Person-centred Primary Care Christopher Dowrick, 2017-11-27 Primary care grounded in the provision of continuous comprehensive person centred care is of paramount importance in the delivery of accessible and effective health care around the world The central notion of person centred care however relies on often unexamined concepts of self or understandings of what it means to be a person and an agent This cutting edge book explores contemporary pressures on the sense of self for both patient and health professional within a consultation and argues that building new concepts of the self is essential if we are to reinvigorate the central tenets

of person centred primary care Contemporary trends such as shared decision making between health professionals and patients and promoting self management assume those involved are able to make their own decisions and take action In practice however medicine often opts for reductionist perspectives of patients as passive mechanical systems and diseases as puzzles At the same time huge political and organisational changes mean time and resources are scarce putting further pressure on consultations This book discusses how we can start to resolve these tensions The first part considers problems posed by the increasing bureaucratisation of primary care the impact of information technology in the consultation the effects of chronic disease on our sense of self and how an emphasis on biology over biography leads to over diagnosis The second part proposes solutions based on a strong ontology of consciousness concepts of creative capacity coherence and engagement and will show how these can enhance the self esteem of patients and doctors and benefit their therapeutic dialogue Combining theoretical perspectives from philosophy sociology and healthcare research with insights drawn from clinical practice this edited volume is suitable for those researching and studying primary healthcare communication and relationships in healthcare and the medical humanities *Weekly Compilation of Presidential Documents* ,1999

Underdogs Philip Toynbee,1961 **Wounded Masculinities** Valeria Quaglia,2023-12-05 This book contributes to the emerging field of men s health studies delving into how men incorporate adapt negotiate or reject health care practices to perform masculinities in social interactions By moving beyond the simplistic association between men masculinity and the adoption of risky or unhealthy practices this book draws from recent critical perspectives on the study of men s health seeking to challenge and problematize the relationship between masculinities and health The text presents original empirical findings derived from qualitative and digital research examining the different ways in which men re negotiate their masculinities after the onset of a chronic illness focusing on diabetes as a strategic case study Living with a chronic illness implies that those gender practices that are usually taken for granted suddenly become unachievable and impose a reconfiguration of the masculine self as well as a negotiation of the very meaning of masculinity The volume aims to critically examine this interactive process of re negotiation while also reflecting on men masculinities and their health on a more general level This book serves as a valuable resource for students and scholars in social sciences working on the intersection of gender and health as well as for health professionals seeking a deeper understanding of the connection between men gender and health **Public Papers of the Presidents of the United States, William J.
