"Proverbs Speak Louder Than Words" Wolfgang Mieder, 2008

The ten chapters of *Proverbs Speak Louder Than Words* present a composite picture of the richness of proverbs as significant expressions of folk wisdom as is manifest from their appearance in art culture folklore history literature and the mass media. The first chapter surveys the multifaceted aspects of paremiology the study of proverbs with the second chapter illustrating the paremiological work by the American folklorist Alan Dundes. The next two chapters look at the effective role that proverbs play in the mass media where they are cited in their traditional wording or as innovative anti proverbs. The fifth chapter discusses proverbs as expressions of the worldview of New England. This is followed by two chapters on the proverbial prowess of American presidents to wit the proverbial style in the correspondence between John and Abigail Adams and a discussion of Abraham Lincoln's apocryphal proverb "Don't swap horses in the middle of the stream." The eighth chapter traces the tradition of proverb iconography from medieval woodcuts to Pieter Bruegel the Elder and on to modern caricatures cartoons and comic strips. The last two chapters deal with the origin and history of the proverbial expression to tilt at windmills as an allusion to Cervantes' *Don Quixote* and the many proverbial utterances in Mozart's letters. The book draws attention to the fact that proverbs as metaphorical signs continue to play an important role in oral and written communication. Proverbs as so-called *monumenta humana* are omnipresent in all facets of life and while they are neither sacrosanct nor saccharine they usually offer much common sense or wisdom based on recurrent experiences and observations.

[American Proverbs About Women](#) Lois Kerschen, 1998-06-25 Proverbs supposedly contain the wisdom of the common folk eternal truths to be passed down through the ages. They are short often humorous expressions that teach lessons or give practical advice and they are perhaps the best indicators of attitudes and beliefs of any form of folklore. Not only reflecting culture proverbs also perpetuate the cultural dictates of the past including the fears prejudices and misconceptions of their predominately male authors. Because they are generalizations proverbs sometimes impede accurate observation and analysis and stifle original thought. Like many other traditions and cultural practices proverbs often promote misleading stereotypes of women. This reference book collects more than 800 American proverbs about women and analyzes their significance. The volume begins with introductory chapters that explore the relationship between proverbs and culture and the image of women presented in proverbs. The chapters that follow are devoted to particular categories such as wives and marriage mothers and daughters women as property and old women and grandmothers. Each chapter includes a brief introductory overview and a listing of proverbs relating to the topic. The proverbs were gathered through an extensive review of journal articles proverb dictionaries and other literature. In addition to true proverbs the volume includes some phrases sayings and proverbial comparisons. Not included are expressions that contain words like mother or daughter but do not really describe women or comment about them. The book then presents a concluding analysis of how American proverbs

portray women an alphabetical index of proverbs and an extensive bibliography *Phraseology and Culture in English* Paul Skandera, 2008-08-22 The proposition that there is a correlation between language and culture or culture specific ways of thinking can be traced back to the views of Herder and von Humboldt in the late 18th and early 19th centuries It is generally accepted today that a language especially its lexicon influences its speakers cultural patterns of thought and perception in various ways for example through a culture specific segmentation of the extralinguistic reality the frequency of occurrence of particular lexical items or the existence of keywords or key word combinations revealing core cultural values The aim of this volume is to explore the cultural dimension of a wide range of preconstructed or semi preconstructed word combinations in English The 17 papers of the volume are divided into four sections focusing on particular lexemes e g enjoy and its collocates types of word combinations e g proverbs and similes use related varieties such as the language of tourism or answering machine messages and user related varieties such as Aboriginal English or African English The sections are preceded by a prologue tracing the development of the study of formulaic language and followed by an epilogue which draws together the threads laid out in the various papers The relation between language and culture in general has been explored in a number of important works over the past ten years However the study of the relation between English phraseology and culture in particular has been largely neglected This volume is the first book length publication devoted entirely to this topic
