Endangered Species Act was enacted by the United States Congress in December 1973 Also considering its success stories like the Attwater s prairie chicken the ESA has had an enormous impact on conservation theory and practice throughout the world from Tasmanian devils in Australia to the vaquita porpoises of Mexico But worsening government budget constraints public inattention and a continuous string of setbacks experienced within numerous rehabilitation initiatives will all eventually conspire to challenge the conventional thinking on endangered species management like never before Author Nathaniel Gronewold explains how we got here where things stand today and what lessons conservationists must take to heart as the world continues to struggle to put a halt to an ongoing global extinction crisis A tale of two fair women; or The religion of humanity Tale,1882 **Our Dolphin Ancestors** Frank Joseph,2016-03-17 Reveals the shared ancestry behind our affinity with dolphins and our shared destiny Explains how we are both descendants of the aquatic ape and still share many physiological features with dolphins that set us apart from other primates Explores dolphins communication with other species and how dolphin therapy has miraculous effects on people with autism cancer stroke and depression Explores the connections between dolphins and Atlantis and Lemuria Wild animals avoid contact with humans but wild dolphins seek us out to play and socialize even going so far as to voluntarily rescue people from drowning What explains this remarkable natural affinity Revealing the evolutionary basis for our special relationship with dolphins Frank Joseph explains how we are both descendants of the same ancient branch of human ity Building upon the aquatic ape theory he details how we both began on land but devastating floods forced our distant ancestors into the seas where humanity developed many of the traits that set us apart from other primates such as our instinctive diving reflex and our newborns ability to swim But while some of the aquatic apes returned to land later evolving into modern humans some remained in the cradle of Mother Ocean and became our dolphin cousins Integrating scientific research on dolphin intelligence communication and physiology with enduring myths from some of the world s oldest cultures such as the Aborigines Norse Greeks and Celts the author examines our physical commonalities with dolphins including their vestigial thumbs and legs birth processes and body temperature He explores dolphins uncanny ability to diagnose disease such as cancer in humans and how dolphin therapy has had miraculous effects on children with autism victims of stroke and those suffering from depression He provides evidence for dolphins different attitudes toward men women and children their natural affinity with cats and dogs and their telepathic communication with other species including ours He explores dolphins mysterious role in the birth of early civilization and their connections with the Dog Star Sirius and Atlantis and Lemuria a bond still commemorated by annual gatherings of millions of dolphins As Frank Joseph shows if we can learn to fully communicate with dolphins accessing their millennia old oral tradition we may learn the truth about humanity s origins and our shared future when humankind may yet again quit the land for a final return to the sea **The Culture of Feedback** Daniel Belgrad,2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of

feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking The Culture of Feedback digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before
