOPICS Industry resistance to inherently safer chemistry Nuclear power Removal of mercury from vaccines Removal of mercury and lead from primary explosives Biofuels Uses for surplus glycerol New hard materials to reduce wear Electronic waste Smart growth The book covers traditional green chemistry topics including catalysis benign solvents and alternative feedstocks It also discusses relevant but less frequently covered topics with chapters such as Chemistry of Long Wear and Population and the Environment This coverage highlights the importance of chemistry to everyday life and demonstrates the benefits the expanded exploitation of green chemistry can have for society
