**Inter-professional Approaches to Young Fathers** Jane Reeves, 2008 With one of the highest teenage pregnancy rates in Europe young fatherhood as a site of economic and personal adversity has become a focus of concern in Britain during the late 1990s However despite this policy interest there is surprisingly little British empirical evidence to review One of the aims of the book is to draw together contemporary research evidence social theory and policy which may effect how practitioners students and academics conceptualise and work with young fathers Consequently each chapter illustrates the

points it makes using discrete evidence from that particular field Moreover in order to make this process more OCyuser friendlyOCO each chapter provides a summary of this literature and evidence Finally in order to make the book come alive it draws on case studies which are drawn variously from two studies conducted by the editor **Changing Britain** Susan McRae,1999 Major changes have happened in households and people s lives in most countries in the developed world Marriage rates have fallen divorce has risen women are having fewer children and later in life and there has been a rise in childbearing outside marriage One in four families is headed by a lone parent We are all getting older These changes have significance that goes beyond the individual families with implications for housing demand social security benefits labour force participation health and social services Changing Britain provides a comprehensive portrait of British families and households at the end of the 20th Century The book examines more generally the nature of economic and labour market change Britain s place in Europe and changing attitudes towards family life Specifically the book also deals with issues such as older people s lives non heterosexual families one person households young mothers and single parents and divorce

Family Relationships Catherine A. Salmon,Todd K. Shackelford,2008 Kinship ties the close relationships found within the family have been a central focus of evolutionary biological analyses of social behavior ever since biologist William Hamilton extended the concept of Darwinian fitness to include an individual s actions benefiting not only his own offspring but also collateral kin Evolutionary biologists consider organisms not only reproductive strategists but also nepotistic strategists If a person s genes are just as likely to be reproduced in her sister as in her daughter then we should expect the evolution of sororal investment in the same way as one expects maternal investment This concept has revolutionized biologists understanding of social interaction and developmental psychologists understanding of the family However kinship ties have largely been ignored in other areas of psychology particularly social psychology Family Relationships brings together leading theorists and researchers from evolutionary psychology and related disciplines to illustrate the ways in which an evolutionary perspective can inform our study and understanding of family relationships The contributors argue that family psychology is relationship specific the relationship between mother and daughter is different from that between father and daughter or that between brother and sister or sister and sister In other words humans have evolved specialized mechanisms for processing information and motivating behavior that deal with the distinct demands of being a mate father mother sibling child or grandparent Such an evolutionary perspective on family dynamics provides a unique insight into human behavior This volume will be an indispensable resource for psychologists sociologists and anthropologists as well scholars of family marriage and animal behavior Inhabited by Stories Nancy A. Barta-Smith,Danette DiMarco,2012-11-30 Intertextuality has signaled change appropriation adaptation and derivation It has focused readers on irresolvable questions of influence and origination progressive or regressive movement across continents periods and media Inhabited by Stories Critical Essays on Tales Retold takes a different approach What would a model of literary study look like that steps out of time s river and

embraces not only the presence and proximity of the world to the senses but also of the past and the future to the present here and now When stories inhabit us imagination and memory extend our ability to see and feel Phenomenological experience is lived not just thought Such a perspective suggests that the past and future inhabit the present increase the depth of sensory perception itself and enrich the range of our affective and ethical responses Grounded in the lived experience of reading this perspective offers an alternative to an idea of intertextuality as simply following lines of influence and appropriation It focuses on the expansion of experience created by telling and retelling stories Ironically for literary theorists and critics perhaps the highest form of both praise and critique is a tale retold since such retellings attest to literature's instructive power and its perennial regeneration
