The United States-Japan-China Triangle in the Post-Cold War Early Decades: A Case Study of Applied Political Science Jalel Ben Haj Rehaïem,2025-01-31

This book examines the post Cold War U S Japan China Triangle through the lens of two core international relations variables power and security Following the collapse of the Soviet Union the U S as the sole superpower aimed to prevent the rise of any rival in Asia or elsewhere that could threaten its global position This approach aligns with a realist view of international relations championed by scholars like John Mearsheimer tracing back to the principles of interstate competition seen as far back as the 1648 Westphalia Treaty and the Peloponnesian War in the 5th century BC The book argues that the U S aims to prevent China from becoming a revisionist power by strategically using its alliance with Japan as a deterrent within the American led regional order Historically the U S Japan China relationship has seen consistent U S support for Japan often at China s expense except during World War II Since the 19th century the U S

alongside European powers pressured China through treaties such as the 1844 Wanghia Treaty and direct interventions like the Opium Wars Japan's industrialization after the Meiji Restoration led to imperialist ambitions that eventually clashed with Western interests culminating in Japan's 1941 attack on Pearl Harbor a short lived break in the U S Japan alignment After the Communist rise to power in China in the late 1940s the U S renewed its strategic ties with Japan to contain Chinese influence solidified by the 1951 security treaty *American Political Ideologies* Brian R. Farmer,2014-11-01 For many people the world of politics is defined by ideologies The average voter rarely takes time to research a policy issue thoroughly relying instead on a set of beliefs set forth by his or her chosen political organization to make important decisions These publicly promoted ideologies play an important role in international as well as domestic political development yet many adherents to a particular belief may have a poor understanding of competing ideologies From right wing to the far left this text dissects eight prominent political ideologies traditional conservatism classic liberalism libertarianism conservative extremism contemporary liberalism communism dependency theory and Islamism In plain terms it describes the basic doctrine and inherent contradictions of each creed along with its particular relevance to today's political landscape An in depth discussion of the political socialization processes that form and perpetuate ideologies is also included Instructors considering this book for use in a course may request an examination copy here **Brief History of Social Problems**

Frank J. McVeigh,Loreen Therese Wolfer,2004 In this book Frank McVeigh and Loreen Wolfer take an historical approach to examine the causes and conflicts behind ten major social problems that have existed for nearly 230 years Using a critical thinking perspective of the history sociology politics and economics of the period the authors analyze social problems as a series of conflicts between those with power and those who were at one time virtually powerless Embedded in this analysis is a discussion of how the shift from a *Gemeinschaft* to *Gesellschaft* society has influenced how we address these problems Using these themes McVeigh and Wolfer provide thought provoking insight into the ways individuals groups and social institutions change over time gaining or losing power The book contains a preface by Arthur Shostak Drexel University

Cultures and Globalization Helmut K Anheier,Yudhishtir Raj Isar,2007-03-27 In the age of globalization we are no longer home alone Migration brings other worlds into our own just as the global reach of the media transmits our world into the hearts and minds of others Often incommensurate values are crammed together in the same public square Increasingly we all today live in the kind of edge cultures we used to see only on the frontiers of civilizations in places like Hong Kong or Istanbul The resulting frictions and fusions are shaping the soul of the coming world order I can think of no other project with the ambitious scope of defining this emergent reality than The Cultures and Globalization project I can think of no more capable minds than Raj Isar and Helmut Anheier who can pull it off Nathan Gardels Editor in Chief NPQ Global Services Los Angeles Times Syndicate Tribune Media This series represents an innovative approach to the central issues of globalization that phenomenon of such undefined contours Lupwishi Mbuyumba Director of the Observatory of Cultural Policies in Africa

The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization Series is designed to fill this void in our knowledge. Analyzing the relationship between globalization and cultures is the aim of the Series. In each volume, leading experts as well as young scholars will track cultural trends connected to globalization throughout the world, covering issues ranging from the role of cultural difference in politics and governance to the evolution of the cultural economy and the changing patterns of creativity and artistic expression. Each volume will also include an innovative presentation of newly developed indicator suites on cultures and globalization that will be presented in a user-friendly form with a high graphics content to facilitate accessibility and understanding. Like so many phenomena linked to globalization, conflicts over and within the cultural realms crystallize great anxieties and illusions through misplaced assumptions, inadequate concepts, unwarranted simplifications and instrumental readings. The aim here is to marshal evidence from different disciplines and perspectives about the culture conflict and globalization relationships in conceptually sensitive ways.

Political Islam, World Politics and Europe Bassam Tibi, 2014-07-11

The new and updated edition of *Political Islam, World Politics and Europe* focusses on the shift within political Islam in light of 9/11 and the events of the Arab Spring from a jihadist struggle to institutional Islamism. Refuting what has often been referred to by commentators as the moderation of Islamism, the second edition of this book introduces the concept of institutional Islamism, a process which Tibi argues was accelerated in the aftermath of the Arab Spring. Both jihadist and institutional Islamism pursue the same goal of an Islamist state but disagree fundamentally on the strategy for achieving it. Whilst jihadism is committed to the idea of a violent Islamic world revolution, institutional Islamism embraces political institutions as a means to an end. Turning to the events of the Arab Spring in Tunisia, Libya and Egypt, this book attempts to determine whether an abandonment of violence is enough to underpin a shift to genuine democracy. Analysing the fall of Morsi in particular, Tibi questions what lessons can be learnt from his presidency and argues that this event will not change the overall trend of development from jihadism to institutional Islamism. A timely addition to existing literature, this book will be of interest to students and scholars studying Middle Eastern and European Politics, Political Islam and International Relations.
