Talking about a Revolution Jacqueline Cossentino, 2004 **Talking about a Revolution** Jacqueline Cossentino, 2004-10-14 Analyzes how teachers attempt to translate the language of reform into pedagogical action

Re-Envisioning Education and Democracy Ruthanne Kurth-Schai, Charles R. Green, 2006-09-01 The fate of public education and therefore the future of our democracy is at risk Powerful forces are eroding commitment to public schools and weakening democratic resolve Yet even in deeply troubling times it is possible to broaden social imagination and empower efforts toward systemic progressive reform This book is an invitation for widespread participation in a complex process re envisioning education and democracy To reenvision to envision and then envision again is to join with others in imagining new possibilities and bringing these into existence Re envisioning is a radically social process Although distinct and varied individual contributions are required transformative visions cannot be advanced through the agency of one charismatic person or bound by one influential perspective The process of re envisioning like all forms of democratic living and learning draws energy and insight when connection and communion are sustained across dimensions of difference Re envisioning is an intensely creative and exploratory process It is not accomplished through careful construction of best laid plans aimed at attaining certainty and control Re envisioning is instead experienced and evolved by preparing for and then acting on informed and strategic glimpses These brief and fleeting impressions multimodal and multi sensory incomplete and ambiguous always in motion offer potentials but no definitive answers Re envisioning is a profoundly ethical and aesthetic process centered in prospects for social justice compassion reform and renewal Social movements are rarely motivated by commitments to narrow objectives aimed at solving specific problems Across time and cultures we are drawn to persons and processes to ideas and images that call us back to remember our highest principles and move us forward to respond with acts of integrity and grace Recurrent themes of beauty and power here mirrored in chapter titles inspire guide and liberate collective vision and principled action Re envisioning although accessible to all remains largely undeveloped and underutilized Our collective ability to realize progressive aspirations for education and democracy can be significantly enhanced by integrating the process of re envisioning with other more familiar educational and political reform strategies

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based

management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily
